Clusters

The number and categories of clusters are available on our dashboard.

We received lots of feedback, both positive and negative, after releasing the locations of active outbreaks last week. We know people appreciate the transparency and information, and that it allows Kansans to make informed decisions when assessing personal risk.

KDHE staff has taken the feedback we received and is currently assessing ways in which we can report this information in a way that reflects current COVID-19 case increases. As we assess our process, we will not be releasing outbreak names and locations today, but anticipate doing so next Wednesday.
