

## DPH COVID-19 Download Data Description

For more information about the data see: [https://ga-covid19.ondemand.sas.com/docs/GA\\_COVID19\\_Dashboard\\_Guide.pdf](https://ga-covid19.ondemand.sas.com/docs/GA_COVID19_Dashboard_Guide.pdf)

File name	File Description
comorbidities	Comorbidities among COVID-19 cases and deaths by race, ethnicity, and sex
comorbidities_sum	Comorbidities among COVID-19 cases and deaths by sex
comorbidity_status	Comorbidity status of COVID-19 cases (yes, no, unknown)
county_cases	COVID-19 cases, deaths, hospitalizations, case rate, death rate, and 14 day case rate by county
deaths	COVID-19 deaths including county, age, race, sex, and comorbidity
demographics_by_age_group	COVID-19 cases, deaths, and hospitalizations by county and age group
demographics_by_race_eth	COVID-19 cases, deaths, and hospitalizations by county, race, and ethnicity
demographics_by_sex	COVID-19 cases, deaths, and hospitalizations by county, and sex
demographics_sum	COVID-19 cases and deaths by race and ethnicity for all cases reported in Georgia regardless of state of residence
epicurve_age_grp_rpt_date	COVID-19 cases and deaths by report date and age group
epicurve_healthcare_workers	COVID-19 cases and deaths, and hospitalizations among healthcare workers by symptom onset date
epicurve_rpt_date	COVID-19 cases and deaths by report date and county
epicurve_symptom_date	COVID-19 cases and deaths by symptom onset date and county
epicurve_age_grp_symptom_date	COVID-19 cases and deaths by symptom onset date, age group, and county
healthcareworker_demographics	COVID-19 cases and deaths, and hospitalizations among healthcare workers by race, ethnicity, and sex
pcr_positives	Total and positive PCR tests, and percent positive PCR tests by date reported to DPH
pcr_positives_col	Total and positive PCR tests, and percent positive PCR tests by date the specimen was collected
summary-totals	COVID-19 cases, hospitalizations, ICU admissions, deaths and PCR tests reported to date.
total_testing	Total and positive PCR and antibody tests reported to date

<b>Variable name</b>	<b>Variable Description</b>
Cases	Confirmed cases, an individual with a positive molecular test, reported through multiple sources including electronic lab reporting (ELR), State Electronic Notifiable Disease Surveillance System (SendSS), faxed case reports and calls from providers to DPH.
Deaths	Confirmed COVID-19 cases that were either reported to DPH as deceased by healthcare providers, medical examiners/coroners, or identified by death certificates with COVID-19 indicated as the cause of death
Hospitalization	Confirmed COVID-19 cases that were hospitalized at the time the case was reported to DPH or when the case was interviewed
Comorbidity	Any comorbid or simultaneously existing diseases or underlying conditions that would make the individual more susceptible to severe outcomes. The data reflects reports to DPH during the initial report or during a case interview
Race	Race of the case
Ethnicity	Ethnicity of the case
Sex	Sex of the case
County_name	Name of the county of residence
County_id	County ID (country, state, county codes)
State FIPS code	State FIPS code
County FIPS code	County FIPS codes
Population	County population based on 2020 Georgia Population Estimates: <a href="https://opb.georgia.gov/census-data/population-projections">https://opb.georgia.gov/census-data/population-projections</a>
Case rate	Cases/100,000 population
Death rate	Deaths/100,000 population
14 day case rate	Cases reported in the previous 14 days/100,000 population
14 day cases	Cases reported in the previous 14 days
Chronic_conditon	The case reports any comorbid or simultaneously existing diseases or underlying conditions that would make the individual more susceptible to severe outcomes
Age	Age of the case (years)
Age group	Age group of the case (years)
Report_date	Date the case was reported to DPH
Cases_cum	Total cases as of the date specified

Death_cum	Total deaths as of the date specified
Moving_avg_cases	Average number of cases in the previous 7 days
Moving_avg_deaths	Average number of deaths in the previous 7 days
Symptom date	Symptom onset date (date of positive specimen collection is used if symptom onset date is missing)
ALL PCR tests performed	PCR tests reported or collected on the specified day
Running total of all PCR tests	Cumulative total PCR tests collected or reported by the specified day
All PCR positive tests	Positive PCR tests reported to DPH through ELR by date reported or collected
Running total of all PCR tests	Cumulative total positive PCR tests reported to DPH through ELR by date reported or collected
7 day percent positive	Percent positive PCR tests during the previous 7 days reported to DPH through ELR by date reported or collected
14 day percent positive	Percent positive PCR tests during the previous 14 days reported to DPH through ELR by date reported or collected
Total_tests	Total number of PCR tests reported to DPH through ELR
ICU	Confirmed COVID-19 cases that were admitted to the ICU at the time the case was reported to DPH or when the case was interviewed
Pcrtest	Total PCR tests reported to DPH through ELR to date
Abtest	Total antibody (serology) tests reported to DPH through ELR to date
Pcrpos	Total positive PCR tests reported to DPH through ELR to date
Abpos	Total positive antibody (serology) tests reported to DPH through ELR to date
