

Everyone in Northern Ireland must do what they can to stop coronavirus spreading.

- Only go outside for food, health reasons or work (but only if you cannot work from home), or one form of exercise a day (a run, walk or cycle, alone or with members of your household)
- If you go out, stay 2 metres (6ft) away from other people at all times
- · Wash your hands as soon as you get home
- Do not meet others, even friends or family.
- You can spread the virus even if you don't have symptoms.

What is the situation in Northern Ireland?

15 April 2020

The Public Health Agency Health Protection surveillance team has established surveillance systems which are used to monitor COVID-19 activity in Northern Ireland. The systems allow us to monitor trends, inform public health measures to reduce COVID-19 transmission, and to measure the impact of public health measures to reduce COVID-19 transmission in both hospital and community settings.

As of 15 April at 11:30am testing has resulted in 121 new positive cases, bringing the total number of confirmed cases in Northern Ireland to 2,088.

To date, 140 people who tested positive have sadly died.

The Public Health Agency COVID-19 advice page can be found here. Surveillance reports can be found here.

Information sources

As this situation is rapidly changing the most up-to-date guidance can be found on the Public Health England website: www.gov.uk/government/collections/coronavirus-covid-19-list-of-guidance

Advice for medical professionals can be found at: www.gov.uk/government/collections/wuhan-novel-coronavirus

For information on guidance for healthcare professionals on COVID-19 infection in pregnancy see: https://www.rcog.org.uk/en/guidelines-research-services/guidelines/coronavirus-pregnancy/
