PUBLICATION - TRANSPARENCY DATA

Coronavirus (COVID-19): daily data for Scotland

Published: **19 Jul 2020**

Directorate: [Chief Medical Officer Directorate](#)

Part of: [Coronavirus in Scotland, Health and social care](#)

This is updated each day to provide the latest available data on COVID-19 in Scotland.

Scottish numbers: 19 July 2020

- 23 new confirmed cases of COVID-19 (please note there are a total of 24 new cases although one previous positive case (NHS Fife) has been de-notified and is now classified as negative, as such there is an increase of 23 positive cases)
- 0 new reported death(s) of people who have tested positive

A total of 321,754 people in Scotland have been tested through NHS Scotland labs and UK Government Labs to date. Of these:

- 303,309 were confirmed negative
- 18,445 were positive

This will be an underestimate of the number of cases. Not everyone with the virus will display symptoms and not all those with symptoms will be tested.

Of the people who have tested positive:

- 4,141 inpatients have been discharged from hospital since 5 March (this is a decrease of one from the previous cumulative total, resulting from ongoing reviews and further analysis of cases by PHS and Health Boards)
- 302 were in hospital last night: 3 of whom were in intensive care; plus 1 more person in intensive care with suspected COVID-19
- 2,491 have died

Previous data for the figures reported are available at: [Trends in daily data](#).

Data by health board

Health Board	Total confirmed cases to date	People in hospital at midnight (confirmed)	People in intensive care at midnight (confirmed or suspected)
Ayrshire and Arran	1,266	*	*
Borders	346	*	*
Dumfries and Galloway	300	*	*
Fife	936	*	*
