## COVID-19 Vaccine

The COVID-19 Hotline (800) 722-5725 can answer general COVID-19 vaccine questions.

The Kentucky Department for Public Health (KDPH) supports Governor Andy Beshear’s prioritization of health care as a basic human right and believes every Kentucky family deserves to see a doctor and receive treatment.

Recognizing that COVID-19-related deaths currently rank third among causes of death in Kentucky, KDPH is planning for the equitable distribution of a safe and effective COVID-19 vaccine that will advance Governor Beshear’s healthcare priority. Vaccine distribution details, including the number of doses and allocation plan, are expected to change frequently. **Please visit this page for regular updates.**

# Kentucky Draft COVID-19 Vaccine Distribution Plan

[Read Our Plan](#)[Dr. Stack Press Conference Slides](#)[Vaccine Phases Update](#)

## Phases

| Phase     | Description  |
|-----------|--|
| <b>1A</b> | Long term care facilities, assisted living facilities, health care personnel   |
| <b>1B</b> | Anyone age 70 or older, First responders, Kentucky K-12 school personnel, Kentucky child care workers  |
| <b>1C</b> | Anyone age 60 or older, anyone age 16 or older with medical or behavioral health conditions per the CDC that "are" or "might be" at increased risk of severe COVID-19 disease, all essential workers |
| <b>2</b>  | Anyone age 40 or older   |
| <b>3</b>  | Anyone age 16 or older   |
| <b>4</b>  | Children under the age of 16 if the vaccine is approved for this age group (est. 18% of KY population)   |

# GOAL

Administer **90% of all vaccine** received in state **within 7 days of arrival.**

# PHASE 1 - A, B, C: REFERENCE

## Frontline Essential Workers

- Healthcare Personnel
- First Responders (Firefighters, Police)
- Corrections
- Education (teachers, support staff, daycare)
- Food & Agriculture
- Manufacturing
- U.S. Postal service workers
- Public transit workers
- Grocery store workers

## Other Essential Workers

- Transportation and logistics
- Food Service Shelter & Housing (construction)
- Finance
- IT & Communication
- Energy
- Media
- Legal
- Public Safety (Engineers)
- Water & Wastewater
- Clergy

## Adults of any age with medical or behavioral health conditions per the CDC that “are” or “might be” at increased risk of severe COVID-19 disease:

- Cancer
- Chronic kidney disease
- COPD (chronic obstructive pulmonary disease)
- Down Syndrome
- Heart conditions, such as heart failure, coronary artery disease, or cardiomyopathies
- Immunocompromised state (weakened immune system) from solid organ transplant
- Obesity (body mass index [BMI] of 30 kg/m<sup>2</sup> or higher but less than 40 kg/m<sup>2</sup>)
- Severe Obesity (body mass index [BMI] equal to or greater than 40 kg/m<sup>2</sup>)
- Pregnancy
- Sickle cell disease
- Type 2 diabetes mellitus
- Asthma (moderate-to-severe)
- Cerebrovascular disease (affects blood vessels and blood supply to the brain)
- Cystic fibrosis
- Hypertension of high blood pressure
- Immunocompromised state (weakened immune system) from blood, bone marrow, or organ transplant; HIV; use of corticosteroids; or use of other immune weakening medicines
- Neurologic conditions, such as dementia
- Liver disease
- Overweight (BMI higher than 25 kg/m<sup>2</sup>, but less than 30 kg/m<sup>2</sup>)
- Pulmonary fibrosis (having damaged or scarred lung tissues)
- Thalassemia (a type of blood disorder)
- Type 1 diabetes mellitus
