PUBLICATION - TRANSPARENCY DATA

Coronavirus (COVID-19): daily data for Scotland

Published: **25 Jun 2020**

Directorate: [Chief Medical Officer Directorate](#)

Part of: [Coronavirus in Scotland, Health and social care](#)

This is updated each day to provide the latest available data on COVID-19 in Scotland.

Scottish numbers: 24 June 2020

We are working hard to update the latest total figures and breakdowns and these will be available here as soon as possible.

- 9 new confirmed cases of COVID-19*
- 4 new reported deaths of people who have tested positive

* as of 15 June this includes confirmed cases where people have been tested through the UK Government (UKG) testing programme as well as those through NHS Scotland labs.

A total of 238,076 people in Scotland have been tested through NHS Scotland labs and UKG to date. Of these:

- 219,885 were confirmed negative
- 18,191 were positive

This will be an underestimate of the number of cases. Not everyone with the virus will display symptoms and not all those with symptoms will be tested.

Of the people who have tested positive:

- 2,480 have died

Scottish number: 25 June 2020

- 4,034 inpatients have been discharged from hospital since 5th March
- 472 were in hospital last night: 7 of whom were in intensive care; plus 11 more people in intensive care with suspected COVID-19

Previous data for the figures reported are available at: [Trends in daily data](#).

Data by health board

Health Board	Total confirmed cases to date	People in hospital at midnight (confirmed)	People in intensive care at midnight (confirmed or suspected)
Ayrshire and Arran		*	*
Borders		*	*
Dumfries and Galloway		*	*
