

Daily summary

Individuals who have received a first dose of COVID-19 vaccine* **2,343,371**

Individuals who have received a two dose course of COVID-19 vaccine* **2,169,358**

*Vaccination data is updated Monday to Friday only. These figures are a daily cumulative snapshot of vaccinations given and recorded electronically as at 22:00 the day before. Data entry will be incomplete at time of this daily report and the number of people vaccinated will be higher than these totals. Ongoing data entry will feed through into future updates. The data in this table are de-duplicated so that people should not be 'double-counted', even if they appear in multiple priority groups.

Uptake by priority group and age, counting individuals in all groups in which they belong

In this table groups are not mutually exclusive, so individuals appear in every group that describes them, and can be counted in more than one group. This is a 'public health' view, showing the total numbers in each priority group.

All age groups are based on age as at 31 March 2021, with the exception of the 16-17 year olds age group which is age as at 31 March 2021 plus those who turned 16 between 1st April 2021 and 1st August 2021. This age cut-off date is an interim method and is subject to change in the future as more individuals become eligible for vaccination.

The table above presents a public health measure of coverage for each listed priority group, where the % vaccinated out of all those with that specific risk is calculated. The number entered in the 'Group size' column refers to all those with the specific risk that places them in their priority group, as recorded in the Welsh Immunisation System (WIS). Individuals who belong to more than one priority group will appear in more than one line in the table. For example, a person age 52 with a condition that places them at moderate risk will be counted in the group for 'moderate risk adults 16 years to under 65 years' and also in the '50-54 years' group. In national and health board totals (in week).

Uptake by priority group and age, counting individuals once only in their highest priority group

In this table groups are mutually exclusive, so individuals are counted in one group only, which is their highest priority group. This is a 'programme' view, showing actual group numbers remaining after excluding those prioritised earlier in the campaign.

Priority Group	Group size (n)	Received 1st dose (n)	Received 2nd dose (n)	1st dose uptake (%)	2nd dose uptake (%)

All age groups are based on age as at 31 March 2021, with the exception of the 16-17 year olds age group which is age as at 31 March 2021 plus those who turned 16 between 1st April 2021 and 1st August 2021. This age cut-off date is an interim method and is subject to change in the future as more individuals become eligible for vaccination.

The table above presents a 'mutually exclusive', programme view of coverage for each group, where individuals are only included in one group according to their highest level of risk. For any priority group the 'Group size' number will not include individuals if they are also in a higher priority group, for this reason, going from top to bottom, group sizes will be smaller than those in the previous table. Individuals who belong to more than one priority group in WIS will not appear in more than one line in the table. The group size figure for social care workers is likely to underestimate the actual number in Wales, as recording of this data is likely to be incomplete.
