*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Long-Term Care Staff Surveillance Testing

- On June 30, 2020, the Commonwealth issued an evidence-based surveillance testing policy for long-term care facilities to further support the safe care of vulnerable residents in these settings. This [testing policy](#) has been updated to align with federal policy and as more is learned about COVID-19
- **Nursing facilities and rest homes are required to comply with the surveillance testing regimen, and may be subject to financial sanctions for non-compliance**
- Nursing facilities and rest homes were required to perform baseline testing of at least 90% of staff by July 19, 2020
- Facilities are required to conduct surveillance testing every other week among staff who are fully vaccinated against COVID-19, and weekly among staff who are not fully vaccinated against COVID-19. Fully vaccinated means staff are 14 days or more from receiving the final vaccine in the series.
- This report includes information on the percentage of staff tested at each facility from the latest complete reporting period, and whether a facility was in compliance with state requirements
- The state is supporting surveillance testing costs for nursing facilities and rest homes

Infection Control Surveys

DPH serves as the State Survey Agency (SA) that submits COVID-19 nursing home data on behalf of Massachusetts to the Centers for Medicare & Medicaid Services (CMS). As outlined in the [June 1st CMS memorandum](#) CMS updated its COVID-19 reporting requirements to ensure 100% of Medicare- and Medicaid-certified nursing homes receive on-site review to mitigate the spread of COVID-19. Reporting requirements apply *only* to Medicare- and Medicaid-certified nursing homes, not *all* facilities in the state.

Multiple Surveys Explained: CMS requires states perform COVID-19 survey activities in addition to completing the required Focused Infection Control (FIC) surveys of 100% of Medicare- and Medicaid-certified nursing homes by July 31, 2020. Additionally, CMS requires states perform on-site infection control surveys within three-to-five days of identification of any nursing home with three or more new COVID-19 suspected and confirmed cases since their last National Healthcare Safety Network (NHSN) COVID-19 report or any nursing home in which one confirmed resident case is present in a facility that was previously COVID-free. As facilities may require a number of on-site infection control surveys, we show here the results of the five most recent surveys. Because CMS incorporates the FIC survey tool into recertification surveys, this report likewise includes such surveys.

Deficiencies Explained:

- The **severity** level reflects the impact of the deficiency and is categorized by four levels of harm.
- The **scope** level of a deficiency reflects how many residents were affected by the deficiency.
- For each deficiency, the DPH survey team determines the level of harm (**severity**) to the resident or resident(s) involved and then determines the **scope** of the problem within the nursing home.
- The team assigns an alphabetical Severity and Scope value to the deficiency. In the report below, the alphabetical values are A through L. Values closer to A signify lower scope and severity. Values closer to L (i.e. G or higher) signify higher scope and severity.
- The key at the bottom of each page indicates the level of deficiencies reported, which corresponds to dots of different colors:
Green = Survey with no infection control-related deficiencies; **Yellow** = D-level deficiency; **Pink** = E/F-level deficiency;
Red = G or higher

372 facilities received a combined total of 1,942 Infection Control Surveys between June 1, 2020 and March 19, 2021. Between March 15–19, 2021, 8 new surveys were mailed to facilities. Of those 8 new surveys:

New Surveys With 2+ Deficiencies	0 Facilities
New Surveys With 1 Deficiencies	3 Facilities
New Surveys With 0 Deficiencies	5 Facilities

CMS Infection Control Surveys Conducted at Nursing Homes

The Centers for Medicare and Medicaid Services (CMS) requires infection control surveys to be conducted at all Medicare- and Medicaid-certified nursing homes as defined in the following link:
<https://www.cms.gov/files/document/qso-20-31-all.pdf>. DPH conducts these surveys on behalf of CMS.

Some facilities that meet certain CMS requirements have been surveyed more than once. Follow-up infection control surveys must be conducted within three-to-five days when: (1) one confirmed COVID-19 case is reported in a nursing home that previously did not have any COVID-19 cases, and (2) three or more new suspected and confirmed cases are reported in nursing homes in one week that had previously reported a case.

Reflects surveys processed between June 1, 2020 and March 19, 2021		KEY: Green = Survey with no infection control related deficiencies; Yellow = D-level deficiency; Pink = E/F-level deficiency; Red = G or higher

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence.
