## Kentucky Coronavirus Monitoring

Current as of March 26, 2021

**Red County Recommendations**  
If your county in the red, please follow the red county recommendations to help limit the spread of COVID-19 in your community.

Red County Recommendations

The 7-Day incidence is calculated by taking the total number of unique cases in each county over the past 7 days, divided by 7 to get a daily average, divided by the U.S. census bureau county population, and multiplied by 100,000 to get the incidence per 100,000 people. The cases counted each day are based on the date an investigation was opened in NEDSS (i.e., National Electronic Disease Surveillance System). Duplicate cases are removed before the calculation, so each positive case is only included once. NOTE: State and local health department data will vary for a variety of reasons including data entry timing, communication processes, and 7-day averaging.

### Interactive Maps

View Confirmed Cases, Cases by County, Cases by Sex, Cases by Age Group, Confirmed Deaths, Deaths by Sex and Deaths by Age Group.

Desktop Dashboard

Mobile Dashboard

In the event of a discrepancy between case confirmations, please note [kycovid19.ky.gov](http://kycovid19.ky.gov) is reporting confirmed cases by the Kentucky Department of Public Health (KDPH). We are working diligently to confirm cases as they are reported to KDPH.
