

Georgia Department of Public Health County Level COVID-19 Maps

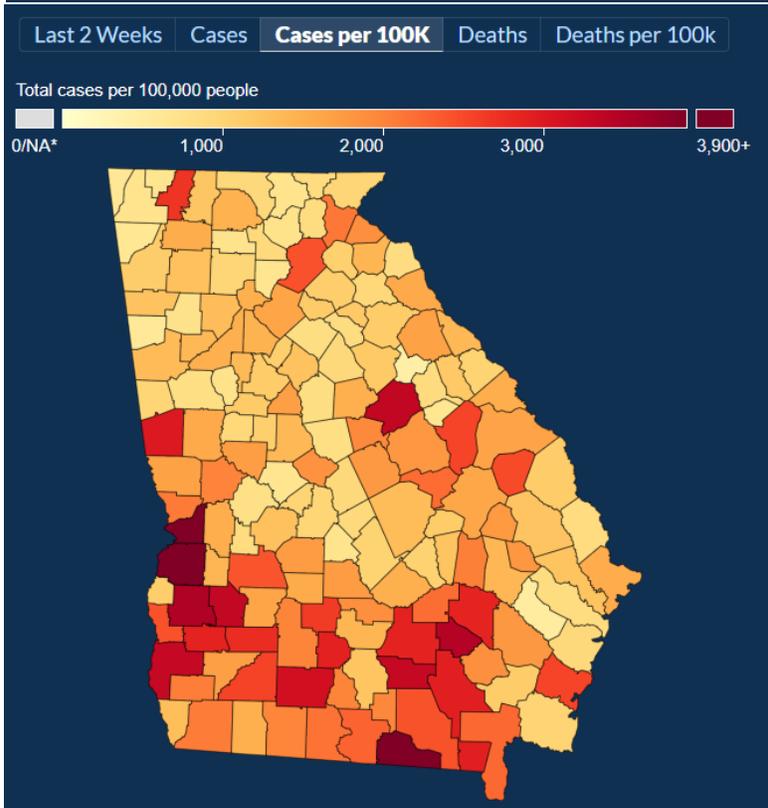

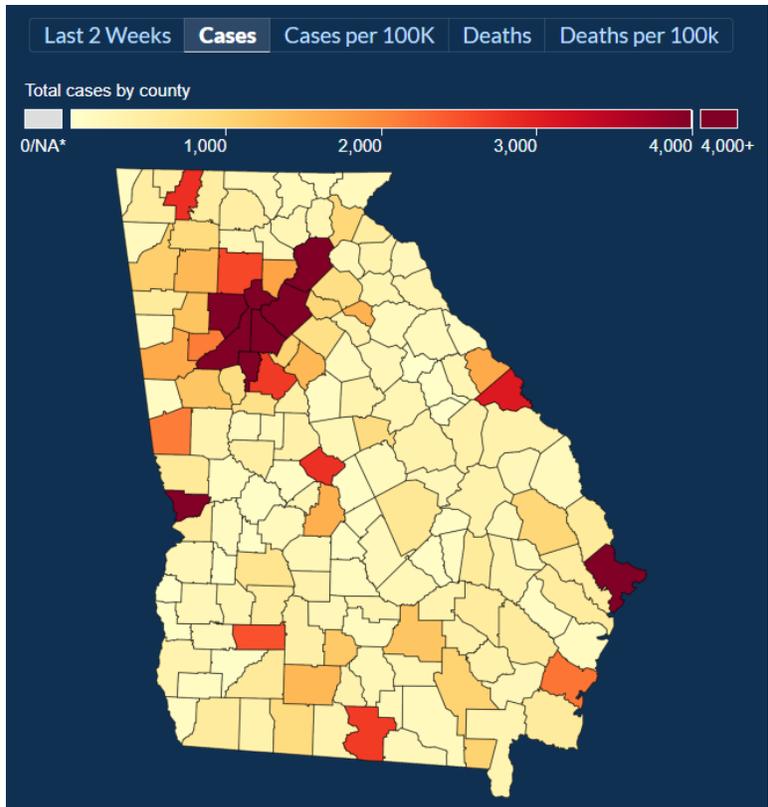

COVID-19 by County: These maps show the number and rate of confirmed COVID-19 cases by county of residence.

The color scale is based on the distribution of county-level case counts or rates, outlier values are removed from the scale calculation. The scale will change every four weeks to accommodate increasing or decreasing case counts and maintain distinctions between counties, and will be calculated based on the current data at the beginning of each 4-week period. County: Reflects the county of residence. This data element is often unreported to DPH, and in such instances, is reported as “Unknown.”

- County: Reflects the county of residence. This data element is often unreported to DPH, and in such instances, is reported as “Unknown.”
- Last 2 Weeks: Reflects the number of cases per 100,000 residents in the county reported during the previous 2 weeks, using 2018 U.S. Census data.
- Cases per 100k: Reflects the number of cases per 100,000 residents in the county, using 2018 U.S. Census data. This is often referenced as the case or incidence rate.
- Deaths per 100k: Indicates the number of confirmed COVID-19 deaths per 100,000 residents in the county. This is often referenced as the death rate.
