Figure 1 displays four maps of Switzerland, each showing the spatial distribution of different types of forest fires. The maps are labeled (a) through (d). Each map shows the number of fires per grid cell, with a color scale ranging from 0 (lightest) to 29 (darkest). The maps illustrate the spatial distribution of all fires, fires in agricultural areas, fires in forest areas, and fires in urban areas. The maps show that fires are most frequent in the central and eastern parts of the country, particularly in the agricultural and forest areas.
