Director General Health Services

Update on the outbreak of COVID-19 in Uganda

Kampala- 25th March- 2020-
The Ministry of Health has
received several concerns from
the general public about the

FACTSHEET What you need to know about **CORONAVIRUS (Covid-19 DISEASE)**

What is Coronavirus?
This is a new virus that causes a respiratory illness in people and animals and can spread from person-to-person through sneezing and coughing droplets. This virus has signs and symptoms similar to the common cold but is dangerous and if not reported early and managed by Health Workers it can cause severe illnesses in humans and can lead to death.

Where did Coronavirus come from?
There are ongoing studies on the origins of Coronavirus. However, the current outbreak started in a large animal and seafood market in China, in a city called Wuhan.

How does Coronavirus spread?
Initially, the virus was believed to be spread to humans through contact with infected animals. Currently, transmission is human-to-human. It occurs when an infected person's sneeze or cough droplets come into contact with another person.
