Figure 1 displays four maps of Switzerland, each showing the spatial distribution of COVID-19 cases by canton for a specific date: March 2020, April 2020, May 2020, and June 2020. The maps illustrate the progression of the pandemic over time, with the number of cantons reporting cases increasing significantly from March to June. The maps are color-coded to represent the number of cases, with a legend indicating the scale for each date. The March 2020 map shows very few cases, while the June 2020 map shows a high density of cases across most cantons.
