COVID-19 in Mississippi

New Cases and Deaths as of April 27

NEW CASES

334

New COVID-19 positive test results reported to MSDH as of 3 p.m. yesterday.

TOTAL MISSISSIPPI CASES

311,493

▶ [Totals by county](#)

NEW DEATHS

5

New COVID-19 related deaths reported to MSDH as of 3 p.m. yesterday.

Four deaths occurred between April 23 and April 27 in the counties below:

▶ [County list](#)

One death occurred on February 25, identified from death certificate reports.

▶ [County list](#)

TOTAL MISSISSIPPI DEATHS

7,193

▶ [Totals by county](#)

LTC OUTBREAKS

28

Current outbreaks in long-term care (LTC) facilities only. (See [LTC facility outbreak definition](#).)

▶ [Cases by county](#)

About our case counts: We currently update our case totals each weekday based on test results from the previous day (or weekend). Outside laboratories also report positive test results to us, which are included in our totals. Multiple positive tests for the same individual are counted only once. County case numbers and deaths may change as investigation finds new or additional information.

Case Classifications

Mississippi investigates and reports both probable and confirmed cases and deaths according to the [CSTE case definition](#).

	Confirmed	Probable	Total
Cases	190,428	121,065	311,493
Deaths	4,966	2,227	7,193

Confirmed cases and deaths are generally determined by positive PCR tests, which detect the presence of ongoing coronavirus infection.

Probable cases are those who test positive by other testing methods such as antibody or antigen, and have recent symptoms consistent with COVID-19, indicating a recent infection.

Probable deaths are those individuals with a designation of COVID-19 as a cause of death on the death certificate, but where no confirmatory testing was performed.

COVID-19 Cases and Deaths by Age Group through April 26, 2021*, Mississippi

COVID-19 Pediatric Cases and Deaths by Age Group through April 26, 2021*, Mississippi

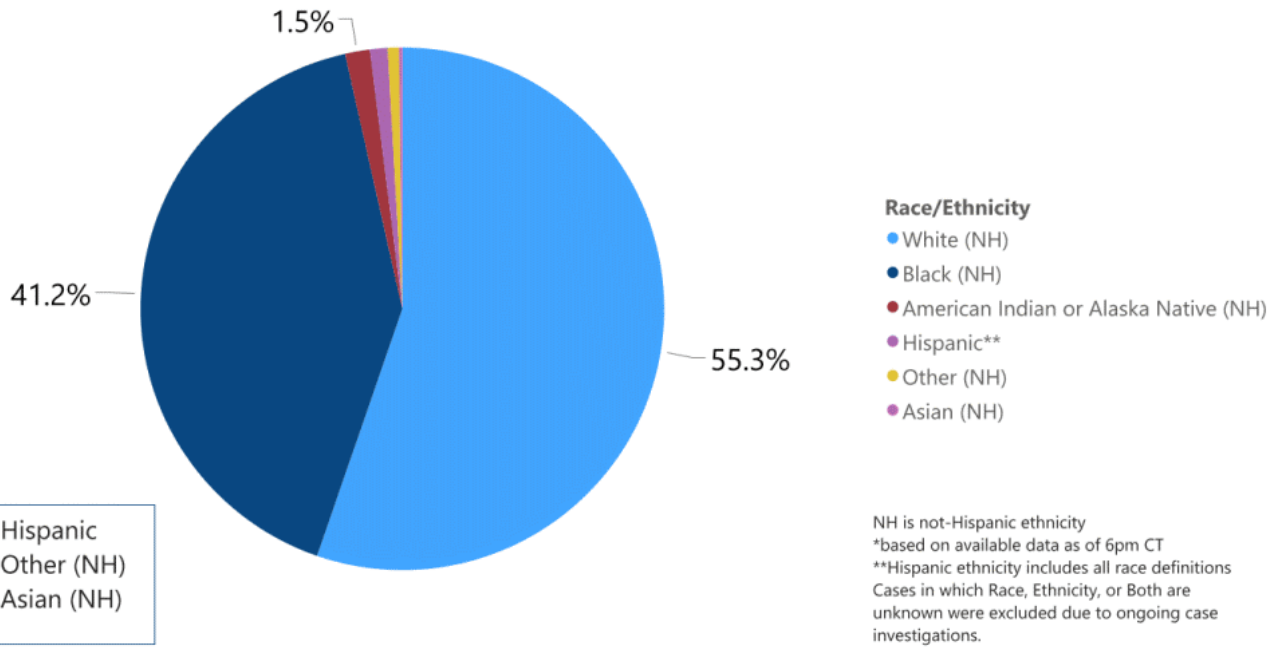

COVID-19 Geriatric Cases and Deaths by Age Group through April 26, 2021*, Mississippi

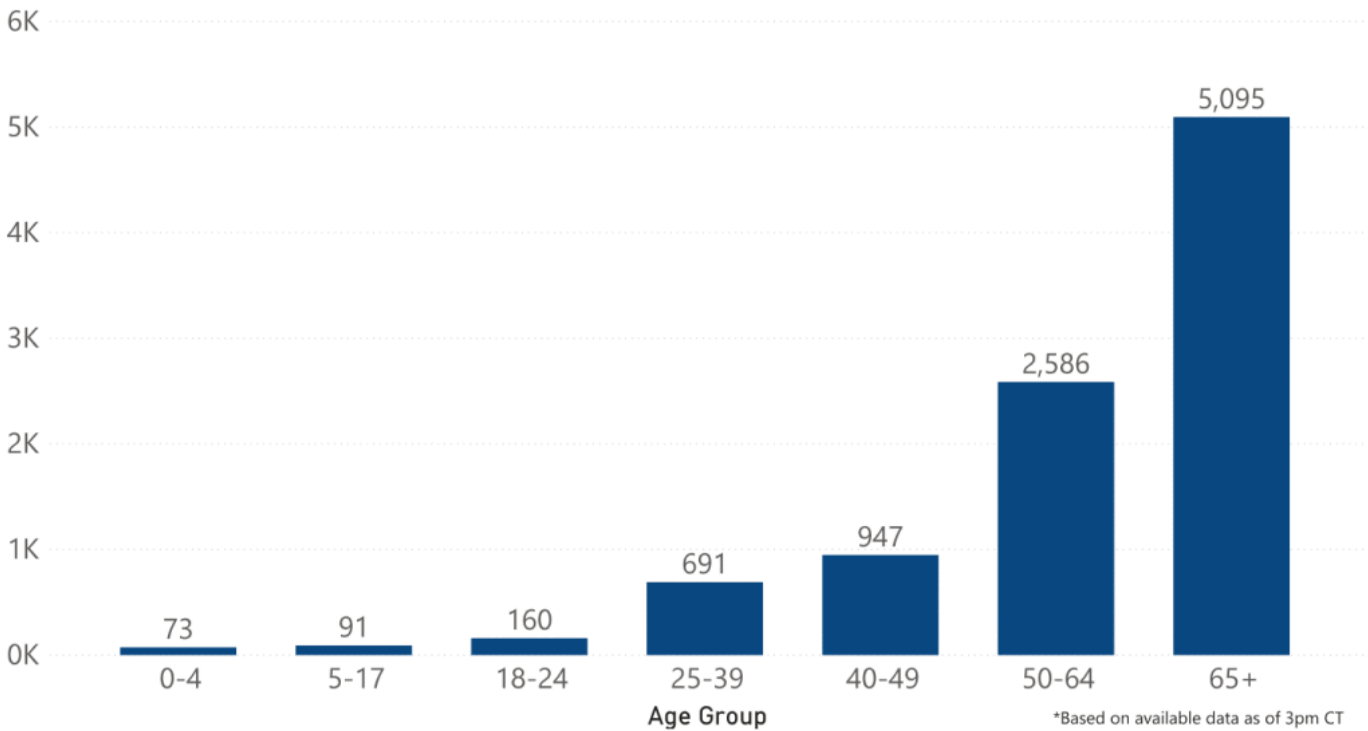

COVID-19 Underlying Conditions in Deaths by Race/Ethnicity through April 26, 2021*, Mississippi

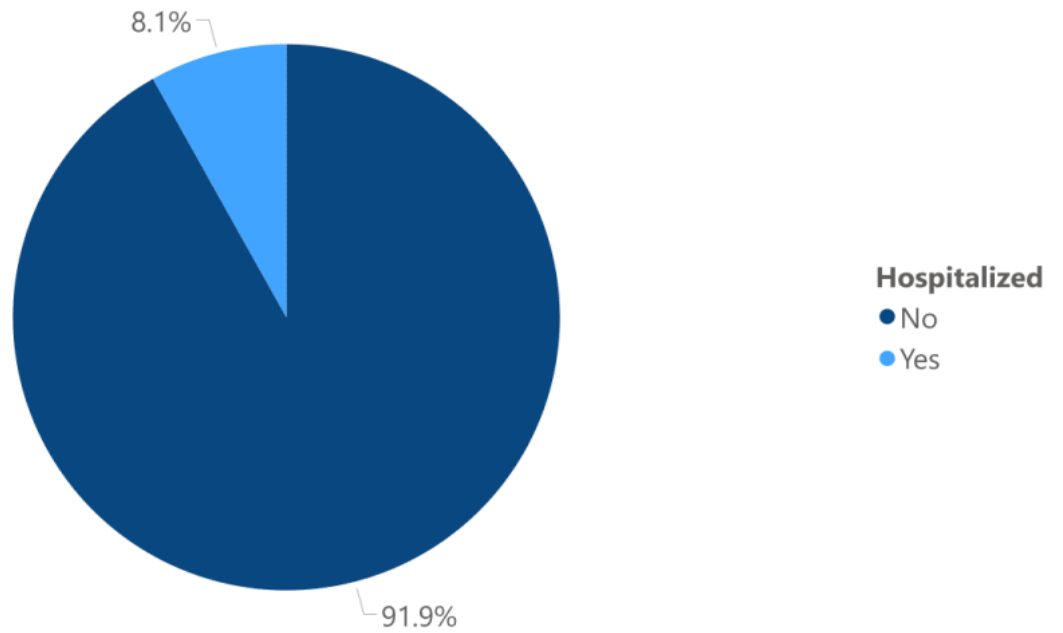

COVID-19 Deaths by Race/Ethnicity through April 26, 2021*, Mississippi

COVID-19 Hospitalized Cases by Age through April 26, 2021*, Mississippi

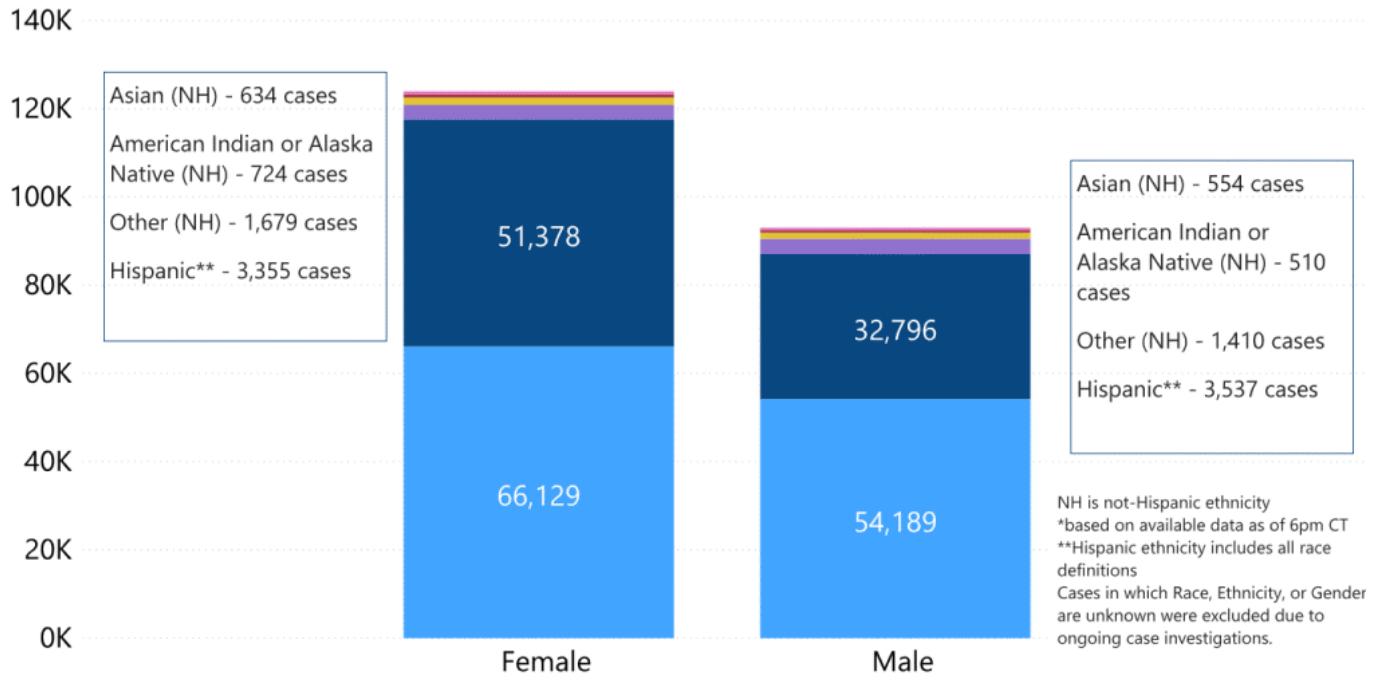

COVID-19 Cumulative Hospitalizations- Investigated Cases April 26, 2021 *

* Cases in which hospitalization is unknown were excluded due to ongoing case investigations; based on available data as of 3pm CT

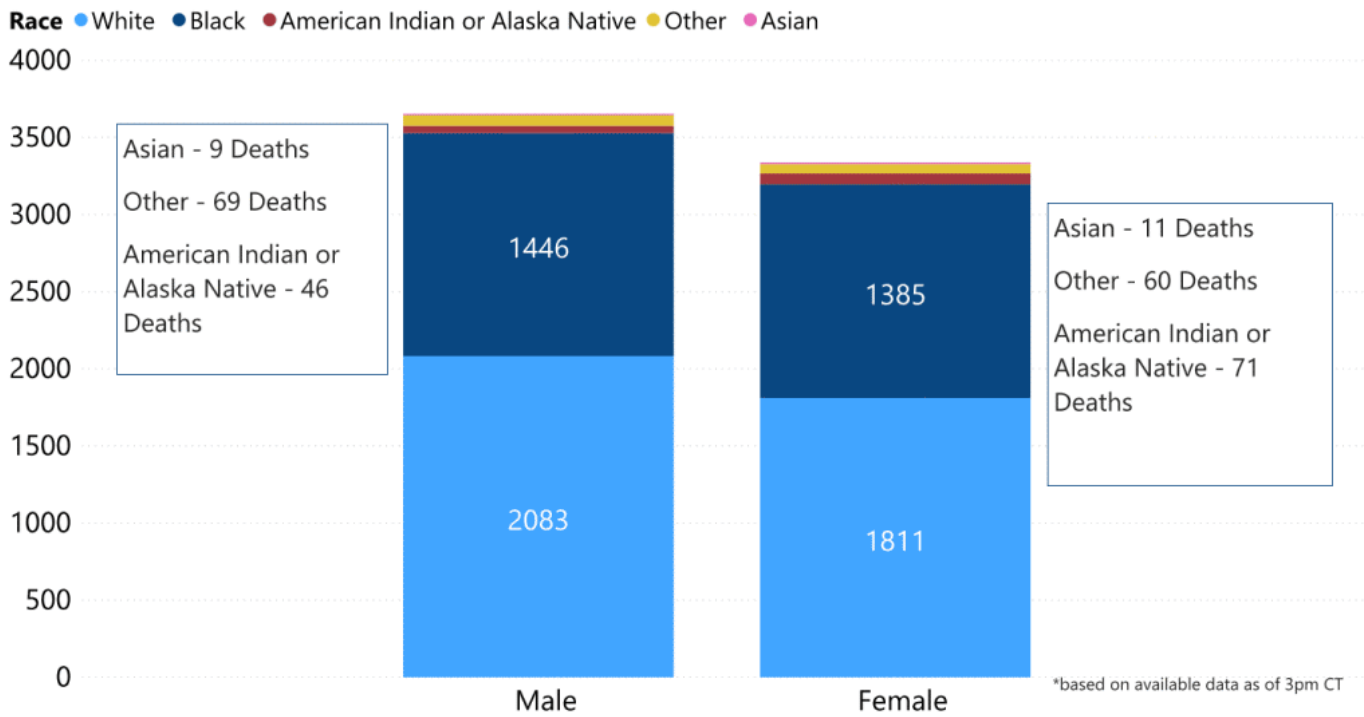

COVID-19 Cases by Race/Ethnicity and Gender through April 26, 2021*, Mississippi

Race/Ethnicity ● White (NH) ● Black (NH) ● Hispanic** ● Other (NH) ● American Indian or Alaska Native (NH) ● Asian (NH)

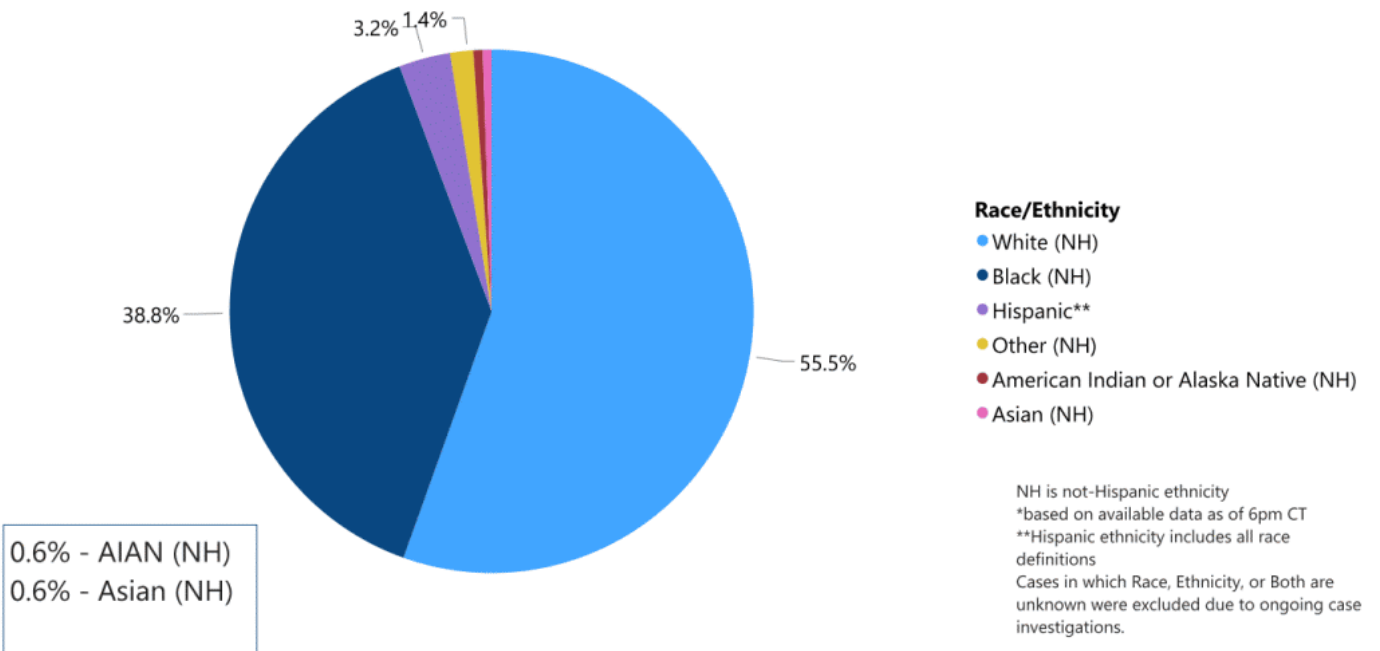

NH is not-Hispanic ethnicity
 *based on available data as of 6pm CT
 **Hispanic ethnicity includes all race definitions
 Cases in which Race, Ethnicity, or Gender are unknown were excluded due to ongoing case investigations.

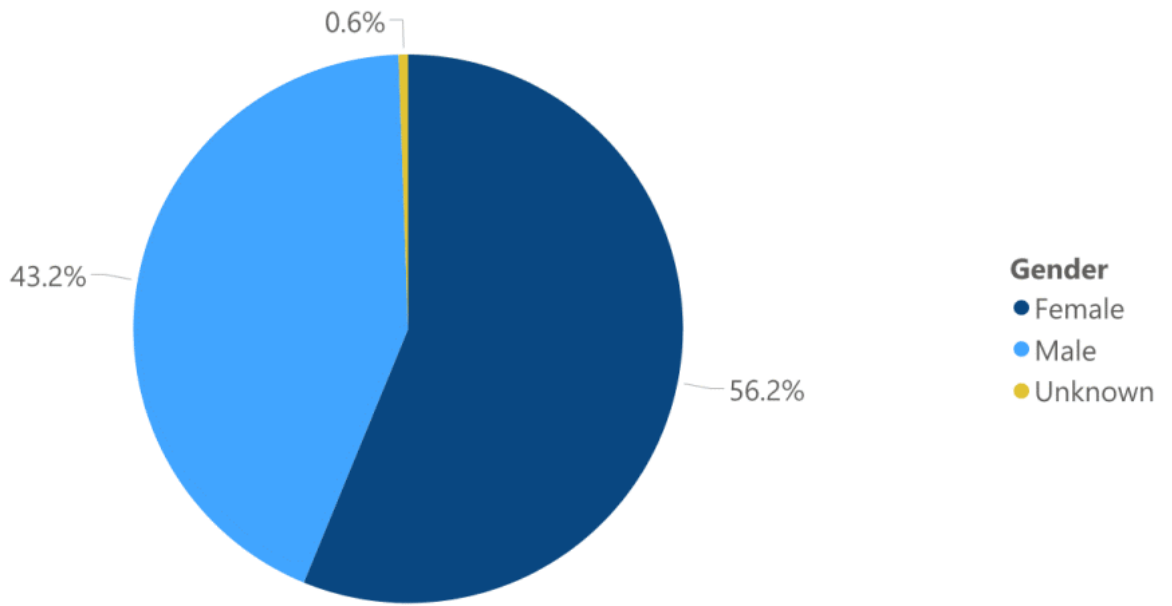

COVID-19 Deaths by Race and Gender through April 26, 2021*, Mississippi

COVID-19 Cases by Race/Ethnicity through April 26, 2021*, Mississippi

COVID-19 Cases by Gender through April 26, 2021*, Mississippi

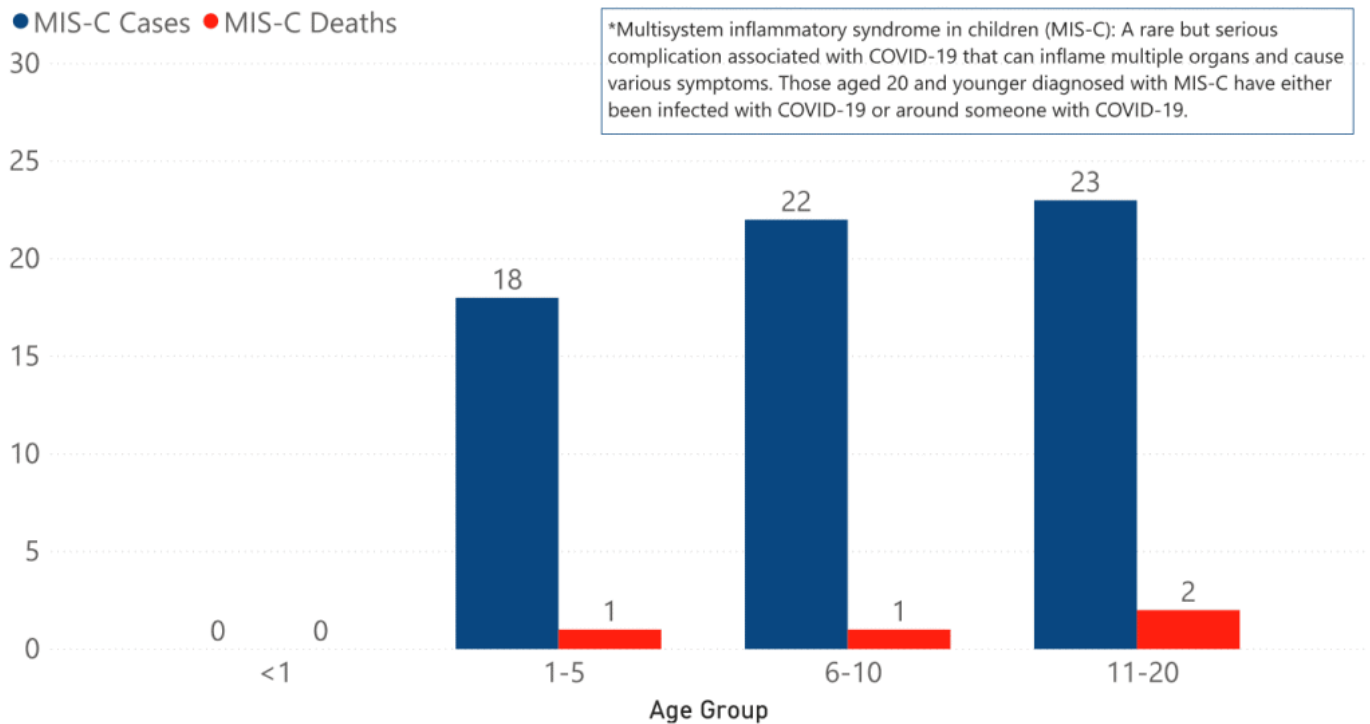

*Based on available data as of 3pm CT

Weekly Pediatric MIS-C Cases and Deaths

Multisystem inflammatory syndrome in children (MIS-C) is a rare but serious condition associated with COVID-19 that causes inflammation in many body parts, including the heart and other vital organs.

MIS-C* Cases and Deaths by Age Group through April 26, 2021, Mississippi

Weekly High Case and High Incidence Counties

Tracking counties with recent high numbers of COVID-19 cases, adjusted for population, provides insight on where local outbreaks are most serious, and where protective measures should be increased. For more accurate reporting, these weekly charts include sample collection dates only up to seven days in the past to allow for case investigation and delays in lab test reports.

Cases counts in these charts is based on the date of illness onset. If the date of illness is not known, the date the test sample was taken, or the date of test result reporting is used instead. Counts are adjusted as cases are investigated.

Counties are ranked by highest weekly case counts, and by weekly incidence (cases proportional to population). A separate table ranking all counties is also available. **All tables updated weekly.**

 Cases based on test date. Cases without test date excluded due to ongoing investigations.
 Table will be updated weekly. A one week lag is used for reporting.

Syndromic Surveillance

Emergency department visits by those with symptoms characteristic of COVID-19, influenza and pneumonia, updated weekly.

Percentage of Emergency Department and Clinic visits for CLI, ILI, and Pneumonia Cases Weekly Statewide Summary, January 4, 2020 - April 24, 2021

*The graph represents syndromic surveillance data from emergency department visits, reported electronically by hospitals throughout the state, that are consistent with COVID-19-Like Illness (CLI), Influenza-Like Illness (ILI), and Pneumonia. Based on available data as of 6pm CT. Graph will be updated weekly.

Estimated Recoveries

Presumed COVID-19 cases recovered, estimated weekly (does not include cases still under investigation).

COVID-19 Presumed Recovered Cases through April 26, 2021, Mississippi

300,323

Presumed Recovered*

*Reflects Provisional Estimates. Presumed Recovered if:

1) It has been 14 days or more since the case tested positive, if they were not hospitalized

2) It has been 21 days or more since the case tested positive, if they were hospitalized or hospitalization was unknown.

All deaths excluded. Presumed recovered counts will be updated weekly.

COVID-19 Testing

Statewide Combined Testing as of April 25 (revised)

COVID-19 testing providers around the state include commercial laboratories, hospital labs and the MSDH Public Health Laboratory results from all these sources are combined in the table below. (Updated weekly)

PCR testing detects current, active COVID-19 infection in an individual.

Antibody (serology) testing identifies individuals with past COVID-19 infection based on antibodies they develop one to three weeks after infection.

Antigen testing is another way to identify current COVID-19 infection.

PCR tests	1,766,516
Serology (antibody) tests	91,328
Antigen tests	845,278
Total tests	2,703,122

Get COVID-19 e-mail updates daily with our free newsletter:

The advertisement features a laptop on the left with a person's hands typing on the keyboard. The laptop screen displays the text "Visit us remotely!" in a blue, handwritten-style font, underlined with a thick green brushstroke. Below this is the "MISSISSIPPI WIC" logo, where "WIC" is in large, colorful letters (red, white, green) and "MISSISSIPPI" is in smaller black letters above it. Underneath the logo, it says "Women, Infants and Children". To the right of the laptop, the text reads: "Stay home - Call in!" in bold black font, followed by "You can hold your WIC appointment by **phone** or on your **computer**." in black font. At the bottom right, it says "Set up yours today!" in bold red font, with "Call your local WIC center" in a smaller black font below it.
