Coronavirus (COVID-19): what you need to do

Stay at home

- · Only go outside for food, health reasons or work (but only if you cannot work from home)
- If you go out, stay 2 metres (6ft) away from other people at all times
- Wash your hands as soon as you get home

Do not meet others, even friends or family.

You can spread the virus even if you don't have symptoms.

Number of cases

As of 9am on 29 March 2020, a total of 127,737 people have been tested, of which 108,215 were confirmed negative and 19,522 were confirmed positive.

As of 5pm on 28 March 2020, 1,228 patients in the UK who tested positive for coronavirus (COVID-19) have died.

The figures for test results and for deaths are compiled from different sources. This is why the figures for deaths are reported from an earlier point in time than the figures for test results.

Cases identified in England

Confirmed cases in each local authority and NHS region are published by Public Health England (PHE).

Risk level

The risk to the UK has been raised to high.

Recent government action

The government published its coronavirus action plan on 3 March.

On 10 February, the Secretary of State for Health and Social Care, Matt Hancock, announced trengthened legal powers to protect public health.

The Health Protection (Coronavirus) Regulations 2020 have been put in place to reduce the risk of further human-to-human transmission in this country by keeping individuals in isolation where public health professionals believe there is a reasonable risk an individual may have the virus.
