Figure 1 displays four maps of Switzerland, each representing the spatial distribution of COVID-19 cases by canton for a specific date: March 16, April 16, May 16, and June 16, 2020. The maps show a progression from low case counts in March to high case counts in June, with a significant increase in the number of cantons with cases over time.

The maps are color-coded to represent the number of cases per canton, with a legend indicating the following ranges:

- 0-10
