

Coronavirus Disease 2019 (COVID-19)

Updated December 23, 2020

Mississippi Coronavirus Hotline (7 days a week, 7 a.m.–7 p.m.): **877-978-6453**
The Hotline will close at **4 p.m.** December 24th, and be closed all day December 25th.

Holiday Guidance

Keep it small, keep it safe: This public health holiday guidance can help individuals and faith institutions reduce the risk of spreading COVID-19 and help protect the lives of others.

- ▶ [Holiday guidance for individuals](#)
- ▶ [Holiday guidance for religious services](#) PDF

Advisory from the State Health Officer on social gatherings: Due to rapidly rising COVID-19 cases, all residents of Mississippi should avoid any social gathering that includes individuals outside of the immediate family or household. MSDH recommends that Mississippians only participate in work, school or other absolutely essential activities, and avoid gatherings such as social events, sporting events, in-person church services, and weddings and funerals unless they involve only close family (preferably outdoors).

Home isolation is mandatory if you have tested positive for COVID-19 by [order of the State Health Officer](#). (If you are awaiting results of routine testing *not* related to exposure, you may [return to work](#) and follow the safety guidance of your employer.)

Quarantine is mandatory for household members of someone who has COVID-19. Home quarantine permits working under certain circumstances.

COVID-19 in Mississippi

New Cases and Deaths as of December 22

NEW CASES

2,634

New COVID-19 positive test results reported to MSDH as of 6 p.m. yesterday.

NEW DEATHS

43

New COVID-19 related deaths reported to MSDH as of 6 p.m. yesterday. Thirty-seven deaths occurred between October 30 and December 22 in the counties below.

| County | Total |
|------------|-------|
| Adams | 1 |
| Clarke | 1 |
| Hancock | 2 |
| Hinds | 5 |
| Itawamba | 1 |
| Jefferson | 1 |
| Lamar | 1 |
| Lauderdale | 3 |
| Leake | 1 |
| Lee | 1 |
| Lowndes | 4 |

| County | Total |
|-------------|-------|
| Marshall | 1 |
| Pearl River | 2 |
| Pontotoc | 1 |
| Rankin | 5 |
| Simpson | 1 |
| Smith | 1 |
| Tate | 1 |
| Union | 3 |
| Walthall | 1 |

6 COVID-19 related deaths occurred between December 4 and December 17, identified from death certificate reports.

| County | Total |
|----------|-------|
| Clarke | 1 |
| Grenada | 1 |
| Hinds | 1 |
| Pontotoc | 1 |
| Rankin | 1 |
| Simpson | 1 |

LTC OUTBREAKS

238

Current outbreaks in long-term care facilities only. (See [LTC facility outbreak definition](#).)

About our case counts: We currently update our case totals each day based on test results from the previous day. Outside laboratories also report positive test results to us, which are included in our totals. Multiple positive tests for the same individual are counted only once. County case numbers and deaths may change as investigation finds new or additional information.

Case Classifications

Mississippi investigates and reports both probable and confirmed cases and deaths according to the [CSTE case definition](#).

| | Confirmed | Probable | Total |
|--------|-----------|----------|----------------|
| Cases | 141,944 | 58,381 | 200,325 |
| Deaths | 3,702 | 831 | 4,533 |

Confirmed cases and deaths are generally determined by positive PCR tests, which detect the presence of ongoing coronavirus infection.

Probable cases are those who test positive by other testing methods such as antibody or antigen, and have recent symptoms consistent with COVID-19, indicating a recent infection.

Probable deaths are those individuals with a designation of COVID-19 as a cause of death on the death certificate, but where no confirmatory testing was performed.

Deaths from COVID-19 and Other Causes

This table of death counts compares COVID-19 deaths in Mississippi by week with deaths from other major causes, including contributing and underlying causes.

▶ [Mississippi Provisional Death Counts by Week](#)

Updated weekly

K-12 School Report

Mississippi K-12 schools make weekly reports of cases among students, teachers and staff, number of outbreaks, and teachers and students under quarantine as a result of COVID-19 exposure. An outbreak in a school setting is defined as 3 or more individuals diagnosed with COVID-19 in the same group within a 14-day period.

Note: These cases have been directly reported to MSDH by each school, and may not yet have appeared in our state and county totals of cases reported by laboratories.

▶ [K-12 reports of COVID-19 school cases, outbreaks and exposure](#)

Updated weekly

Long-Term Care Facility Cases and Outbreaks

Long-term care (LTC) facilities like nursing homes are considered high risk locations because their residents are older or in poor health. A single confirmed COVID-19 infection in an LTC facility resident, or more than one infection in employees or staff in a 14-day period constitutes an outbreak. Residential care facilities also represent group living facilities where COVID-19 can be easily spread. We investigate residents, staff and close contacts of infected individuals for possible exposure.

These outbreak figures are reported directly to MSDH by the facility. Many of the cases and deaths reported by facilities may not yet be included in our totals of lab-reported cases.

▶ [Mississippi COVID-19 cases and deaths in long-term care facilities](#) PDF

Long-term care facilities include nursing homes, personal care homes, assisted living homes, and intermediate care facilities for individuals with intellectual disability (ICF-IID)

▶ [Mississippi COVID-19 cases and deaths in residential care facilities](#) PDF

Residential care facilities include psychiatric or chemical dependency residential treatment centers and long-term acute care facilities.

Ongoing Outbreaks in Nursing Homes

Data such as illness in residents and staff, deaths in residents, as well as a number of other data elements are now publicly available on the website of the Centers for Medicare and Medicaid (CMS). MSDH is providing the following links to view this data, which is reported directly by nursing homes and is updated daily.

Note: Cases and deaths listed on the CMS website may not have appeared yet in our county totals, which are based on reports from testing laboratories.

MIS-C* Cases and Deaths by Age Group through December 20, 2020, Mississippi

● MIS-C Cases ● MIS-C Deaths

Weekly High Case and High Incidence Counties

Tracking counties with recent high numbers of COVID-19 cases, adjusted for population, provides insight on where local outbreaks are most serious, and where protective measures should be increased. For more accurate reporting, these weekly charts include sample collection dates only up to seven days in the past to allow for case investigation and delays in lab test reports.

Cases counts in these charts is based on the date of illness onset. If the date of illness is not known, the date the test sample was taken, or the date of test result reporting is used instead. Counts are adjusted as cases are investigated.

Counties are ranked by highest weekly case counts, and by weekly incidence (cases proportional to population). A separate table ranking all counties is also available. **All tables updated weekly.**

COVID-19 Testing

Statewide Combined Testing as of December 19

COVID-19 testing providers around the state include commercial laboratories as well as hospital labs. Combined with testing done by the MSDH Public Health Laboratory, the figures provide a complete picture of all Mississippi testing. (Updated weekly)

PCR testing detects current, active COVID-19 infection in an individual.

Antibody (serology) testing identifies individuals with past COVID-19 infection based on antibodies they develop one to three weeks after infection.

Antigen testing is another way to identify current COVID-19 infection.

| | Total tests | PCR | Antibody | Antigen |
|-------------------------------|-------------|-----------|----------|---------|
| MSDH Public Health Laboratory | 143,138 | 141,895 | 1,243 | 0 |
| Other testing providers | 1,587,297 | 1,125,707 | 59,634 | 401,956 |

| Total tests for COVID-19 statewide | 1,730,435 | 1,267,602 | 60,877 | 401,956 |
|------------------------------------|------------------|------------------|---------------|----------------|

MSDH Individuals Tested as of December 22

MSDH Public Health Laboratory (MPHL) testing totals as of 3 p.m. These totals are for tests performed at the MPHL only.

- Total individuals tested by the MPHL: **96,270**
- Total positive individuals from MPHL tests: **11,321**

Getting Tested for COVID-19

The MSDH Public Health Laboratory, its partners, and private providers are testing statewide for COVID-19.

Anyone with symptoms of fever, severe cough or severe chest pains – especially those who are older or in poor health – should make arrangements for testing with their doctor or one of the many healthcare providers now performing testing. Always call ahead to the testing provider for instructions on safely being examined before you visit for your test.

Free testing: Free drive-through testing sites are offered at county health departments on a weekly schedule by appointment.
