PUBLICATION - TRANSPARENCY DATA

Coronavirus (COVID-19): daily data for Scotland

Published: **23 Jul 2020**

Directorate: [Chief Medical Officer Directorate](#)

Part of: [Coronavirus in Scotland](#), [Health and social care](#)

This is updated each day to provide the latest available data on COVID-19 in Scotland.

Changes to coronavirus data page

We have been publishing data every day on this webpage since early April. Given where Scotland is now in the pandemic, and the development of new data sources we think it's a good time to refocus this publication. Further information is available in a [new post on the Scottish Government statistics blog](#).

We will also continue to review the provision of key data on COVID-19 into the future.

Scottish numbers: 23 July 2020

- 16 new confirmed cases of COVID-19; this is 0.4% of newly tested individuals

- 0 new reported death(s) of people who have tested positive

- 2 people were in intensive care last night with confirmed COVID-19

- 287 people were in hospital with confirmed COVID-19

- 11,570 new tests for COVID-19 that reported results

- 7 new suspected COVID-19 cases in adult care homes on 22 July

Figures by health board area

- COVID-19 positive cases and patients in hospital are provided in published excel files - [Trends in daily data](#).

- Further information is provided in the [Public Health Scotland dashboard](#) ⬈

Weekly figures

- Week ending **23 July**: 22,969 people tested - 116 positive

- 74,864 tests COVID-19 tests reported week ending **23 July**.

- As at **22 July**: 81 (8%) adult care homes with a current case of suspected COVID-19

- Week ending **16 July**: At least 1,620 individual care home staff, and 417 residents were tested in care homes with a confirmed case of COVID-19. At least 32,829 individual care home staff, and 2,019 residents were tested in care homes with no confirmed cases of COVID-19.[Care home data](#).

- Week ending **15 July** : On average, 1 COVID-19 patient admitted to hospital per day

- Week ending **19 July**: 3 COVID-19 deaths in hospital and 3 deaths in care homes.

- As at **21 July**: 872 people were delayed in hospital.

- Week ending **21 July**: On average, 4,007 NHS staff, or around 2.4% of the NHS workforce, reported absent each day for a range of reasons related to COVID-19.

- Week ending **21 July**: 1,666 staff were reported as absent in adult care homes due to COVID-19, based on returns received from 790 (73%) adult care homes. Staff absent due to COVID-19 represents 4.1% of all adult care home staff (40,858) for whom a return was provided. The absence figures for NHS staff and care home staff are calculated in different ways and caution should be exercised in making comparisons
