

Guam COVID-19 Situation Report - 185

March 12–November 10, 2020

COVID-19 Cases
Primary Reported Residence

COVID-19 Case Count*	Total	Today	Past 7 days
COVID-19 Cases	5,654	181	840
Confirmed cases	5,552	177	802
Probable cases	102	4	38

*<https://www.cdc.gov/nndss/conditions/coronavirus-disease-2019-covid-19/case-definition/2020/08/05/> - CSTE/CDC COVID-19 case definition (August 5, 2020)

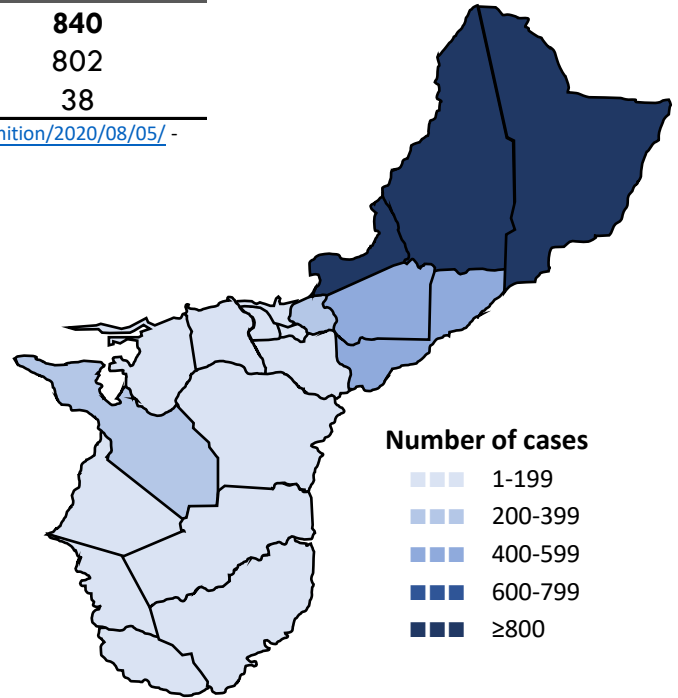

Summary

As of November 10, 2020, there have been 5,654 cases of COVID-19 reported on Guam. One hundred and eighty-one (181) new cases of COVID-19 were reported to DPHSS on November 9: 177 confirmed cases and 4 probable cases. One COVID-19 case was reported deceased on 11/10.

New confirmed cases reported today: 146 cases tested positive at GPLH, 10 tested positive at AMC, eight tested positive at DLS, six tested positive at Guam Medical Care, three tested positive at GMHA, two tested positive at Guam Radiology Consultants, one tested positive at DoD, and one tested positive at GRMC.

New probable cases reported today: four cases tested positive by antigen testing at ExpressCare.

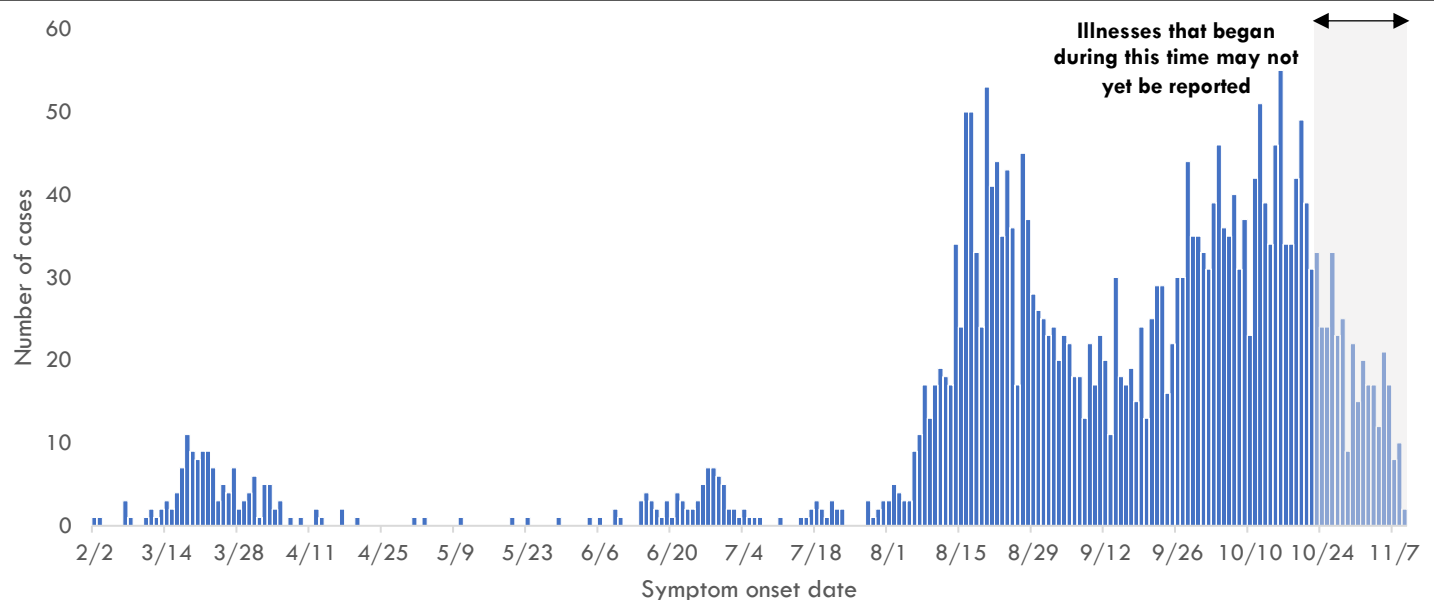

One hundred and forty-eight (148) cases were identified through contact tracing. Two cases reported recent travel (one from the US and one from the Philippines) and were identified in quarantine. Thirteen (13) cases were reported released from isolation. Map legend has been updated.

COVID-19 Testing on Guam**	Total	New tests reported today	Percent positive
COVID-19 Tests	74,067	906	7.6%
Molecular Tests	73,039	852	7.6%
Antigen Tests	818	53	12.3%
Serology Tests	210	1	3.3%

**See COVID-19 Testing Breakdown for all testing definitions. New tests reported reflects the number of tests reported to DPHSS since the previous report and does not necessarily indicate the number of samples run in the same time frame.

COVID-19 cases by symptom onset date, Guam

Guam COVID-19 Situation Report - 185

March 12–November 10, 2020

Case Breakdown

Status	Sex	Current isolation location
COVID-19 deaths	Female	Hospital
Cases in active isolation†	Male	Home
Cases not in isolation‡	Age Group	Isolation facility
Civilian	0-9	Military
Military service member	10-19	Epi-Link to COVID-19 case**
Travel History ¶	20-29	Household contact
US	30-39	Community contact
Dubai	40-49	Workplace contact
Japan	50-59	Healthcare contact
Mexico	60-69	Residence
Philippines	70-79	North
Singapore	80-89	Central
Identified in quarantine	90+	South
		Homeless
		Non-resident

Note: Data for recent cases are preliminary and are updated based on findings from case investigations. Residence under investigation for 259 cases.

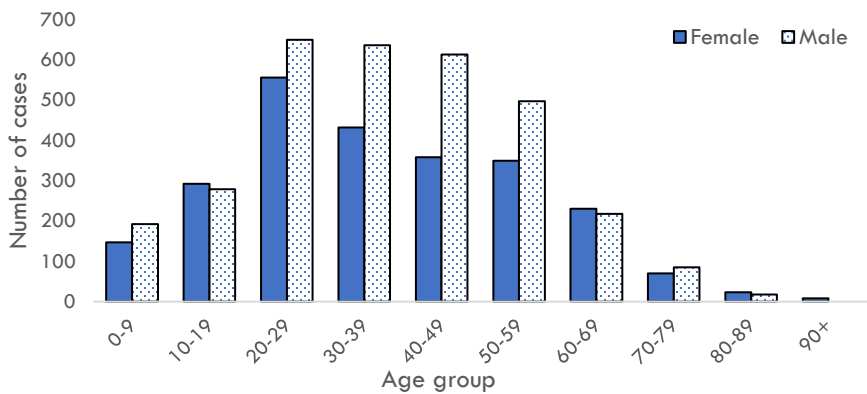

† Cases that test positive for COVID-19 through follow-up molecular testing return to active isolation.

‡ Cases not in isolation indicates the number of COVID-19 cases that are no longer in active isolation based on criteria outlined on page 4. Generally, the criteria assess time since COVID-19 symptom resolution and the date of their most recent positive diagnostic test to qualify for release from isolation.

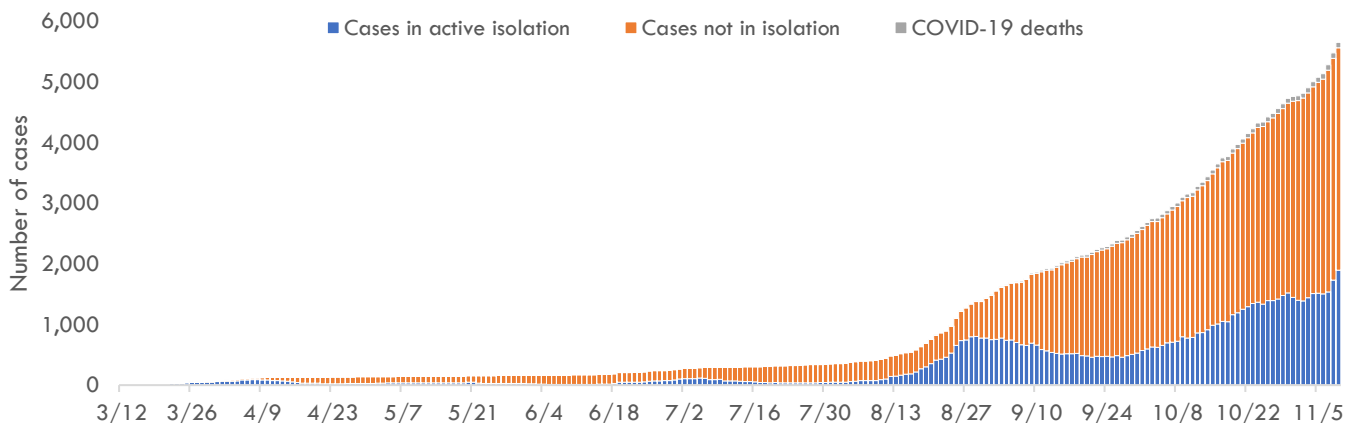

¶ In the 14 days before symptom onset. Some cases traveled to more than one country.

** Some cases have more than one link to other COVID-19 cases.

Total tests is defined as the number of tests with conclusive results not including follow-up testing for known COVID-19 cases. New tests reported today is defined as the total tests reported to DPHSS since the last Situation Report. Percent positive is defined as number of people with a positive test result, out of all people with COVID-19 testing. Total positives is defined as the number of people with a positive test result.

*Two additional confirmed cases tested positive through molecular testing at an out-of-state laboratory.

**Clinics included: American Medical Center, Guam Medical Care, Guam Radiology Consultants, and One Love Pediatrics.

***Clinics included: Central Medical Clinic, ExpressCare, IHP Medical Group and Guam Medical Care.

March 12–November 10, 2020

Pandemic Condition of Readiness Assessment

Triggers for PCOR - Cases, March 12–November 9, 2020

Triggers for PCOR - Cases, Previous 28 days

† Criteria for release from isolation

For persons with mild to moderate illness who are not severely immunocompromised:

For persons having symptoms: At least 3 days have passed since recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath) and any other symptoms attributed to COVID-19 AND at least 10 days have passed since symptoms first appeared—or since recurrent symptoms appeared—AND at least 10 days have passed since the date of their first (or most recent) positive COVID-19 diagnostic test.

For persons without symptoms: At least 10 days have passed since the date of their first (or most recent) positive COVID-19 diagnostic test assuming they have not subsequently developed symptoms since their positive test.

For persons with severe to critical illness or who are severely immunocompromised:

For persons having symptoms: At least 10 days have passed since symptoms first appeared, up to 20 days.

For persons without symptoms: At least 10 days have passed since the date of their first positive COVID-19 diagnostic test, up to 20 days.
