Listen

As of 6 August 2020, 12pm, the Ministry of Health (MOH) has confirmed 301 new cases of COVID-19 infection in Singapore.

Among the cases:

- Imported cases: **4**
  - 1 Singaporean, 2 Work Pass holders, 1 Dependant's Pass holder

  Amongst the 4 imported cases, 1 (Case 54617) is a Singaporean who returned to Singapore from Kazakhstan on 25 July. Another 2 cases (Cases 54619 and 54621) are Work Pass holders who are currently employed in Singapore, and had arrived from India on 25 July. The remaining case (Case 54620) is a Dependant's Pass holder who arrived from India on 25 July. All of them had been placed on 14-day Stay-Home Notice (SHN) upon arrival in Singapore, and were serving their SHN at dedicated facilities.

- Cases in the community: **4**
  - 3 Singaporeans/ Permanent Residents, 1 Work Permit holder

  Overall, the number of new cases in the community has decreased, from an average of 3 cases per day in the week before, to an average of 2 per day in the past week. The number of unlinked cases in the community has remained stable at an average of 1 case per day in the past 14 days.

- Cases residing in dormitories: **293**

  MOH will continue to aggressively test the final batch of dormitory residents, and remain on track to clear all the dormitories by 7 August, except for a few standalone blocks in the dormitories that serve as quarantine facilities. Depending on the prevalence of COVID-19 at the remaining dormitories whose residents are being tested, the daily case counts may vary. The number is expected to remain volatile in the coming days, before tapering down thereafter as the Inter-agency Taskforce completes the dormitory clearance.

Of the new cases, 98% are linked to known clusters, while the rest are pending contact tracing.

263 more cases of COVID-19 infection have been discharged from hospitals or community isolation facilities. In all, 48,031 have fully recovered from the infection and have been discharged from hospitals or community care facilities.

Most of the 112 confirmed cases who are still in hospital are stable or improving. 0 is in critical condition in the intensive care unit.

6,385 cases who have mild symptoms, or are clinically well but still test positive for COVID-19 are isolated and cared for at community facilities.

27 have passed away from complications due to COVID-19 infection.
