## COVID-19 in Mississippi

### New Cases and Deaths as of May 24

#### NEW CASES

**157**

New COVID-19 positive test results reported to MSDH as of 3 p.m. yesterday.

#### TOTAL MISSISSIPPI CASES

**316,911**

- ▶ [Totals by county](#)

#### NEW DEATHS

**13**

New COVID-19 related deaths reported to MSDH as of 3 p.m. yesterday.

Three deaths occurred on May 23 in the counties below:

- ▶ [County list](#)

Ten deaths occurred between April 15 and May 18, identified from death certificate reports.

- ▶ [County list](#)

## TOTAL MISSISSIPPI DEATHS

7,298

▶ [Totals by county](#)

## LTC OUTBREAKS

19

Current outbreaks in long-term care (LTC) facilities only. (See [LTC facility outbreak definition](#).)

**About our case counts:** We currently update our case totals each weekday based on test results from the previous day (or weekend). Outside laboratories also report positive test results to us, which are included in our totals. Multiple positive tests for the same individual are counted only once. County case numbers and deaths may change as investigation finds new or additional information.

| <b>Total</b> | <b>316,911</b> | <b>7,298</b> |

## Case Classifications

Mississippi investigates and reports both probable and confirmed cases and deaths according to the [CSTE case definition](#).

|  | Confirmed | Probable | Total |
|--|-----------|----------|-------|
|--|-----------|----------|-------|

|        | Confirmed | Probable | Total          |
|--------|-----------|----------|----------------|
| Cases  | 193,997   | 122,914  | <b>316,911</b> |
| Deaths | 5,031     | 2,267    | <b>7,298</b>   |

Confirmed cases and deaths are generally determined by positive PCR tests, which detect the presence of ongoing coronavirus infection.

Probable cases are those who test positive by other testing methods such as antibody or antigen, and have recent symptoms consistent with COVID-19, indicating a recent infection.

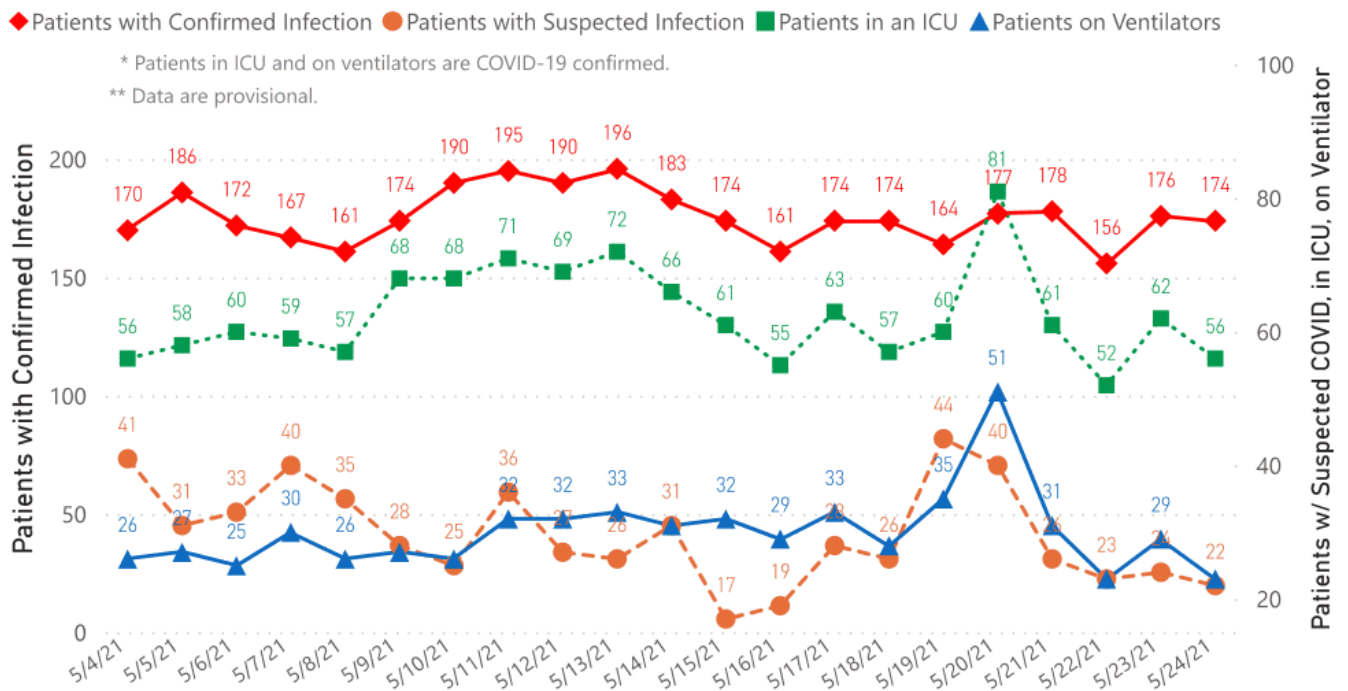

Probable deaths are those individuals with a designation of COVID-19 as a cause of death on the death certificate, but where no confirmatory testing was performed.

**COVID-19 Cases by Race/Ethnicity and Gender through May 24, 2021\*, Mississippi**

**Race/Ethnicity** ● White (NH) ● Black (NH) ● Hispanic\*\* ● Other (NH) ● American Indian or Alaska Native (NH) ● Asian (NH)

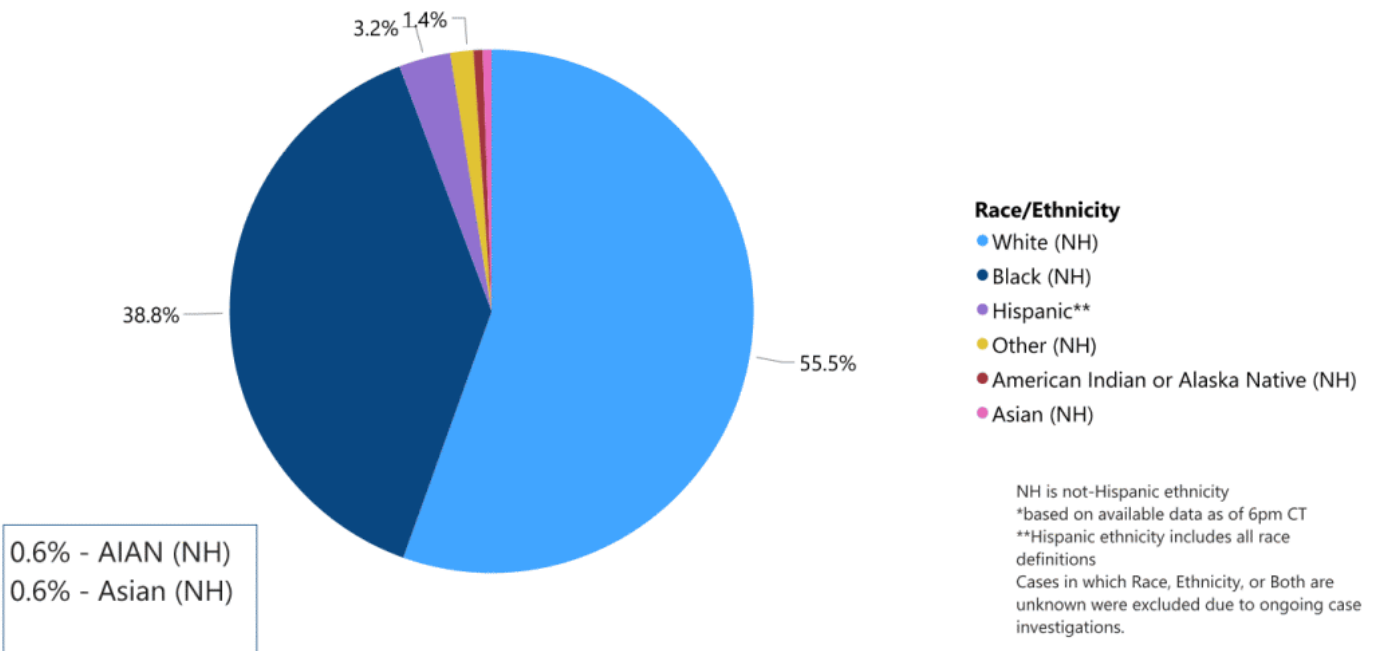

NH is not-Hispanic ethnicity  
 \*based on available data as of 6pm CT  
 \*\*Hispanic ethnicity includes all race definitions  
 Cases in which Race, Ethnicity, or Gender are unknown were excluded due to ongoing case investigations.

## COVID-19 Deaths by Race and Gender through May 24, 2021\*, Mississippi

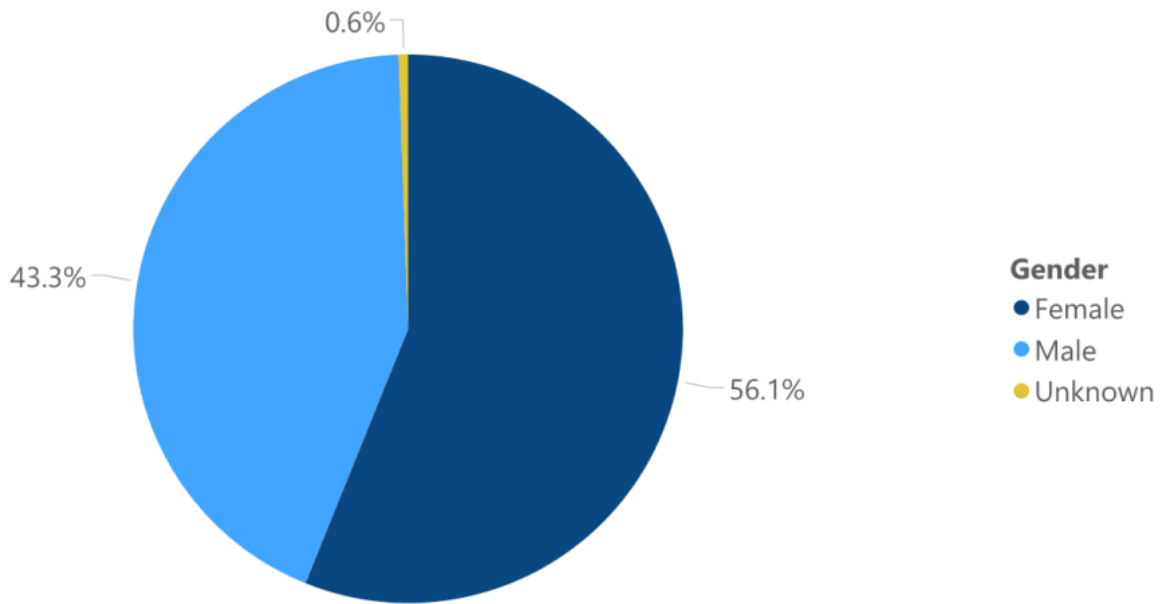

## COVID-19 Cases by Race/Ethnicity through May 24, 2021\*, Mississippi

## COVID-19 Cases by Gender through May 24, 2021\*, Mississippi

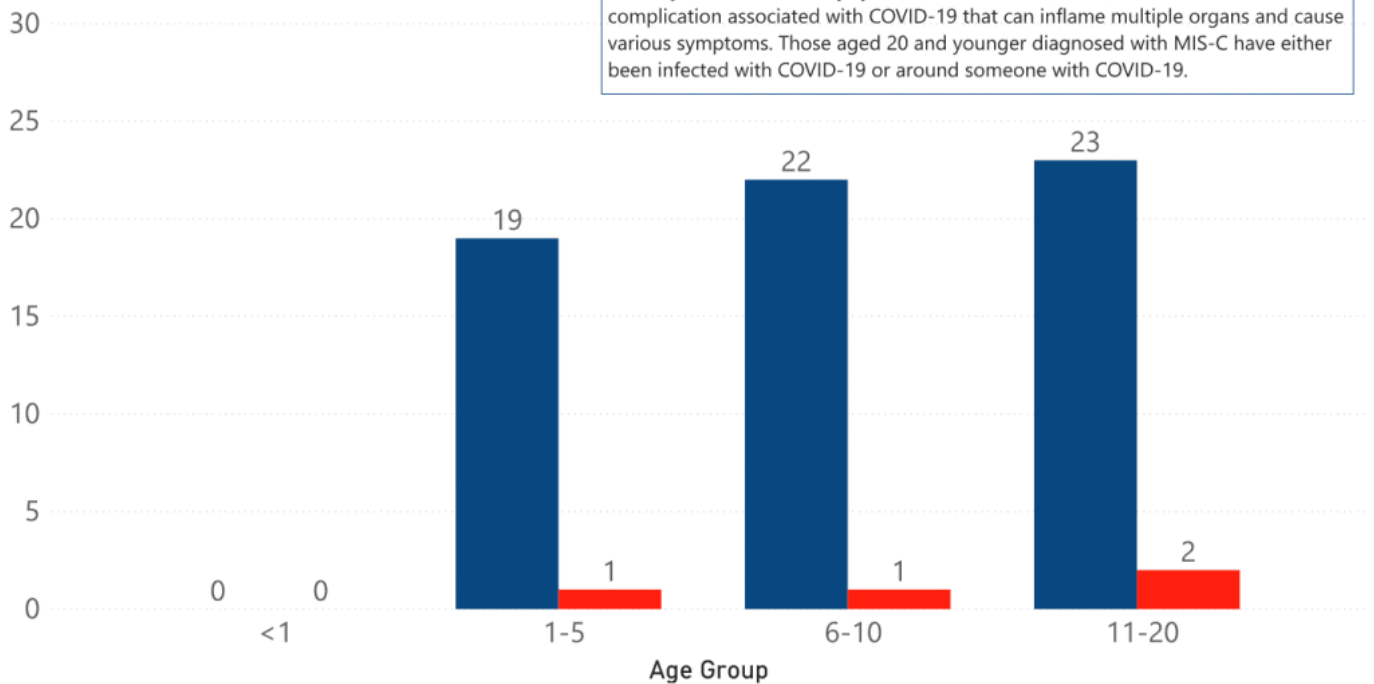

\*Based on available data as of 3pm CT

## Weekly Pediatric MIS-C Cases and Deaths

[Multisystem inflammatory syndrome in children \(MIS-C\)](#) is a rare but serious condition associated with COVID-19 that causes inflammation in many body parts, including the heart and other vital organs.

## MIS-C\* Cases and Deaths by Age Group through May 24, 2021, Mississippi

● MIS-C Cases ● MIS-C Deaths

\*Multisystem inflammatory syndrome in children (MIS-C): A rare but serious complication associated with COVID-19 that can inflame multiple organs and cause various symptoms. Those aged 20 and younger diagnosed with MIS-C have either been infected with COVID-19 or around someone with COVID-19.

## Weekly High Case and High Incidence Counties

Tracking counties with recent high numbers of COVID-19 cases, adjusted for population, provides insight on where local outbreaks are most serious, and where protective measures should be increased. For more accurate reporting, these weekly charts include sample collection dates only up to seven days in the past to allow for case investigation and delays in lab test reports.

Cases counts in these charts is based on the date of illness onset. If the date of illness is not known, the date the test sample was taken, or the date of test result reporting is used instead. Counts are adjusted as cases are investigated.

Counties are ranked by two-week case counts, and by two-week incidence (cases proportional to population). A separate table ranking all counties is also available. **All tables updated weekly.**

\*based on available data as of 3pm CT  
 Cases based on test date. Cases without test date excluded due to ongoing investigations.  
 Table will be updated weekly. A one week lag is used for reporting.

## Syndromic Surveillance

Emergency department visits by those with symptoms characteristic of COVID-19, influenza and pneumonia, updated weekly.

### Percentage of Emergency Department and Clinic visits for CLI, ILI, and Pneumonia Cases Weekly Statewide Summary, January 4, 2020 - May 22, 2021

\*The graph represents syndromic surveillance data from emergency department visits, reported electronically by hospitals throughout the state, that are consistent with COVID-19-Like Illness (CLI), Influenza-Like Illness (ILI), and Pneumonia. Based on available data as of 6pm CT. Graph will be updated weekly.

## Estimated Recoveries

Presumed COVID-19 cases recovered, estimated weekly (does not include cases still under investigation).

## COVID-19 Presumed Recovered Cases through May 24, 2021, Mississippi

**306,872**  
Presumed Recovered\*

\*Reflects Provisional Estimates. Presumed Recovered if:

- 1) It has been 14 days or more since the case tested positive, if they were not hospitalized
- 2) It has been 21 days or more since the case tested positive, if they were hospitalized or hospitalization was unknown.

All deaths excluded. Presumed recovered counts will be updated weekly.

## COVID-19 Testing

### Statewide Combined Testing as of May 23

COVID-19 testing providers around the state include commercial laboratories, hospital labs and the MSDH Public Health Laboratory results from all these sources are combined in the table below. (Updated weekly)

**PCR** testing detects current, active COVID-19 infection in an individual.

**Antibody** (serology) testing identifies individuals with past COVID-19 infection based on antibodies they develop one to three weeks after infection.

**Antigen** testing is another way to identify current COVID-19 infection.

|                           |                  |
|---------------------------|------------------|
| PCR tests                 | 1,812,049        |
| Serology (antibody) tests | 94,274           |
| Antigen tests             | 880,713          |
| <b>Total tests</b>        | <b>2,787,036</b> |

The advertisement features a laptop on the left with a person's hands typing on the keyboard. The laptop screen displays the text "Visit us remotely!" in blue, a green brushstroke underline, and the "MISSISSIPPI WIC Women, Infants and Children" logo. To the right of the laptop, the text reads: "Stay home - Call in!" in bold black, followed by "You can hold your WIC appointment by **phone** or on your **computer**." Below this, it says "Set up yours today!" in bold red, and "Call your local WIC center" in a smaller black font.
