

Daily summary

Individuals who have received a first dose of COVID-19 vaccine*

2,370,711

Individuals who have received a two dose course of COVID-19 vaccine*

2.218.515

COND. The baseline seccisation (space relating to first dozes only on our dualboard were incorrect. The correct figures were published at 4-pm on 24'00/2021. This issue effected calculation of first dozes only due to the sociation of 24'00 tonities dozes of COND's Procuration State on the White.

**Contraction of this contraction floring to First Indiany only. These figures was easily consulative sunspited of vaccinations given and recorded electrocically as at 22'00 the day before. Data entry will be incomplete at time of this contraction of the contraction

Uptake by priority group and age, counting individuals in all groups in which they belong

In this table groups are not mutually exclusive, so individuals appear in every group that describes them, and can be counted in more than one group. This is a 'public health

Group	Group size (n)	Received 1st dose (n)	Received 2nd dose (n)	1st dose uptake (%)	2nd dose uptake (%)
Care home residents	13,949	13,685	13,403	98.1%	96.1%
Care home worker	39,133	36,824	35,665	94.1%	91.1%
80 years and older	167,618	161,207	159,508	96.2%	95.2%
Health care worker	143,396	139,083	136,394	97.0%	95.1%
Social care worker		44,885	44,272		
Aged 75-79 years	131,404	127,407	126,447	97.0%	96.2%
Aged 70-74 years	182,295	175,617	174,433	96.3%	95.7%
Clinically extremely vulnerable aged 16-69 years	80,788	76,746	75,286	95.0%	93.2%
Aged 65-69 years	179,812	171,067	169,404	95.1%	94.2%
Clinical risk groups aged 16-64 years	353,468	320,034	308,500	90.5%	87.3%
Aged 60-64 years	205,172	191,878	189,366	93.5%	92.3%
Aged 55-59 years	233,390	214,224	210,636	91.8%	90.3%
Aged 50-54 years	228,347	205,407	200,910	90.0%	88.0%
Aged 40-49 years	394,952	335,650	323,020	85.0%	81.8%
Aged 30-39 years	428,105	334,620	310,562	78.2%	72.5%
Aged 18-29 years	486,721	376,715	335,780	77.4%	69.0%
Aged 16-17 years*	81.614	57,558	11.801	70.5%	14.5%

All age groups are based on age as at 31 March 2021, with the exception of the 16-17 year olds age group which is age as at 31 March 2021 plus those who turned 16 between 1st April 2021 and 1st August 2021. This age cut off date is an interim method and is subject to change in the future as more individuals become eligible for vaccination.

The table above presents a public health measure of coverage for each listed priority group, where the % vaccinated out of all those with that specific risk is calculated. The number entered in the "timop size" outline refers to all those with the specific risk that places them in their priority group, as recorded in the Wildle Immunisation System (WIS), Individuals who belong to more than one priority group, will appear in more than one line in the 154s For example, a person ages 52 with a condition that places them another risk will be constant in the group for moderate risk will be 5 years to under 65 years* and all on the "55 years" group, in national and neath based coals (in week).

Uptake by priority group and age, counting individuals once only in their highest priority group In this table groups are mutually servicely as a individual size counted in one group only, which is their bighest priority group. This is a former

in this capie groups are inactionly exclusive, so interruptions are content in our group only, which is their ingress priority group. This is a programme view, showing access grounders remaining after excluding those prioritised earlier in the campaign.

Priority Group	Group size (n)	Received 1st dose (n)	Received 2nd dose (n)	1st dose uptake (%)	2nd dose uptake (%)
Care home residents	13,949	13,685	13,403	98.1%	96.1%
Care home workers	39,133	36,824	35,665	94.1%	91.1%
80 years and older	157,776	151,537	150,011	96.0%	95.1%
Health care workers	143,396	139,083	136,394	97.0%	95.1%
Social care workers	45,691	44,885	44,272	98.2%	96.9%
Aged 75-79 years	129,209	125,247	124,329	96.9%	96.2%
Aged 70-74 years	179,455	172,827	171,677	96.3%	95.7%
Clinically extremely vulnerable aged 16-69 years	79,121	75,120	73,589	94.9%	93.0%
Aged 65-69 years	155,469	147,233	145,766	94.7%	93.8%
Clinical risk groups aged 16-64 years	353,468	320,034	308,500	90.5%	87.3%
Aged 60-64 years	107,686	98,273	96,919	91.3%	90.0%
Aged 55-59 years	131,404	116,892	114,695	89.0%	87.3%
Aged 50-54 years	139,756	121,557	118,594	87.0%	84.9%
Aged 40-49 years	261,968	212,065	202,835	81.0%	77.4%
Aged 30-39 years	315,437	233,262	213,633	73.9%	67.7%
Aged 18-29 years	395,231	294,899	258,575	74.6%	65.4%
Aged 16-17 years*	76,464	53,110	7,829	69.5%	10.2%
Unknown		1	0		

All age groups are based on age as at 31 March 2021, with the exception of the 16-17 year olds age group which is age as at 31 March 2021 plus those who turned 16 betwee 1st April 2021 and 1st August 2021. This age cut off date is an interim method and is subject to change in the future as more individuals become eligible for vaccination.

The table above presents a "mubully exclusive", programme-view of coverage for each group, where individuals are only included in one group according to their highest level or risk. For any priority group the Group size number will not include individuals if they are also in a higher priority group, for this reason, going from too lobotion, group sizes will be smaller than those in the previous table, individuals who belongs now exceeding group in this will not be paged in more than the privilegy quote in the group are in more than one Privilegy group in this will not begain in more than one Privilegy group in this will not be appear in more than one Privilegy group in this will not be appear in more than one Privilegy appear in more than one limit to table. Weekly summary

The below weekly summary shows total doses of Coronavirus vaccine administered by health board, and is updated every Thursday.

As at the week ending 19 September 2021, a total of 4,583,641 doses of COVID-19 vaccine were given in Wales and recorded in the COVID-19 Welsh Immunisation System.

Of the 4,583,641 doses given nationally, 2,369,085 were first doses and 2,214,556 were second doses.

Data entry at time of reporting will be incomplete and the number of people actually vaccinated will be higher. The figures below represent a weekly snapshot in activity recorded electronically. Ongoing data entry for vaccinations already given will feed through into future weekly updates.

"Unknown" indicates where vaccination records contained incomplete vaccinator or clinic details.

Data presented here give numbers of vaccinations given in Wales and recorded electronically, the actual numbers of vaccinations given will be higher due to ongoing data entry. The figure in the first table above includes 43,213 vaccine doses given to people who received their vaccinations in Wales, but who were resident outside of Wales.

Data source: Welsh Immunisation System (WIS) as at 8am 23/09/2021

Data are subject to revision as WIS data entry is completed and data quality checks are carried out. The content of this dashboard will be reviewed and updated as more information becomes available.

These figures include data for vaccinations given and entered into the WIS system up to the end of Sunday 19/09/2021. These figures will be refreshed on a weekly basis
