Figure 1 displays four maps of Switzerland, each showing the spatial distribution of COVID-19 cases by canton for a specific date: March 2020, April 2020, May 2020, and June 2020. The maps illustrate the progression of the pandemic over time, with a clear increase in the number of cantons reporting high case counts from March to June. The legend indicates the number of cases per canton, with a scale from 0 to 1000. The maps show a significant increase in the number of cantons with high case counts over time, particularly in the central and eastern regions of the country.
