PUBLICATION - TRANSPARENCY DATA

Coronavirus (COVID-19): daily data for Scotland

Published: 12 May 2020

Directorate: Chief Medical Officer Directorate Part of: Coronavirus in Scotland, Health and social care

Numbers of reported cases, deaths, patients in hospital and other management information such as number of 111 calls.

Scottish COVID-19 test numbers: 12 May 2020

A total of 75,570 people in Scotland have been tested through NHS labs to date. Of these:

- 61,807 were confirmed negative
- 13,763 were positive
- 1,912 patients who tested positive have died

These figures will be an underestimate. Not everyone with COVID-19 will display symptoms and not all those with symptoms will be tested.

Management information reported by NHS Boards shows:

- 81 patients with confirmed or suspected COVID-19 were in intensive care last night, with 69 of those having tested positive
- there were 1,131 people in Scottish hospitals with confirmed COVID-19 (including those in intensive care), and a further 487 where it was suspected

Health Board		(confirmed)	People in intensive care at midnight (confirmed or suspected)
--------------	--	-------------	---

Ayrshire and Arran	925	39	7
Borders	294	26	*
Dumfries and Galloway	255	*	*
Fife	813	81	*
Forth Valley	856	26	*
Grampian	1102	99	11
Greater Glasgow and Clyde	3510	496	29
Highland	324	6	*
Lanarkshire	1715	114	9
Lothian	2397	208	10
Orkney	7	*	*
Shetland	54	*	*
Tayside	1505	29	*
Eileanan Siar (Western Isles)	6	*	*
Golden Jubilee National Hospital	*	5	*

Note: hospital numbers are by location of hospital, not residence.

* = less than five

Numbers in hospital were previously reported in this table as the total of confirmed and suspected. However from 5 May onwards these are confirmed only. This is due to discontinuity in suspected cases due to increased levels of screening.

Other daily management information

On 11 May there were:

- 2,539 tests carried out by NHS Scotland in hospitals, care homes or the community, making a total of 103,661 COVID-19 tests through NHS labs to date.
- In addition, there were 1,544 drive through and mobile tests carried out by the Regional Testing Centres in Scotland bringing the total to 29.191 tests to date.

- 3,084 calls to 111 and 349 calls to the Coronavirus Helpline. The number of calls to 111 includes all calls, whether or not they relate to COVID-19.
- 1,500 Scottish Ambulance Service (SAS) attendances, of which 295 were for suspected COVID-19. SAS took 198 people to hospital with suspected COVID-19.
- 434 (40%) adult care homes with a current case of suspected COVID-19 as at 10 May. At least one resident in the care home has exhibited symptoms during the last 14 days.
- 613 (57%) adult care homes which have lodged at least one notification for suspected COVID-19 to the Care Inspectorate since the start of the epidemic. 440 of these care homes have reported more than one case of suspected COVID-19.
- 4,643 cumulative cases of suspected COVID-19 in care homes. This is an increase of 140 suspected cases on the
 previous day.
- a total of 5,962 staff, or around 3.6% of the NHS workforce, reporting as absent due to a range of reasons related to COVID-19.
- 3,167 inpatients have been discharged from hospital since 5 March, who had been tested positive for COVID-19, up from yesterday's total of 3,122. (Note yesterday's discharge total was revised from 3,114 to 3,122 due to a resubmission from a Board).
- 610 people delayed in hospital as at 11 May. This is 1002 less than the baseline period (04/03 weekly return). An initial
 target to reduce delays by 400 by the end of March and a further target of reducing by a further 500 by the end of April
 have now been met.
- 3,672 staff were reported as absent in adult care homes due to COVID-19, based on returns received from 822 (76%) adult care homes as at 5 May. Staff absent due to COVID-19 represents 8.5% of all adult care home staff (43,403) for whom a return was provided. The absence figures for NHS staff and care home staff are calculated in different ways and caution should be exercised in making comparisons see the <u>data sources and definitions document</u> for full details. This data will be updated weekly.

Deaths of health and social care workers related to COVID-19

As at 5 May, we have been notified by Health Boards or the Care Inspectorate of 7 deaths of healthcare workers and 6 deaths of social care workers, related to COVID-19. We are not able to confirm how many of these staff contracted COVID-19 through their work. We will update this information every Wednesday.

How this data is reported and other data sources

The latest numbers will publish at 2pm each day.

- Trends in daily data
- Data definitions and sources
- Process for reporting COVID-19 deaths

COVID-19 deaths

A weekly report on COVID-19 related deaths (including those where COVID-19 is suspected) is available from National Records of Scotland (NRS).

This report provides a breakdown of deaths by age, sex, setting (hospital, care home or home) and area (NHS Board area and Local Authority). It is updated every Wednesday.

People affected by COVID-19

Public Health Scotland reports on the demographic characteristics (age, sex, deprivation) of people affected by COVID-19. It also looks at some of the wider impacts of the virus on the healthcare system, comparing recent trends in activity with historic norms. It is updated every Wednesday.
