Listen

As of 10 August 2020, 12pm, the Ministry of Health (MOH) has confirmed 188 new cases of COVID-19 infection in Singapore.

Among the cases:

- Imported cases: **12**
    - 4 Singaporeans/Permanent Residents, 1 Work Pass holder, 4 Work Permit holders, 3 Dependant's Pass holders

    Amongst the 12 imported cases, 4 are Singaporeans/ Permanent Residents who returned to Singapore on 29 July from India, Bangladesh and the Philippines. Another 5 are Work Pass/ Work Permit holders who are currently employed in Singapore. They arrived in Singapore from the Philippines on 29 July. The remaining 3 are Dependant's Pass holders who arrived from India on 27 July and 28 July.

    All of them had been placed on 14-day Stay-Home Notice (SHN) upon arrival in Singapore, and were serving their SHN at dedicated facilities. They had been tested while serving their SHN.

- Cases in the community: **1**
    - 1 Singaporean

    There is 1 case in the community today who had been identified as a contact of a previously confirmed case, and had been placed on quarantine earlier. He was tested during quarantine to determine his status.

    Overall, the number of new cases in the community has remained stable at an average of 2 cases per day in the past 2 weeks. The number of unlinked cases in the community has also remained stable at an average of 1 case per day in the past 2 weeks.

- Cases residing in dormitories: **175**

    The Inter-agency Taskforce has completed the testing of all workers in the dormitories. There are currently about 23,300 workers who are still serving out their quarantine period. These workers will be tested when their isolation ends, and we expect the case counts to remain high in the coming days, before tapering down thereafter.

Of the new cases, 99% are linked to known clusters, while the rest are pending contact tracing.

694 more cases of COVID-19 infection have been discharged from hospitals or community isolation facilities. In all, 49,609 have fully recovered from the infection and have been discharged from hospitals or community care facilities.

Most of the 112 confirmed cases who are still in hospital are stable or improving. 0 is in critical condition in the intensive care unit.

5,544 cases who have mild symptoms, or are clinically well but still test positive for COVID-19 are isolated and cared for at community facilities.

27 have passed away from complications due to COVID-19 infection.
