COVID-19: Cases in Singapore

An update of the latest confirmed cases in Singapore

min read | Published on 29 Sep 2020

As of 29 September 2020, 12pm, the Ministry of Health (MOH) has confirmed 27 new cases of COVID-19 infection in Singapore.

Among the cases:

- Imported cases: **9**
  - 1 Singaporean, 5 Permanent Residents, 1 Work Pass holder, 1 Work Permit holder, 1 Dependant's Pass holder

Amongst the 9 imported cases, 1 is a Singaporean and 5 are Singapore Permanent Residents who returned to Singapore from Indonesia on 18 September and India between 16 September and 18 September. Another 2 cases are Work Pass/ Work Permit holders currently employed in Singapore who arrived from Indonesia on 17 September and India on 16 September. The remaining case is a Dependant's Pass holder who arrived from India on 17 September.

All of them had been placed on 14-day Stay-Home Notice (SHN) upon arrival in Singapore, and were tested while serving their SHN at dedicated facilities.

- Cases in the community: **1**
  - 1 Work Permit holder

There is 1 case in the community today who was detected as a result of proactive case finding. The case had been identified as a household contact of 2 confirmed cases.

Overall, the number of new cases in the community has remained stable at an average of fewer than 1 case per day in the past 2 weeks. The number of unlinked cases in the community has also remained stable at an average of fewer than 1 case per day in the past 2 weeks.

- Cases residing in dormitories: **17**

Amongst the 17 cases residing in dormitories, 8 had been identified earlier as contacts of previous cases, and had already been quarantined to prevent further transmission. They were tested during quarantine to determine their status.

The remaining 9 cases were detected through surveillance testing, such as the bi-weekly Rostered Routine Testing of workers living in dormitories.

Of the new cases, 85% are imported or linked to known cases/ clusters, while the rest are pending contact tracing.

73 more cases of COVID-19 infection have been discharged from hospitals or community isolation facilities. In all, 57,466 have fully recovered from the infection and have been discharged from hospitals or community care facilities.

Most of the 32 confirmed cases who are still in hospital are stable or improving. None is in the intensive care unit.

217 cases who have mild symptoms, or are clinically well but still test positive for COVID-19 are isolated and cared for at community facilities.

27 have passed away from complications due to COVID-19 infection.
