Guidelines for the use of Masks

1. What are the types of masks on the Ugandan market?	<p>There are two types of masks on the Ugandan market namely:</p> <ul style="list-style-type: none"> • Medical • Non-Medical <p>The medical masks include: N95, H95, and surgical masks.</p> <ul style="list-style-type: none"> • The non-medical masks are made out of fabric (cloth) • Medical masks should be reserved for health workers in health facilities and are not available since it is used in a hostile environment. It is highly cost-effective versus infectious organisms, and to reuse safely.
2. How do face masks work?	<ul style="list-style-type: none"> • COVID-19 is spread through sneezing, coughing, talking and breathing. • When an infected person wears a face mask, the mask blocks the air from coming through sneezing, coughing, talking and breathing. • The mask also prevents droplets from an infected person reaching the nose and mouth of the person wearing it.
3. What type of masks should be used by the community?	<ul style="list-style-type: none"> • The community is encouraged to use non-medical masks (masks made out of fabric or paper). • A paper/cloth mask with a filter material (e.g. paper filter) or cotton filter or any material that makes it often used for non-patient (protecting high ground) between the 2 people who interact the mask. The material acts as a filter and can be removed before wearing. The procedure is available and available.
4. How preferable are cloth and other face-masks?	<ul style="list-style-type: none"> • "Wearing a cloth cover mask is considered a 'first' mask. It can be worn over a N95, H95 or an FFP2/FFR3 mask."
5. Who should wear a mask?	<ul style="list-style-type: none"> • All adults • Children aged 6 years and above • People with breathing difficulties should seek advice from medical personnel. • Children aged 2-5 years are very active and cannot take care of their masks and observe hygiene. They should only put on masks under close supervision. • Children below 2 years should not wear a mask as they have a small lung capacity.
