Figure 1 displays four maps of Switzerland, each representing the spatial distribution of COVID-19 cases by canton for a specific date: March 2020, April 2020, May 2020, and June 2020. The maps show a progression from low case counts in March to high case counts in June, with a significant increase in the number of cantons showing high case counts over time.

The maps are color-coded to represent the number of cases per canton, with a legend indicating the following ranges:
