Listen

As of 15 September 2020, 12pm, the Ministry of Health (MOH) has confirmed 34 new cases of COVID-19 infection in Singapore.

Among the cases:

- Imported cases: **6**

- 2 Permanent Residents, 1 Work Pass holder, 1 Work Permit holder, 2 Dependant's Pass holders

Amongst the 6 imported cases, 2 are Singapore Permanent Residents who returned to Singapore from India on 3 September. Another 2 cases are Work Pass/ Work Permit holders currently employed in Singapore who arrived from India on 3 September. The remaining 2 cases are Dependant's Pass holders who arrived from India on 30 August and 3 September.

All of them had been placed on 14-day Stay-Home Notice (SHN) upon arrival in Singapore, and were tested while serving their SHN at dedicated facilities.

- Cases in the community: **0**

There are no cases in the community today.

Overall, the number of new cases in the community has decreased, from an average of 2 cases per day in the week before, to an average of 1 per day in the past week. The number of unlinked cases in the community has also decreased, from an average of 2 cases per day in the week before, to an average of 1 per day in the past week.

- Cases residing in dormitories: **28**

Amongst the 28 cases residing in dormitories, 13 had been identified earlier as contacts of previous cases, and had already been quarantined to prevent further transmission. They were tested during quarantine to determine their status.

The remaining 15 cases were detected through surveillance testing, such as our bi-weekly Rostered Routine Testing of workers living in dormitories.

Of the new cases, 88% are imported or linked to known cases/ clusters, while the rest are pending contact tracing.

82 more cases of COVID-19 infection have been discharged from hospitals or community isolation facilities. In all, 56,884 have

fully recovered from the infection and have been discharged from hospitals or community care facilities.

Most of the 51 confirmed cases who are still in hospital are stable or improving. None is in the intensive care unit.

526 cases who have mild symptoms, or are clinically well but still test positive for COVID-19 are isolated and cared for at community facilities.

27 have passed away from complications due to COVID-19 infection.
