

Weekly COVID-19 Public Health Report

The Weekly COVID-19 Public Health Report includes enhanced, more granular information to be updated on a weekly, or biweekly basis, including town-by-town case and testing information, cases and deaths in Long Term Care Facilities, updates on nursing facility audit results, and more.

Table of Contents

Monitoring COVID – 19 Variants..... 3

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by City/Town..... 4

Map of Rate (per 100,000) of New Confirmed COVID-19 Cases in Past 7 Days by Emergency Medical Services (EMS) Region.....26

MA Contact Tracing: Total Cases and Contacts and Percentage Outreach Completed27

MA Contact Tracing: Case and Contact Outreach Outcomes.....28

Massachusetts Residents Quarantined due to COVID-1929

Massachusetts Residents Isolated due to COVID-19.....30

COVID Cluster by Exposure Setting Type31

COVID Cases and Facility-Reported Deaths in Long Term Care Facilities.....34

Long-Term Care Staff Surveillance Testing43

CMS Infection Control Surveys Conducted at Nursing Homes62

COVID Cases in Assisted Living Residences.....73

PPE Distribution by Recipient Type and Geography78

PLEASE NOTE: Data points listed below, previously included in this report, can now be found in our interactive dashboard:

<https://www.mass.gov/info-details/covid-19-response-reporting>

Relocated data include:

- Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by County
- Map of Average Daily Testing Rate (per 100,000, PCR only) for COVID-19 in MA by City/Town Over Last Two Weeks
- Map of Percent Positivity (PCR only) among Tests Performed for COVID-19 in MA by City/Town Over Last Two Weeks
- Daily and Cumulative COVID-19 Cases Associated with Higher Education Testing
- Daily and Cumulative Total COVID-19 Molecular Tests Associated with Higher Education Testing
- Percent Positive of Molecular Tests in MA Associated with Higher Education Testing and Percent of Confirmed Cases by Date Associated with Higher Education Testing
- Cases and Case Rate by Age Group for Last Two Weeks
- Cases and Case Rate by Sex for Last Two Weeks
- Hospitalizations & Hospitalization Rate by Age Group for Last Two Weeks
- New Daily Confirmed COVID-19 Hospital Admissions
- Deaths and Death Rate by Age Group for Last Two Weeks
- Deaths and Death Rate by County for Last Two Weeks
- Deaths by Sex, Previous Hospitalization, & Underlying Conditions
- Cases, Hospitalizations, & Deaths by Race/Ethnicity

Monitoring COVID - 19 Variants

- The Massachusetts Department of Public Health continues to conduct surveillance for COVID-19 variants of concern including B.1.1.7 (first identified in the UK), B.1.351 (first identified in South Africa) and P.1 (first identified in Brazil).
- Surveillance, consisting of genetic sequencing on portions of COVID-19 positive specimens, has been ongoing in a collaboration between the Massachusetts State Public Health Laboratory with clinical diagnostic laboratories and academic partners, including the CDC.
- Surveillance data so far has identified B.1.1.7 and the B.1.351 cases without any recent travel; it is critical to do everything possible to keep variants of concern from becoming widespread.
- For the latest on variant cases in Massachusetts and the US, visit the [National SARS-CoV-2 Genomic Surveillance Dashboard | CDC](#).

The public health risk reduction measures remain the same. Individuals must continue to wear masks or face coverings while out in public, maintain 6-foot social distancing, stay home when you are sick, and get tested if you have symptoms or are identified as a close contact

Count and Rate of Confirmed COVID-19 Cases and Tests Performed in MA by City/Town, January 1, 2020 – February 16, 2021

City/Town	Total Case Count	Case Count (Last 14 Days)	Average Daily Incidence Rate per 100,000 (Last 14 days) ¹	Relative Change in Case Counts ²	Total Tests	Total Tests (Last 14 days)	Total Positive Tests (Last 14 days)	Percent Positivity (Last 14 days)	Change in Percent Positivity ³
Abington	1366	82	32.1	Lower	22688	1636	101	6.17%	Lower

Data are current as of 11:59pm on 02/16/2021; For populations <50,000, <5 cases are reported as such or suppressed for confidentiality purposes. ¹ For the calculations used to delineate Grey, Green, Yellow, and Red, please see table on page 25. ²Number of new cases occurring over the current two-week period (1/31/2021– 02/13/2021) compared to the previous two-week period (1/24/2021– 02/06/2021). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. ³Change in percent positivity compared to the previous week's (2/11/2021) report. **No Change**= <0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) As of 11/5/2020, the Massachusetts Department of Public Health is using the 2019 population estimates, the most current available data. **Please note:** Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Data are current as of 11:59pm on 02/16/2021; **For populations <50,000**, <5 cases are reported as such or suppressed for confidentiality purposes. ¹ For the calculations used to delineate Grey, Green, Yellow, and Red, please see table on page 25. ²Number of new cases occurring over the current two-week period (1/31/2021– 02/13/2021) compared to the previous two-week period (1/24/2021– 02/06/2021). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. ³Change in percent positivity compared to the previous week's (2/11/2021) report. **No Change**= <0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) As of 11/5/2020, the Massachusetts Department of Public Health is using the 2019 population estimates, the most current available data. **Please note:** Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Data are current as of 11:59pm on 02/16/2021; For populations <50,000, <5 cases are reported as such or suppressed for confidentiality purposes. ¹ For the calculations used to delineate Grey, Green, Yellow, and Red, please see table on page 25. ²Number of new cases occurring over the current two-week period (1/31/2021– 02/13/2021) compared to the previous two-week period (1/24/2021– 02/06/2021). **Higher**=number of new cases in the current two-week period higher than the number of new cases during the last two-week period. **Lower**=number of new cases in the current two-week period lower than number of new cases during the last two-week period. **No change**=number of new cases in current two-week period is equal to the number of new cases during the last two-week period. ³Change in percent positivity compared to the previous week's (2/11/2021) report. **No Change**= <0.10% difference in the percent positivity. DPH calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report, Oct 2016.) As of 11/5/2020, the Massachusetts Department of Public Health is using the 2019 population estimates, the most current available data. **Please note:** Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Massachusetts Department of Public Health COVID-19 Dashboard - Thursday, February 18, 2021

Average Daily Incidence Rate per 100,000 Color Calculations

Group	Population		
	Under 10K	10K-50K	Over 50K
Grey	Less than or equal to 10 total cases	Less than or equal to 10 total cases	Less than or equal to 15 total cases
Green	Less than or equal to 15 total cases	<10 avg cases/100k AND >10 total cases	<10 avg cases/100k AND >15 total cases
Yellow	Less than or equal to 25 total cases	≥10 avg cases/100k OR ≥5% pos rate	≥10 avg cases/100k OR ≥ 4% pos rate
Red	More than 25 total cases	≥10 avg cases/100k AND ≥5% pos rate	≥10 avg cases/100k AND ≥4% pos rate

Rate (per 100,000) of New Confirmed COVID-19 Cases in Past 7 Days by Emergency Medical Services (EMS) Region

7 Day Total of New Cases Through February 7, 2021

EMS Region	New Cases Per 100,000
1	279
2	263
3	286
4	220
5	318

Notes

- (1) Massachusetts is divided into five geographical EMS regions. For more information, please see <https://www.mass.gov/service-details/ems-regions-in-massachusetts>.
- (2) Cases per 100,000 for each EMS region are calculated as the number of new cases within a region divided by that region's population multiplied by 100,000.
- (3) Data source: MAVEN and Umass Donahue Institute Population Estimates.
- (4) Congregate care testing surveillance guidance requires facilities to take different action if their regional transmission is above or below 40 new cases per 100,000 residents.

Massachusetts Department of Public Health COVID-19 Dashboard – Thursday, February 18, 2021

Combined case investigation, contact tracing, and monitoring workforce

Note: The COVID-19 Community Tracing Collaborative (CTC) began operation on April 10, 2020. Data in this dashboard reflect the combined contact tracing conducted by Local Health Departments, Massachusetts Department of Public Health (MDPH) and the CTC since that date. Prior to April 10, 2020, all COVID-19 contact tracing in Massachusetts was conducted by Local Health Departments.

Massachusetts Residents Quarantined due to COVID-19

Data are accurate as of 2/16/2021 at 5p.m.

Massachusetts Residents Subject to COVID-19 Quarantine by Current Status as of February 17, 2021	Number of Residents
Total of Individuals who have Completed Monitoring (no longer in Quarantine)	238,006
Total of Individuals Currently Undergoing Monitoring/Under Quarantine	13,151

Massachusetts Residents Isolated due to COVID-19

Status of all Confirmed COVID-19 Cases as of February 17, 2021

NOTE: Individuals who had a confirmed case of COVID-19 and are no longer in isolation are considered for purposes of this report to be recovered. As part of this definition, DPH is counting people as released from isolation after 21 days of illness or 21 days past the date of their test in all settings including nursing homes and state facilities.

COVID-19 Cluster Categories

Exposure Setting	Includes
24/7 Congregate Settings	Group homes, congregate housing, disabled community housing, halfway houses, sober homes, residential treatment centers, lodging and rooming houses, monasteries/convents/rectories, DYS detention facilities
Child Care	
Colleges and Universities	
Corrections	Jails, prisons, houses of corrections, correctional treatment centers
Hospitals	All hospitals, including inpatient psychiatric, inpatient addiction treatment, chronic disease and rehabilitation
Household	Shared residence – not associated with another cluster
Industrial Settings	Industrial settings including construction and non-food manufacturers, warehouses and distribution centers
K-12 Schools	Boarding schools, public schools, private schools, special education schools
Long Term Care Facilities	
Offices	
Organized Athletics and Camps	Sports teams, tournaments, and clubs; children’s camps
Other	
Other Food Establishments	Food distributors, manufacturers, warehouses, processors, farms, and food pantries
Other Healthcare	Ambulatory mental health services, community health centers, home health, dental, ambulatory care settings, hospice, addiction treatment (non-residential or outpatient), emergency medical services
Other Workplaces	Work-related events, non-EMS first responders
Places of Worship	
Recreation/Cultural	Gyms, fitness centers, swimming pools, beaches, movie theaters, golfing, boating, casinos
Restaurants and Food Courts	
Retail and Services	Grocery stores, hair salons, barbers, other retail stores
Senior Living	Assisted living facilities, retirement communities, senior housing
Shelters	
Social Gatherings	Parties, group gatherings, weddings, funerals, private clubs, yacht clubs
Travel and Lodging	Domestic or international travel, hotels, cruise ships

Active COVID-19 Cluster Explanation

Clusters Within Long-Term Care Facilities

- A confirmed case is defined as a staff or resident with a new positive COVID-19 test result.
- Confirmed cases are reported by each facility in aggregate, at least once a week, and are assigned to the week in which the data are submitted.
- A “new” cluster is defined as two or more confirmed cases in a facility that has not reported a confirmed case in the prior 4 weeks.
- A cluster is deemed closed when a facility has gone two incubation periods (28 days) without reporting a confirmed case among staff or residents.

Household Clusters

- A household “cluster” is defined as two or more confirmed Massachusetts cases, who reside at the same address with COVID-19 infection within 28 days of each other, and who are not associated with another cluster.
- The date assigned to each confirmed case’s event is that of the first positive lab date.
- A cluster is deemed closed once two incubation periods (28 days) have passed from the last confirmed case.

All Other Clusters

- All other “clusters” are defined as two or more confirmed Massachusetts cases with a common exposure.
- The date assigned to each confirmed case’s event is that of the first positive lab date.
- The date assigned to each contact is that of the date they were linked to the cluster.
- A cluster is deemed closed once two incubation periods (28 days) have passed from the last confirmed case.

Travel & Lodging	0	0	0	0	0	0	0	0	0
Total	11,978	31,115	1,098	32,220	10,129	862	44,198	41,244	1,960

New Clusters: Clusters with the first case (indicated by the first positive lab result) identified during the four week period 1/17/2021 – 2/13/2021

Ongoing Clusters: Clusters with the first case identified prior to 1/17 that has not met criteria to be closed. Confirmed cases included in ongoing clusters occurred between 1/17 and 2/13 but are associated with a cluster that began prior to 1/17. Close contacts included in ongoing clusters occurred between 1/17 and 2/13 but are associated with a cluster that began prior to 1/17

Closed Clusters: A cluster is closed after 28 days have passed since the last confirmed case; 48,417 clusters are closed, 255,815 cases are associated with closed clusters

Source of data: Massachusetts Department of Public Health, Bureau of Infectious Disease and Laboratory Sciences. Long Term Care Facility Data from the National Healthcare Safety Network beginning 5/31/2020. All other data from MAVEN and are subject to change. Only clusters consisting of two or more confirmed Massachusetts cases with a common exposure have been included.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. ***Facility is closed. Data will continue to be included for completeness but will not change except for the result of data cleaning.PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System.

Long-Term Care Staff Surveillance Testing

- On June 30, the Commonwealth issued an evidence-based surveillance testing policy for long-term care facilities to further support the safe care of vulnerable residents in these settings. This [testing policy](#) has been updated to align with federal policy and as more is learned about COVID-19
- **Nursing facilities and rest homes are required to comply with the surveillance testing regimen, and may be subject to financial sanctions for non-compliance**
- Nursing facilities and rest homes were required to perform baseline testing of at least 90% of staff by July 19
- Facilities are required to conduct surveillance testing of all staff on a weekly basis
- This report includes information on the percentage of staff tested at each facility from the latest complete testing period, and whether a facility was in compliance with state requirements
- The state is supporting surveillance testing costs for nursing facilities and rest homes

Testing Results (Through 2/11)	Total facilities required to submit testing data	425
	In Compliance <i>(Total facilities attesting to achieving testing threshold)</i>	400
	Not in Compliance <i>(Total facilities not achieving testing threshold)</i>	11
	Not in Compliance Incomplete Reporting <i>(Total facilities that did not submit complete testing data)</i>	14

Infection Control Surveys

DPH serves as the State Survey Agency (SA) that submits COVID-19 nursing home data on behalf of Massachusetts to the Centers for Medicare & Medicaid Services (CMS). As outlined in the [June 1st CMS memorandum](#) CMS updated its COVID-19 reporting requirements to ensure 100% of Medicare- and Medicaid-certified nursing homes receive on-site review to mitigate the spread of COVID-19. Reporting requirements apply *only* to Medicare- and Medicaid-certified nursing homes, not *all* facilities in the state.

Multiple Surveys Explained: CMS requires states perform COVID-19 survey activities in addition to completing the required Focused Infection Control surveys of 100% of Medicare- and Medicaid-certified nursing homes by July 31, 2020. Additionally, CMS requires states perform on-site infection control surveys within three-to-five days of identification of any nursing home with three or more new COVID-19 suspected and confirmed cases since their last National Healthcare Safety Network (NHSN) COVID-19 report or any nursing home in which one confirmed resident case is present in a facility that was previously COVID-free. As facilities may require a number of on-site infection control surveys, we show here the results of the five most recent surveys.

Deficiencies Explained:

- The **severity** level reflects the impact of the deficiency and is categorized by four levels of harm.
- The **scope** level of a deficiency reflects how many residents were affected by the deficiency.
- For each deficiency, the DPH survey team determines the level of harm (**severity**) to the resident or resident(s) involved and then determines the **scope** of the problem within the nursing home.
- The team assigns an alphabetical Severity and Scope value to the deficiency. In the report below, the alphabetical values are A through L. Values closer to A signify lower scope and severity. Values closer to L (i.e. G or higher) signify higher scope and severity.
- The key at the bottom of each page indicates the level of deficiencies reported, which corresponds to dots of different colors:
Green = Survey with no infection control-related deficiencies; **Yellow** = D-level deficiency; **Pink** = E/F-level deficiency;
Red = G or higher

371 facilities received a combined total of 1,722 Infection Control Surveys between June 1, 2020 and January 29, 2021.

Between January 25–29, 2021, 47 new surveys were mailed to facilities. Of those 47 new surveys:

New Surveys With 2+ Deficiencies	2 Facilities
New Surveys With 1 Deficiencies	17 Facilities
New Surveys With 0 Deficiencies	28 Facilities

CMS Infection Control Surveys Conducted at Nursing Homes

The Centers for Medicare and Medicaid Services (CMS) requires infection control surveys to be conducted at all Medicare- and Medicaid-certified nursing homes as defined in the following link:
<https://www.cms.gov/files/document/qso-20-31-all.pdf>. DPH conducts these surveys on behalf of CMS.

Some facilities that meet certain CMS requirements have been surveyed more than once. Follow-up infection control surveys must be conducted within three-to-five days when: (1) one confirmed COVID-19 case is reported in a nursing home that previously did not have any COVID-19 cases, and (2) three or more new suspected and confirmed cases are reported in nursing homes in one week that had previously reported a case.

Reflects surveys processed between June 1, 2020 and January 29, 2021		KEY: Green = Survey with no infection control related deficiencies; Yellow = D-level deficiency; Pink = E/F-level deficiency; Red = G or higher

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence.
