

COVID-19: Cases in Singapore

An update of the latest confirmed cases in Singapore

min read | Published on 07 Sep 2020

As of 7 September 2020, 12pm, the Ministry of Health (MOH) has confirmed 22 new cases of COVID-19 infection in Singapore.

Among the cases:

- Imported cases: **3**

- 1 Permanent Resident, 1 Work Permit holder, 1 Dependant's Pass holder

Amongst the 3 imported cases, 1 is a Singapore Permanent Resident who returned to Singapore from India on 26 August. Another case is a Work Permit holder currently employed in Singapore who arrived from the Philippines on 26 August. The remaining case is a Dependant's Pass holder who arrived from India on 26 August. All of them had been placed on 14-day Stay-Home Notice (SHN) upon arrival in Singapore, and had been tested while serving their SHN at dedicated facilities.

- Cases in the community: **1**

- 1 Work Pass holder

There is 1 case in the community today who is currently unlinked. The case was detected as a result of the Rostered Routine Testing of workers in the construction, marine and process sectors who are living outside the dormitories, even though he is asymptomatic.

Overall, the number of new cases in the community has decreased, from an average of 3 cases per day in the week before, to an average of 2 per day in the past week. The number of unlinked cases in the community has increased, from an average of 1 case per day in the week before, to an average of 2 per day in the past week.

- Cases residing in dormitories: **18**

Amongst the 18 cases residing in dormitories, 9 had been identified earlier as contacts of previous cases, and had already been quarantined to prevent further transmission. They were tested during quarantine to determine their status.

The remaining 9 cases were detected through surveillance testing, such as the bi-weekly Rostered Routine Testing of workers living in dormitories.

Of the new cases, 86% are imported or linked to known cases/clusters, while the rest are pending contact tracing.

75 more cases of COVID-19 infection have been discharged from hospitals or community isolation facilities. In all, 56,408 have fully recovered from the infection and have been discharged from hospitals or community care facilities.

Most of the 51 confirmed cases who are still in hospital are stable or improving. None is in the intensive care unit.

558 cases who have mild symptoms, or are clinically well but still test positive for COVID-19 are isolated and cared for at community facilities.

27 have passed away from complications due to COVID-19 infection.
