PUBLICATION - TRANSPARENCY DATA

Coronavirus (COVID-19): daily data for Scotland

Published: **18 May 2020** Directorate: <u>Chief Medical Officer Directorate</u> Part of: <u>Coronavirus in Scotland</u>, <u>Health and social care</u>

Numbers of reported cases, deaths, patients in hospital and other management information such as number of 111 calls.

(+)

Scottish COVID-19 test numbers: 18 May 2020

A total of 88,940 people in Scotland have been tested through NHS labs to date. Of these:

- 74,346 were confirmed negative
- 14,594 were positive
- 2,105 patients who tested positive have died

These figures will be an underestimate. Not everyone with COVID-19 will display symptoms and not all those with symptoms will be tested.

Management information reported by NHS Boards shows:

- 63 patients with confirmed or suspected COVID-19 were in intensive care last night, with 46 of those having tested positive
- there were 1,005 people in Scottish hospitals with confirmed COVID-19 (including those in intensive care), and a further 422 where it was suspected

Health Board Total con	firmed cases to date People in hospital (confirmed)	at midnight People in intensive care at midnight (confirmed or suspected)
------------------------	--	---

Ayrshire and Arran	976	32	5
Borders	316	27	*
Dumfries and Galloway	257	*	*
Fife	824	75	*
Forth Valley	880	19	*
Grampian	1200	88	7
Greater Glasgow and Clyde	3742	434	20
Highland	331	6	*
Lanarkshire	1840	103	10
Lothian	2568	192	10
Orkney	7	*	*
Shetland	54	*	*
Tayside	1593	23	*
Eileanan Siar (Western Isles)	6	*	*
Golden Jubilee National Hospital	*	*	*

Note: hospital numbers are by location of hospital, not residence.

* = less than five

Numbers in hospital were previously reported in this table as the total of confirmed and suspected. However from 5 May onwards these are confirmed only. This is due to discontinuity in suspected cases due to increased levels of screening.

Other daily management information

On 17 May there were:

- 2,317 tests carried out by NHS Scotland in hospitals, care homes or the community, making a total of 124,682 COVID-19 tests through NHS labs to date
- in addition, there were 1,158 drive through and mobile tests carried out by the Regional Testing Centres in Scotland bringing the total to 39.035 tests to date

- 6,524 calls to 111 and 111 calls to the Coronavirus Helpline. The number of calls to 111 includes all calls, whether or not they relate to COVID-19
- 1,542 Scottish Ambulance Service (SAS) attendances, of which 276 were for suspected COVID-19. SAS took 186 people to hospital with suspected COVID-19
- 484 (45%) adult care homes with a current case of suspected COVID-19. At least one resident in the care home has exhibited symptoms during the last 14 days
- 632 (58%) adult care homes which have lodged at least one notification for suspected COVID-19 to the Care
 Inspectorate since the start of the epidemic. 463 of these care homes have reported more than one case of suspected
 COVID-19
- 5,126 cumulative cases of suspected COVID-19 in care homes. This is an increase of 30 suspected cases on the previous day
- a total of 6,357 staff, or around 3.8% of the NHS workforce, reporting as absent due to a range of reasons related to COVID-19
- 3,372 inpatients have been discharged from hospital since 5th March, who had been tested positive for COVID-19, up from yesterday's total of 3,354
- 662 people delayed in hospital as at 15 May. This is 950 less than the baseline period (04/03 weekly return). An initial target to reduce delays by 400 by the end of March and a further target of reducing by a further 500 by the end of April have now been met
- 3,121 staff were reported as absent in adult care homes due to COVID-19, based on returns received from 813 (75%) adult care homes as at 12 May. Staff absent due to COVID-19 represents 7.3% of all adult care home staff (42,626) for whom a return was provided. The absence figures for NHS staff and care home staff are calculated in different ways and caution should be exercised in making comparisons see the <u>data sources and definitions document</u> for full details. This data will be updated weekly

Deaths of health and social care workers related to COVID-19

As at 12 May, we have been notified by Health Boards or the Care Inspectorate of 7 deaths of healthcare workers and 8 deaths of social care workers, related to COVID-19. We are not able to confirm how many of these staff contracted COVID-19 through their work. We will update this information every Wednesday.

How this data is reported and other data sources

The latest numbers will publish at 2pm each day.

- Trends in daily data
- Data definitions and sources
- Process for reporting COVID-19 deaths

COVID-19 deaths

A weekly report on COVID-19 related deaths (including those where COVID-19 is suspected) is available from National Records of Scotland (NRS).

This report provides a breakdown of deaths by age, sex, setting (hospital, care home or home) and area (NHS Board area and Local Authority). It is updated every Wednesday. Read more: <u>Deaths involving coronavirus</u> (COVID-19) in Scotland

People affected by COVID-19

Public Health Scotland reports on the demographic characteristics (age, sex, deprivation) of people affected by COVID-19. It also looks at some of the wider impacts of the virus on the healthcare system, comparing recent trends in activity with historic norms. It is updated every Wednesday.
