The stable above presents a "mutually seclusive", programme view of coverage for each group, where inclinication are only included in one group according to their infligent level in face of a proper forming part of mutual multi-necked inclinication in their according religion forms of their according religion forms to the contract of their according religion forms of of their according religion for their according religion forms of their according religion for their according religion forms of their according religion forms of their according religion for their according religion for their according religion for their according religion for their according religion forms of their according religion for their according religion forms of their according religion for their according religion for their according religion forms of their according religion for their according re

Data are provisional and undergoing continuous cleansing, this will result in fluctuations in group sizes and vaccination totals on a daily basis. The sum of the individual rows will not be the same as the national total for vaccinations given, due to suppression of data for a small number of groups where the denominator size is small.

Weekly summary

As at the week ending 25 April 2021, a total of 2.470,760 doses of COVID-19 vaccine were given in Wales and recorded in the COVID-19 Welsh Immunisation System.

Of the 2,470,760 doses given nationally, 1,777,725 were first doses and 693,035 were second doses

Data entry at time of reporting will be incomplete and the number of people actually vaccinated will be higher. The figures below represent a weekly snapshot in activity recorded electronically. Ongoing data entry for vaccinations already given will feed through into future weekly updates.
