Updated February 24, 2021

Updated daily at 11 a.m., with data current as of 4 p.m. the previous day.

Data is for cases that were tested and returned positive. All data is preliminary and may change as cases are investigated. Many data points are collected during case interviews. Data presented below is for all cases, regardless of interview status. Data for cases pending interview may be listed as "unknown/missing."

Positive PCR test results are considered confirmed cases. Positive antigen test results are considered probable cases.

All probable cases get the same public health follow up and recommendations as cases confirmed by PCR tests.

Daily Update:

Because all data is preliminary, the change in number of cumulative positive cases and deaths from one day to the next may not equal the newly reported cases or deaths.

Due to delays in deduplication of results data are subject to change.

Total approximate number of people tested (cumulative)	3,430,620
--	-----------

[More about testing data](#)

- Testing numbers show how many total tests have been done for people who live in Minnesota. Some people get tested more than once.
 - Testing data is reported per test to account for changes in testing capacity and for individuals who are tested more than once over the course of the pandemic.
- Tests are reported by date reported to MDH.
 - Due to safety concerns near the State Capitol, the MDH Public Health Lab was closed from 1/16-1/18. COVID-19 specimens were not accepted and no tests were run during this time. Arrangements were made to hold, divert, or pause sample collection. No test results from the MDH Public Health Lab were reported on 1/17-1/18.

- Results from 4/29, 6/3, 8/18, 8/26, 9/1, 9/9, 10/15, and 11/14 included a backlog of tests loaded into our system.
- Additional testing data available in the [COVID-19 Weekly Report](#):
 - Number of Tests and Percent Positive by Week
 - Laboratory Test Rates by County of Residence
 - Cumulative Percent of Tests Positive by County of Residence
 - Weekly Percent of Tests Positive by County of Residence

Minnesota Case Overview

Total positive cases (cumulative)	480,845
Total confirmed cases (PCR positive) (cumulative)	457,870
Total probable cases (Antigen positive) (cumulative)	22,975

Due to the need to confirm reports and reporting delays, current week data may be incomplete.

Total number of health care workers (cumulative)	37,540
--	--------

[More about positive cases](#)

- Positive cases are individual people who live in Minnesota that tested positive for COVID-19. People are only counted as a case once, even if multiple positive tests are recorded for a person.
 - Total case data is represented by the date of initial specimen collection.
- A person with a positive PCR test result following a positive antigen test result would move from being a probable case to a confirmed case.
- A person with a negative PCR test result following a positive antigen test result would still be considered a probable case.
- Additional case overview data available in the [COVID-19 Weekly Report](#):

- COVID-19 Cases by Week, 7-Day Average
- Cumulative Case Rate by County of Residence
- Weekly Case Rate by County of Residence
- Occupational Related Cases: Health Care

Patients no longer needing isolation

Patients no longer needing isolation (cumulative)	467,969
---	---------

[More about patients no longer needing isolation](#)

- Patients no longer needing isolation represents individuals with confirmed or probable COVID-19 who no longer need to self-isolate.
- MDH does not track cases over time to determine whether they have fully recovered.
- Patients no longer needing isolation does not include those who have died.

Deaths

Total deaths (cumulative)	6,443
Deaths from confirmed cases (cumulative)	6,173
Deaths from probable cases (cumulative)	270
Deaths among cases that resided in long-term care or assisted living facilities (cumulative)	4,040

Total non-laboratory-confirmed COVID-19 deaths (death certificate) (cumulative)		68

[More about deaths](#)

- Total deaths with laboratory testing are deaths due to COVID-19 with:
 - A positive PCR test (confirmed case) or antigen test (probable case) for SARS-CoV-2
 - AND
 - COVID-19 is listed on the death certificate
 - OR
 - Clinical history/autopsy findings that provide evidence that the death is related to COVID-19 without an alternative cause (i.e. drowning, homicide, trauma, etc.).
- [CDC: NNDSS Surveillance Case Definitions: Coronavirus Disease 2019 \(COVID-19\)](#)
- Total non-laboratory-confirmed COVID-19 deaths (probable) have COVID-19 listed on the death certificate, but no documented positive laboratory test for SARS-CoV-2. On 10/14, this category name was changed from "probable deaths" to "non-laboratory-confirmed COVID-19 deaths".
- Deaths are represented by the date reported.
 - There was no data reported on 7/4, 11/26, 12/25, and 1/1/21.
- Additional death data available in the [COVID-19 Weekly Report](#):
 - Deaths by County of Residence
 - Deaths by Week, 7-Day Average
 - Age Demographics: Median Age, Age Range
 - Gender Demographics
 - Race and Ethnicity Demographics: Race and Ethnicity for Deaths, Age-Adjusted Rates
 - Likely Exposure

Hospitalizations

Total cases hospitalized (cumulative)	25,579
Total cases hospitalized in ICU (cumulative)	5,284

[More about hospitalizations](#)

- Hospitalization data show how many people required admission to a hospital and ICU. Admissions include all Minnesota cases regardless of location of hospitalization. Cases in residents of other states hospitalized in Minnesota are not included.
 - “Total hospitalizations” and “Cases admitted to a hospital” include both ICU and non-ICU admissions.
 - Admission dates are when the case was first admitted to the hospital. In most cases, the original admission was for COVID.
 - Cases hospitalized before they were diagnosed with COVID also use original admission dates. This is the reason for admission dates before the first case was identified in

Minnesota.

- Additional hospitalization data available in the [COVID-19 Weekly Report](#):
 - Hospitalizations by Week, 7-Day Average
 - ICU Hospitalizations by Week, 7-Day Average
 - Age Demographics: Age Group, Median Age, Age Range
 - Gender Demographics
 - Race and Ethnicity Demographics, Age-Adjusted Rates
 - Likely Exposure
- Information on hospital capacity and occupied beds is available at: [Minnesota's COVID-19 Response and Preparation Capacity](#).

Case Demographics

Age

[Age group data table:](#)
[Including age group of deaths](#)

Age Group	Number of Cases	Number of Deaths

Likely Exposure

[Likely exposure data table](#)

Likely Exposure	Number of Cases
Travel	32,967
Congregate Care Setting (staff, resident, or visitor)	39,042
Corrections (staff, inmate, or visitor)	7,927
Homeless/Shelter (staff or resident)	1,008
Health Care (staff or patient)	14,641
Community: outbreak outside of congregate living or health care	18,677
Community: known contact with confirmed case	99,092
Community: no known contact with confirmed case	107,263
Unknown/missing	160,228

[More about likely exposure](#)

Likely Exposure is defined by a hierarchy of exposure types. The order of likely exposure categories is:

- Community (outbreak): Case was exposed to a known outbreak setting in Minnesota that is not also a congregate living setting (e.g., long-term care, corrections, shelter) or health care setting. This includes restaurant/bars, sports, worksites that are not living settings, etc.
- Travel: Case traveled outside of Minnesota in the 2 weeks before illness.
- Congregate Care Setting: Residents, and staff who are not part of a non-congregate care setting outbreak and did not have an exposure to a positive household member. Congregate care settings include long-term care facilities (LTCF), assisted living facilities, group homes, or residential behavioral health (RBH) facilities.
- Corrections: Inmates who were exposed while incarcerated, and staff of a jail/prison setting who are not part of a non-corrections outbreak and did not have an exposure to a positive household member.
- Homeless/Shelter: Residents/guests, and staff who are not part of a non-shelter outbreak and did not have an exposure to a positive household member.
- Health Care: Patients who were part of nosocomial outbreaks, and staff who are not part of a

non-acute health care setting outbreak and did not have an exposure to a positive household member.

- Community (known contact with confirmed case): Case has a known exposure to a positive case and does not fit into any of the previous categories.
- Community (unknown contact with confirmed case): Case has no known exposure to a positive case and does not fit into any of the previous categories.
- Additional likely exposure data available in the [COVID-19 Weekly Report](#):
 - Likely Exposure: hospitalized cases, hospitalized in ICU, deaths
 - Cases by Likely Exposure and Specimen Collection Date

Not all cases among health care workers have a likely exposure as health care staff.

Residence

Cases by County of Residence

County of residence is confirmed during the case interview. At the time of this posting not all interviews have been completed.

County of residence is confirmed during the case interview. At the time of this posting not all interviews have been completed. The county residence data may not equal the total number of

reported positive cases.

[More about location data](#)

- For deaths by county of residence: The county of residence reported is the county the person lived in at the time of the death. Those living in congregate living settings at the time of death are reported by the location of the congregate living setting.
- Additional residence data available in the [COVID-19 Weekly Report](#):
 - Laboratory Test Rates by County of Residence
 - Cumulative Percent of Tests Positive by County of Residence
 - Weekly Percent of Tests Positive by County of Residence
 - Cumulative Case Rate by County of Residence
 - Weekly Case Rate by County of Residence
 - Downloadable data file: Cases, Deaths, and No Longer Needing Isolation by County of Residence
 - Downloadable data file: Cases by Zip Code of Residence
- We will not release specific locations for any patients being tested in order to protect patient privacy.

Residence Type

[Residence type data table](#)

Wright	The Legacy of St. Michael

Facilities may not have ongoing transmission. Facilities with fewer than 10 residents will not be listed.

Facilities that have not reported a new exposure for a minimum of 28 days will be removed. If a facility identifies a new exposure, they will once again be listed.

- Downloadable data file: [Long-term Care Facilities with Confirmed Cases \(CSV\)](#)

This is a cumulative list of long-term care facilities (nursing facilities and assisted-living type facilities) that have reported a positive PCR test (confirmed case) since March 2020 or antigen test (probable case) for SARS-CoV-2 since September 2020 in a resident, staff person, or visiting service provider. This file is updated weekly on Thursdays.

- This list does not identify the size of the facility — larger settings will likely have higher numbers; facilities of 10 or fewer residents are not included.
- Staff case counts include staff and visiting service providers that tested positive for COVID-19 and worked within the facility while infectious.
- Resident case counts include residents that were admitted to the facility already positive for COVID-19, as well as facility-onset cases. LTC facilities that have opened COVID-19 units and admitted COVID-19 positive residents will naturally experience higher numbers and deaths as they respond to the needs of the community and hospital discharge needs.
- Numbers include confirmed and probable cases and COVID-19 listed on a death certificate or clinical history/autopsy findings that provide evidence that the death is related to COVID-19 without an alternative cause (i.e. drowning, homicide, trauma, etc.).
