## Monday, July 5 due to the state holiday.

**Note on deaths (07/01/21):** Regular reviews of death certificate data maintained in Vital Records reporting systems are conducted by MDHHS staff two times per week. As a part of this process, records that identify COVID-19 infection as a contributing factor to death are compared against all laboratory confirmed cases of COVID-19 in the Michigan Disease Surveillance System (MDSS). If a death certificate is matched to a confirmed COVID-19 case and that record in the MDSS does not indicate the individual died, the MDSS record is updated to indicate the death and the appropriate local health department is notified. These matched deaths are then included with mortality information posted to the Michigan Coronavirus website. As a result of the most recent assessment, today's data includes **14** additional deaths identified by this methodology. Corrections made to the provisional case data resulted in a net daily count of 10 deaths.

The State of Michigan is working around the clock to test and treat COVID-19 patients. Below is the most recent data nealthcare experts across the state have compiled. It is updated Monday - Friday.
