PUBLICATION - TRANSPARENCY DATA

Coronavirus (COVID-19): daily data for Scotland

Published: 27 May 2020

Directorate: [Chief Medical Officer Directorate](#) Part of: [Coronavirus in Scotland, Health and social care](#)

This is updated each day to provide the latest available data on COVID-19 in Scotland.

Scottish numbers: 27 May 2020

A total of 106,984 people in Scotland have been tested through NHS labs to date. Of these:

- 91,744 were confirmed negative
- 15,240 were positive

This will be an underestimate of the number of cases. Not everyone with the virus will display symptoms and not all those with symptoms will be tested.

Of the people who have tested positive:

- 3,611 inpatients have been discharged from hospital since 5th March
- 810 were in hospital last night: 28 of whom were in intensive care, with another 10 with suspected COVID-19 in intensive care
- 2,304 have died

Previous data for the figures reported are available at: [Trends in daily data](#)

Data by health board

Health Board	Total confirmed cases to date	People in hospital at midnight (confirmed)	People in intensive care at midnight (confirmed or suspected)
--------------	-------------------------------	--	---

Ayrshire and Arran	1029	16	*
Borders	323	*	*
Dumfries and Galloway	260	*	*
Fife	830	66	*
Forth Valley	919	10	*
Grampian	1256	69	*
Greater Glasgow and Clyde	3916	378	9
Highland	337	9	*
Lanarkshire	1957	78	5
Lothian	2685	164	12
Orkney	7	*	*
Shetland	54	*	*
Tayside	1661	14	*
Eileanan Siar (Western Isles)	6	*	*
Golden Jubilee National Hospital	n/a	*	*

Note: Case numbers are by board of residence; numbers of inpatients are by location of the hospital.

(n/a – number of cases not applicable for Golden Jubilee National Hospital)

* less than five

Numbers in hospital were previously reported in this table as the total of confirmed and suspected. However from 5 May 2020 onwards these are confirmed only. This is due to discontinuity in suspected cases due to increased levels of screening.

Testing

On 26 May there were:

- 3,750 tests carried out by NHS Scotland in hospitals, care homes or the community, making a total of 155,952 COVID-19 tests through NHS labs to date.
- In addition, there were 1,428 drive through and mobile tests carried out by the Regional Testing Centres in Scotland bringing the total to 54,687 tests to date.

As of 25 May, there were:

- At least 36,208 key workers or symptomatic family members had been tested through NHS laboratories. Of those tested approximately 55% were healthcare workers or their families, 36% were social care staff and family members and 7% were from the rest of the public sector, including the prison service and firefighters.

Community Health and Care

On 26 May there were:

- 2,876 calls to 111 and 248 calls to the Coronavirus Helpline. The number of calls to 111 includes all calls, whether or not they relate to COVID-19.
- 1,604 Scottish Ambulance Service (SAS) attendances, of which 241 were for suspected COVID-19. SAS took 149 people to hospital with suspected COVID-19.
- 700 people delayed in hospital. This is 912 less than the baseline period (04/03 weekly return).

Care homes

On 26 May there were:

- 477 (44%) adult care homes with a current case of suspected COVID-19. At least one resident in the care home has exhibited symptoms during the last 14 days.
- 662 (61%) adult care homes which have lodged at least one notification for suspected COVID-19 to the Care Inspectorate since the start of the epidemic. 490 of these care homes have reported more than one case of suspected COVID-19.
- 5,819 cumulative cases of suspected COVID-19 in care homes. This is an increase of 60 suspected cases on the previous day.
- Further information about [COVID-19 cases in care homes, by size, sector and location](#), is available.

Health and social care staff

- 5,873 NHS staff, or around 3.5% of the NHS workforce, reported as absent on 26 May due to a range of reasons related to COVID-19.
- 3,381 staff were reported as absent in adult care homes due to COVID-19, based on returns received from 879 (81%) adult care homes as at 19 May. Staff absent due to COVID-19 represents 7.3% of all adult care home staff (46,272) for whom a return was provided.

The absence figures for NHS staff and care home staff are calculated in different ways and caution should be exercised in making comparisons – see the [data sources and definitions document](#) for full details.

Deaths of health and social care workers related to COVID-19

As at 26 May, we have been notified by Health Boards or the Care Inspectorate of 7 deaths of healthcare workers and 11 deaths of social care workers, related to COVID-19. We are not able to confirm how many of these staff contracted COVID-19 through their work. We update this information every Wednesday.

About this data and other data sources

Previous data is available at: [Trends in daily data](#). Also available as open data at <https://statistics.gov.scot>.

The data reported is management information based on a range of operational systems. While checks are completed before publication to ensure data robustness, due to the speed of reporting these data are not currently subject to the full range of processes and quality assurance that would be required for Official Statistics. For more information about the data please see [Data definitions and sources](#)

data please see [Data definitions and sources](#).

The latest numbers will publish at 2pm each day.

More data on COVID-19 deaths

A weekly report on COVID-19 related deaths (including those where COVID-19 is suspected) is available from National Records of Scotland (NRS). This report provides a breakdown of deaths by age, sex, setting (hospital, care home or home) and area (NHS Board area and Local Authority). It is updated every Wednesday.

More data on people affected by COVID-19

Public Health Scotland reports on the demographic characteristics (age, sex, deprivation) of people affected by COVID-19. It also looks at some of the wider impacts of the virus on the healthcare system, comparing recent trends in activity with historic norms. It is updated every Wednesday.
