On the 25th August 2020, the Africa Regional Certification Commission certified the WHO African Region as wild polio-free after four years without a case. That is a major win as five of the six WHO regions – representing over 90% of the world's population – are now free of the wild poliovirus, moving the world closer to achieving global polio eradication.

This has only been possible through the polio vaccine and countless effort of partners advocating and implementing the Child Immunisation Programme. Get ready for #WorldPolioDay on 24th October! Learn where we are in the fight to end polio: endpol.io/wpd
