Updates on COVID-19 (Coronavirus Disease 2019) Local Situation

10 Mar 2020

① Clarifications on Misinformation

28 Feb 2020: MOH is aware of a rumour circulating on social media that a foreign domestic worker had passed away from COVID-19 in Singapore. This is not true. She was tested for COVID-19 and found to be negative.

As of 4pm on 28 Feb 2020, there has been no fatality related to COVID-19 in Singapore.

We advise members of the public to not speculate and/or spread unfounded rumours. Please visit www.moh.gov.sg for updates on the COVID-19 situation and click [here](#) for past clarifications.

Precautions that you can take

We urge Singaporeans to remain calm and vigilant. Singaporeans can continue to play their part by being socially responsible and practising good personal hygiene habits (click [here](#) to view Health Advisory). They should wash their hands regularly. Those who are unwell should wear a mask and see a doctor immediately. But there is no need to wear a mask if you are well.

Given the evolving situation, Singaporeans who need to travel to the affected areas are advised to regularly check MOH's website for updates. They should also check the immigration and health requirements of the countries they are going to.

Health Advisory

Singaporeans are advised to defer all travel to Hubei Province in China and non-essential travel to the following areas:

- Mainland China;
- Iran;
- Northern Italy;
- Japan; and
- Republic of Korea

Given the evolving situation, Singaporeans who need to travel to the affected areas are advised to regularly check MOH's website for updates. They should also check the immigration and health requirements of the countries they are going to.

All travellers should monitor their health closely for two weeks upon return to Singapore and seek medical attention promptly if they feel unwell. Travellers should inform their doctor of their travel history. If travellers have a fever or respiratory symptoms (e.g. cough, shortness of breath), they should wear a mask and call the clinic ahead of the visit.

Travellers and members of the public should adopt the following precautions at all times:

- Avoid consumption of raw or undercooked meats;
- Avoid crowded places and close contact with people who are unwell or showing symptoms of illness;
- Observe good personal hygiene;
- Practise frequent hand washing with soap (e.g. before handling food or eating, after going to toilet, or when hands are dirtied by respiratory secretions after coughing or sneezing);
- Wear a mask if you have respiratory symptoms such as a cough or runny nose;
- Cover your mouth with a tissue paper when coughing or sneezing, and dispose the soiled tissue paper in the rubbish bin immediately; and
- Seek medical attention promptly if you are feeling unwell.

Travellers entering Singapore and exhibiting fever and/or other symptoms of respiratory illness but who do not meet the clinical suspect case definition may be required to undergo a COVID-19 swab test at the checkpoint.

Precautionary testing for symptomatic travellers

From 4 March 2020, 2359 hours,

- Travellers entering Singapore and exhibiting fever and/or other symptoms of respiratory illness but who do not meet the clinical suspect case definition may be required to undergo a COVID-19 swab test at the checkpoint.[1] They may carry on with their journey immediately after undergoing the test. Pending the results, which may take between three and six hours, the travellers are advised to minimise contact with others as a precautionary measure. Individuals will be contacted on their swab test results and those with positive results will be conveyed to the hospital in a dedicated ambulance.
- Short-term visitors who are identified for testing but refuse to do so will not be allowed entry into Singapore. Singapore Permanent Residents and long-term pass holders who refuse testing may have their immigration facilities and work pass privileges revoked or the validity shortened. All travellers, including Singapore Citizens, who do not comply with the testing or who cannot be contacted subsequently may face penalties and can be prosecuted under the Infectious Diseases Act.

[1] Travellers who meet the clinical suspected case definition will be conveyed directly to the hospital.
