

Daily summary

Individuals who have received a first dose of COVID-19 vaccine* 2,183,455
Individuals who have received a two dose course of COVID-19 vaccine* 1,249,268

*These figures are a daily canulative snapshot of vaccinations given and recorded electronically as at 22:00 yesterday. Data entry will be incomplete at time of this daily report and the number of people vaccinated will be higher than these totals. One-ping data entry will feed through into future updates. The data in this table are deduplicated so that people should not be toobalecounted, even they appear in multiple primity groups.

Uptake by priority group and age, counting individuals in all groups in which they belong In this table groups are not mutually exclusive, so individuals appear in every group that describes them, and can be counted in more than one group. Th

		Received 1st dose (n)	Received 2nd dose (n)	1st dose uptake (%)	2nd dose uptake (%)
Group	Group size (n)				
Care home worker	38,108	35,002	31,906	91.8%	83.7%
80 years and older	172,436	165,120	160,012	95.8%	92.8%
Health care worker	142,698	136,156	126,138	95.4%	88.4%
Social care worker		45,471	41,960		
Aged 75-79 years	132,594	128,001	125,003	96.5%	94.3%
Aged 70-74 years	183,232	175,605	172,121	95.8%	93.9%
Clinically extremely vulnerable aged 16-69 years	81,255	76,165	71,659	93.7%	88.2%
Aged 65-69 years	180,295	170,169	162,849	94.4%	90.3%
Clinical risk groups aged 16-64 years	354,920	310,377	217,637	87.4%	61.3%
Aged 60-64 years	205,812	189,349	161,256	92.0%	78.4%
Aged 55-59 years	234,011	210,174	120,595	89.8%	51.5%
Aged 50-54 years	228,314	200,531	90,226	87.8%	39.5%
Aged 40-49 years	393,609	322,555	102,360	81.9%	26.0%
Aged 30-39 years	423,405	299,618	76,397	70.8%	18.0%
Aged 18-29 years	473,493	287.381	60.143	60.7%	12.7%

The table does presents a public health measure of overage for each load priority group, where the 'wardined out of all those with that specific risks is calculated. The number entered in the 'risk' priority group and the 'state's and the 'state's priority group and 'state's and 'states's and

Uptake by priority group and age, counting individuals once only in their highest priority group In this table groups are mutually exclusive, so individuals are counted in one group only, which is their highest priority group. This is a "programme" view, showing actual group

Priority Group	Group size (n)	Received 1st dose (n)	Received 2nd dose (n)	1st dose uptake (%)	2nd dose uptake (%)
Care home residents	14,930	14,628	13,894	98.0%	93.1%
Care home workers	38,108	35,002	31,906	91.8%	83.7%
80 years and older	161,723	154,631	149,969	95.6%	92.7%
Health care workers	142,698	136,156	126,138	95.4%	88.4%
Social care workers	46,602	45,471	41,960	97.6%	90.0%
Aged 75-79 years	130,310	125,764	122,861	96.5%	94.3%
Aged 70-74 years	180,367	172,797	169,402	95.8%	93.9%
Clinically extremely vulnerable aged 16-69 years	79,328	74,211	69,320	93.5%	87.4%
Aged 65-69 years	155,834	146,304	139,708	93.9%	89.7%
Clinical risk groups aged 16-64 years	354,920	310,377	217,637	87.4%	61.3%
Aged 60-64 years	107,824	96,270	78,892	89.3%	73.2%
Aged 55-59 years	131,611	113,644	37,766	86.3%	28.7%
Aged 50-54 years	139,505	117,722	21,160	84.4%	15.2%
Aged 40-49 years	260,478	201,420	7,865	77.3%	3.0%
Aged 30-39 years	310,787	202,535	5,202	65.2%	1.7%
Aged 18-29 years	382,316	210,653	4,642	55.1%	1.2%
Aged under 18 years		2,129	126

The table also presents a "mutually exclusiv", programma-view of coverage for each propus, when individual is an only included in our popula according to their highest level of interf. For any profit or popular for mutual individual and they paralise in higher profits of grave. This means, poing from table to be to testing, organ paralities will be number than those in the protocot table. Individual as the belongs to more than one Profits grave. While a second parality of the data is likely to addition the table. The grave para is they are constant and accounts table. Individual as the belongs to more than one Profits grave. While a second parality that data is likely to additionate the additional tables. The grave parality and the second parality of the second table. The grave parality of the data is likely to be complete.

Data are provisional and undergoing continuous cleansing, this will result in fluctuations in group sizes and vaccination totals on a daily basis. The sum of the individual rows will not be the same as the national total for vaccinations given, due to suppression of data for a small number of groups where the denominator size is small.

Weekly summary

The below weekly summary shows total doses of Coronavirus vaccine administered by health board, and is updated every Thursday.

As at the week ending 30 May 2021, a total of 3,261,518 doses of COVID-19 vaccine were given in Wales and recorded in the COVID-19 Welsh Immunisation System.
Of the 3,261,518 doses given nationally, 2,146,126 were first doses and 1,115,392 were second doses.
Data entry at time of reporting will be incomplete and the number of people actually vaccinated will be higher. The figures below represent a weekly snapshot in activity recorded electronically. Ongoing data entry for vaccinations arrandy given will feed through into future weekly updates.
