Coronavirus numbers in London

In the 24-hour period ending 5pm Thursday 23 April, it was announced that a further **126** people who tested positive for COVID-19 were confirmed to have died in hospitals in the Greater London area.

This brought the total number of reported deaths in London hospitals of patients who tested positive for COVID-19 to **4,426**.
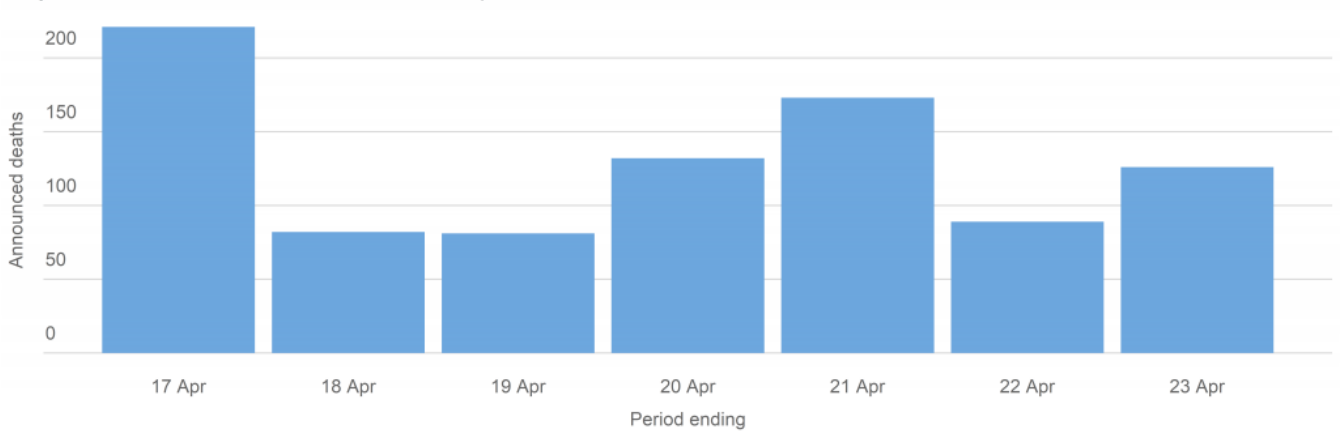

In the week ending 10 April, 84% of deaths from COVID-19 took place in a hospital, 16% took place in homes, care homes and hospices.

These data are published by NHS England and updated daily with the deaths from the most recently completed reporting period.

Announced deaths by reporting period ending 5pm

Occurrences and delays in reporting

Confirmation of COVID-19 diagnosis, death notification and reporting in central figures can take up to several days. The totals reported at 5pm on each day will likely not include all deaths that occurred on that day or on recent prior days. Additionally, these figures do not include deaths outside hospital, such as those in care homes.
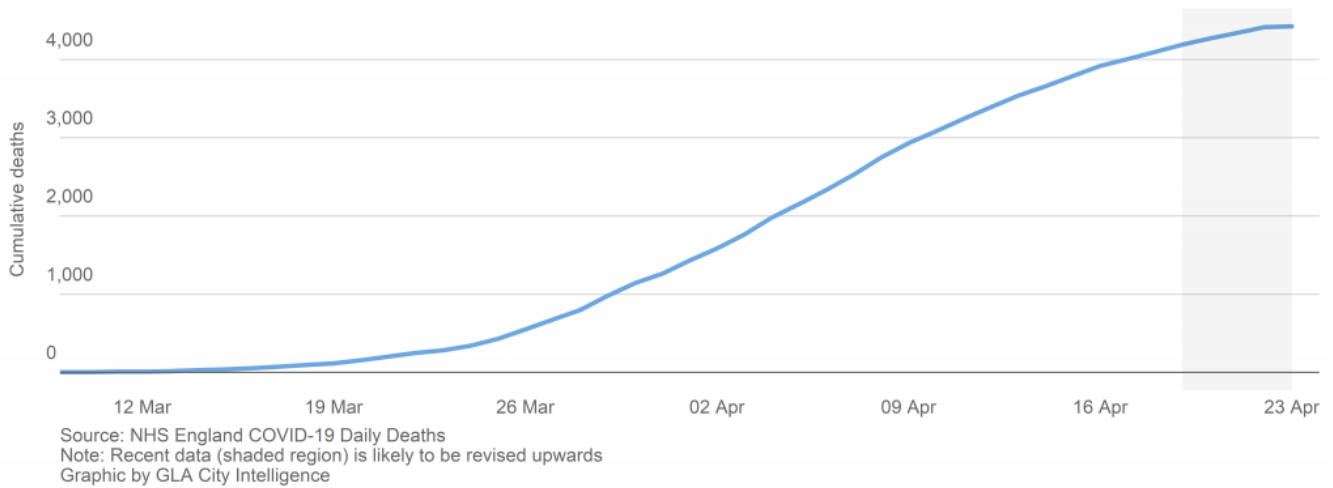

The data published by NHS England includes both date of occurrence and reporting. Deaths by date of occurrence and cumulative deaths are plotted below. Due to the delay in reporting, recent data is expected to be revised upwards in coming days.

Deaths by date of occurrence
