Public Health Wales statement on Novel Coronavirus (COVID-19) outbreak

This statement will be updated daily at 2pm

Statement: Sunday 25 October 2020

Dr Eleri Davies, Incident Director for the Novel Coronavirus (COVID-19) outbreak response at Public Health Wales, said:

"Public Health Wales is reminding people that fire-break restrictions came into effect in Wales at 6pm on Friday 23 October, and will last until the start of Monday 9 November.

"We urge the public to stick to the new rules, which are vital to help us regain control of the virus, to protect the NHS, and save lives.

"Although national and local measures have made a difference, further action is now needed. Cases continue to rise in Wales, hospital admissions are increasing, including those into critical care, and sadly so are the numbers of people dying from the virus.

"Under the rules, people must stay at home, except for very limited purposes. They must not visit other households or meet other people they do not live with.

"Certain businesses and venues, including bars, restaurants and most shops must close.

"Secondary schools will provide learning online only for the week after half-term, other than for children in years seven and eight. Primary schools and childcare settings will remain open.

"Face coverings continue to be mandatory in the indoor public spaces that remain open, subject to certain exemptions and exceptions, including on public transport and in taxis.

"More information about the new rules is available at the Welsh Government [website](#).

"During the firebreak it is still important to look after your health, and you can continue to attend appointments and seek help for urgent medical issues.

"Attending a booked NHS flu vaccination appointment and any of Public Health Wales' [screening clinics](#) is a legitimate reason to travel during the firebreak.

"NHS Wales is still here to help you if you need care, and it's important you continue to attend appointments and seek help for urgent medical issues. You can leave your home to access local health services, including your GP surgery, dentist, optometrist or other health service.

"You should phone beforehand and follow any guidance your local surgery, dentist, optometrist or health service has put in place to protect you and staff, including the need to keep 2m away from other patients.

"It's especially important to look after our mental health and wellbeing at this time. You can find sources of advice and guidance on our [website](#) if you need some help or are worried about a loved one.

"If you or a member of your household develop symptoms of the Coronavirus, such as a cough, fever or change in sense of taste or smell, you must self-isolate immediately and book a free Coronavirus test at

www.gov.uk/get-coronavirus-test or by calling 119.

"Helpful advice and support is available via the NHS COVID-19 app. As well as providing alerts if you have been in contact with someone with Coronavirus, the app will also tell you the current risk level in your area.

"Information about the symptoms of Coronavirus is available on the Public Health Wales website, or via the NHS 111 Wales symptom checker.

"For those travelling from overseas, as of 4am on Sunday 25 October, the Canary Islands, Denmark, the Maldives and the Greek Island of Mykonos have been added to the Welsh Government's [list of countries](#) from where you may travel to Wales without the need to self isolate.
