The table also presents a "mutally secularly, programm wave of coverage for such program, when individual are only included in one group according to their highest level in its fram provide program for "long and in mutal" individual is flay and and in a higher provide group, of the inscense, program for table to tablest, group according the table tablest will be number than these in the provide tablest individual is to be long to more than one horing group in WS will not appear in more than one line in the tables. The group is table figure for occid are waves it likely to understand as a characterized in the tablest in the table. The group is tablest to be complete.

Data are provisional and undergoing continuous cleansing, this will result in fluctuations in group sizes and vaccination totals on a daily basis. The sum of the individual rows will not be the same as the national total for vaccinations given, due to suppression of data for a small number of groups where the denominator size is small.

Weekly summary

The below weekly summary shows total doses of Coronavirus vaccine administered by health board, and is updated every Thursday.

As at the week ending 04 April 2021, a total of **1,959,684** doses of COVID-19 vaccine were given in Wales and recorded in the COVID-19 Welsh Immunisation System.

Of the 1,959,684 doses given nationally, 1,491,016 were first doses and 468,668 were second doses

Data entry at time of reporting will be incomplete and the number of people actually vaccinated will be higher. The figures below represent a weekly snapshot in activity recorded electronically. Ongoing data entry for vaccinations already given will feed through into future weekly updates.
