Guidance

Number of coronavirus (COVID-19) cases in the UK

The latest number of coronavirus (COVID-19) cases in the UK.

Published 24 January 2020

Last updated 29 June 2020 — see all updates

From:

Department of Health and Social Care (<https://www.gov.uk/government/organisations/department-of-health-and-social-care>) and Public Health England (<https://www.gov.uk/government/organisations/public-health-england>)

Number of cases and deaths

As of 9am on 29 June, there have been 9,290,215 tests, with 93,881 tests on 28 June.

311,965 people have tested positive.

As of 5pm on 28 June, of those tested positive for coronavirus in the UK, across all settings, 43,575 have died.

	Tests	People tested	Positive	Deaths in all settings
Daily	93,881	Unavailable	815	25
Total	9,290,215	Unavailable	311,965	43,575

Breakdown of testing by testing strategy 'pillars'

- Pillar 1: swab testing in Public Health England ([PHE](#)) labs and NHS hospitals for those with a clinical need, and health and care workers
- Pillar 2: swab testing for the wider population, as set out in government guidance
- Pillar 3: serology testing to show if people have antibodies from having had COVID-19
- Pillar 4: serology and swab testing for national surveillance supported by [PHE](#), [ONS](#), Biobank, universities and other partners to learn more about the prevalence and spread of the virus and for other testing research purposes, for example on the accuracy and ease of use of home testing

See the government's national testing strategy (<https://www.gov.uk/government/publications/coronavirus-covid-19-scaling-up-testing-programmes>) for more information on the different pillars.

Read our testing methodology document (<https://www.gov.uk/government/publications/coronavirus-covid-19-testing-data-methodology>) about reporting statistics on testing.

Daily

	Pillar 1	Pillar 2	Pillar 3	Pillar 4	Total
People tested	17,724	Unavailable	-	-	Unavailable
Tests	30,656	49,054	5,928	8,243	93,881
Positive	220	595	-	-	815

Cumulative

	Pillar 1	Pillar 2	Pillar 3	Pillar 4	Total
People tested	1,852,098	Unavailable	-	-	Unavailable
Tests	2,808,681	4,750,954	987,644	742,936	9,290,215
Positive	196,806	115,159	-	-	311,965

Pillar 2 breakdown of test types

	In-person (tests processed)	Delivery (tests sent out)	Total tests
Daily	23,655	25,399	49,054
Cumulative	2,043,866	2,707,088	4,750,954

Pillar 4 breakdown of test types

	Tests processed	Delivery (tests sent out)	Total tests
Daily	3,243	5,000	8,243
Cumulative	184,585	558,351	742,936

29 June notes

To ensure consistent reporting across all pillars we have paused reporting the number of people tested due to an issue with the data for pillar 2. There are a small percentage of cases in pillar 2 where a person has been tested more than once or tested positive for coronavirus more than once. Any incorrect figures identified will be corrected.

Due to a revision of historical data in pillar 1, the cumulative total for positive cases is 1 lower than if you added the daily figure to yesterday's total.

The total number of tests has been revised since yesterday's total after the following changes to the historical data:

- 760 tests added to the pillar 1 cumulative total
- 18 tests removed from the pillar 2 cumulative total
- 460 tests added to pillar 3 cumulative total

The daily tests reported today have been added to this revised total rather than the total reported yesterday, so the cumulative total today is 1,202 higher than if you added the daily tests to yesterday's total.

For pillar 2, the cumulative number of in-person tests today is 287 lower than if you added the daily tests to yesterday's total, and the cumulative number of delivery route tests is 269 higher.

Testing capacity

At 9am on 22 June, testing capacity was 282,498.

	Pillar 1	Pillar 2	Pillar 3	Pillar 4	Total
Lab capacity	66,078	135,000	80,000	1,420	282,498

Coronavirus tests are processed in several separate labs. Projected lab capacity is an estimate of each lab's constrained capacity each day based on the staff, chemical reagents and other resources it has available. These estimates are made locally by the labs themselves.

Further information on the methodology of how capacity is reported is available in the testing methodology document (<https://www.gov.uk/government/publications/coronavirus-covid-19-testing-data-methodology>).

Time series

- See a time series of testing statistics: 29 June 2020 (https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/896265/COVID-19_UK_testing_time_series_29_June.csv) (CSV, 63.6KB)

- See a time series of daily deaths: 29 June 2020 (https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/896264/COVID-19_UK_deaths_time_series_29_June.csv) (CSV, 3.57KB)

Correspondence with the Statistics Regulator about testing data

The Chair of the Office for Statistics Regulation wrote to us about presentation of statistics about testing.

Read the letter from the regulator (<https://www.statisticsauthority.gov.uk/correspondence/sir-david-norgrove-letter-to-matt-hancock-regarding-covid-19-testing/>).

Read our response, published on 27 May (<https://www.gov.uk/government/publications/covid-19-testing-data-letter-to-the-office-for-statistics-regulation>).

General notes

Data on UK tests, positive cases and deaths is updated on this page daily at 2pm or shortly after. The figures for test results and for deaths are compiled from different sources. This is why the figures for deaths are reported from an earlier point in time than the figures for test results.

Daily totals reflect actual counts reported for the previous day. Each day there may be corrections to previously reported figures. This means that previously published daily counts will not necessarily sum to the latest cumulative figure. It also means that today's cumulative count may not match the previous day's cumulative count plus today's daily count.

Notes on deaths figures

From 29 April, figures for deaths include all cases where there is a positive confirmed test for coronavirus. The figures include deaths with lab-confirmed COVID-19 in all settings, not just those in hospital, and this provides us with a single figure on an equivalent basis for the whole of the UK.

These UK figures are compiled from validated data provided by each of the four nations of the UK. Figures from Health Protection Scotland, Public Health Wales and the Public Health Agency (Northern Ireland) have always included tested cases outside hospital. Figures for England from 29 April onwards are provided by Public Health England and draw together several different data sources, including data from NHS England and Improvement, to produce this broader measure.

This approach allows us to compile deaths data on a daily basis using up-to-date figures across all settings. The data includes deaths with lab-confirmed COVID-19 reported as at 5pm the previous day. The amount of time between occurrence of death and reporting in these figures may vary slightly and in some cases could be a few days, so figures at 5pm may not include all deaths for that day.

The [PHE](#) method draws on data from 3 data sources and individual records of deaths are included in the figures as soon as they are available in any of these 3 sources.

As announced previously, from 1 June we have stopped publishing a separate count of deaths in hospital as our daily count now provides a count of deaths in all settings. Figures for deaths in hospital in England continue to be published by NHS England (<https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-daily-deaths/>).

In addition to these figures, the Office for National Statistics ([ONS](#)) publishes weekly counts of deaths in which COVID-19 was mentioned on the death certificate. This publication is issued every Tuesday, starting on 31 March 2020. The [ONS](#) series includes cases in all settings, and also includes some cases where COVID-19 is suspected but no test has taken place. [ONS](#) detailed data covers England and Wales only, but from 28 April their publication includes a headline summary of registered deaths in the whole of the UK. Their report each Tuesday covers deaths registered up to 11 days before publication.

Joint [DHSC](#) and [ONS](#) transparency statement about COVID deaths figures (<https://www.ons.gov.uk/news/statementsandletters/thedifferentusesoffiguresondeathsfromcovid19publishedbydhscandtheons>)

Material published by [PHE](#)

[PHE](#) updates a daily dashboard (<https://coronavirus.data.gov.uk/>) to show trends in UK data on positive tests and deaths and to provide confirmed cases in each local authority and NHS region in England.
