Georgia COVID-19 Dashboard – What's New?

New/Updated Site Features

Antigen Tests, Antigen Cases, and Total Cases have been added to various report features:
- Antigen tests have been added to the COVID-19 Testing section.
- Total Cases have been added to the maps. Total cases include confirmed (PCR positive) and antigen positive cases.
- Antigen Cases and Total Cases have been added to the COVID-19 Over Time section.
- See Guide: Understanding the Data for an explanation of these data fields.

Data download file changes:
- Antigen tests, antigen cases, total cases and probable deaths have been added to data download files.
- See the *COVID-19 Download Data Description* file (available in the downloaded zip file) for an explanation of the data elements and what is contained within each file.
