Current situation in Switzerland

2.4.2020, 8 am, cases confirmed in Switzerland:

No. of people tested positive (for coronavirus): 18,267

Deaths: 432 people

The figures published here are based on notifications received until early morning. They generally correspond to the date on which the sample was taken by the doctor. The figures contained in the report and in the Excel table may therefore differ from those communicated by the cantons.

The Federal Council's highest priority is to protect the public

People at especially high risk of becoming seriously ill should be better protected from the new coronavirus. We can all help by following the new recommendations and those already in place:

- **Keep your distance** – for example: Protect elderly people by keeping adequate distance from them; Keep your distance when queuing or waiting in line; Keep your distance at meetings.
- **Wash your hands thoroughly.**
- **Avoid shaking hands.**
- **Cough and sneeze into a tissue or the crook of your arm.**
- **Stay at home if you have a high temperature and a cough.**
- **Only go to the doctor's or emergency department after calling ahead.**

You will find detailed information on the "[Protect yourself and others](#)" site or at www.foph-coronavirus.

Current situation – International

3 April 2020, 7 am:

Cases of new coronavirus infections have been confirmed in more than 200 countries or regions.

	Confirmed cases, more than	Deaths, more than
Italy	115 000	13 500
France	58 000	5 000
Germany	84 500	1 000
China	1 015 000	53 000

	Confirmed cases, more than	Deaths, more than
Globally	1 015 000	53 000

In the majority of cases the illness is mild. However, people aged over 65 and those with an existing pre-illness could become seriously ill.

Affected areas: why is reference no longer being made to ‘affected areas’?

There is now a risk of becoming infected with new coronavirus in almost all parts of the world. As of 9 March we will therefore no longer be referring to ‘affected areas’.
