As the delta variant spreads, the State Health Officer urges all Mississippians 12 and older to be vaccinated. Masks should be worn by everyone in indoor public places, and those 65 and older or with a chronic medical condition should avoid large indoor gatherings. [Details »](#)

COVID-19 in Mississippi

New Cases and Deaths as of August 3

NEW CASES

2,821

New COVID-19 positive test results reported to MSDH as of 3 p.m. yesterday.

TOTAL MISSISSIPPI CASES

352,891

▶ [Totals by county](#)

NEW DEATHS

7

New COVID-19 related deaths identified by MSDH as of 3 p.m. yesterday.

Seven deaths occurred between August 1 and August 3 in the counties below:

▶ [County list](#)

TOTAL MISSISSIPPI DEATHS

7,597

▶ [Totals by county](#)

LTC OUTBREAKS

134

Current outbreaks in long-term care (LTC) facilities only. (See [LTC facility outbreak definition](#).)

▶ [LTC cases by county](#)

About our case counts: We currently update our case totals each weekday based on test results reported to MSDH from the previous day (or weekend). Multiple positive tests for the same individual are counted only once. County case numbers and deaths may change as investigation finds new or additional information.

COVID-19 Data Reports

▶ [Variants](#) PDF

New format for this report. Selected COVID-19 variants identified over time, determined from a sampling of COVID-19 cases since January 2021. Updated weekly

Case Classifications

Mississippi investigates and reports both probable and confirmed cases and deaths according to the [CSTE case definition](#).

	Confirmed	Probable	Total
Cases	214,425	138,466	352,891
Deaths	5,241	2,356	7,597

Confirmed cases and deaths are generally determined by positive PCR tests, which detect the presence of ongoing coronavirus infection.

Probable cases are those who test positive by other testing methods such as antibody or antigen, and have recent symptoms consistent with COVID-19, indicating a recent infection.

Probable deaths are those individuals with a designation of COVID-19 as a cause of death on the death certificate, but where no confirmatory testing was performed.

Daily Statewide Data Charts

Updated Tuesday-Friday. Our state case map and other data charts are also available in interactive form.

▶ [View interactive epidemiological and surveillance charts](#)

The charts below are based on available data at the time of publication. Charts do **not** include cases where insufficient details of the case are known.

COVID-19 Cases by Date* through August 3, 2021**, Mississippi

● Cases — 7 Day Average

Note: Values up to two weeks in the past on the chart of Cases by Date above can change as we update it with new information from disease investigation.

COVID-19 LTCF* and Non-LTCF Deaths by Date of Death through August 3, 2021**, Mississippi

● Resident of LTCF Deaths ● Non-Resident of LTCF Deaths — 7 Day Average

60 *LTCF is Long Term Care Facility and includes Nursing Homes, ICF-IID, Assisted Living, and Personal Care Homes
**based on available data as of 3pm CT
***7 day average not included for this time period due to possible delays in reporting

Weekly Statewide Data Charts

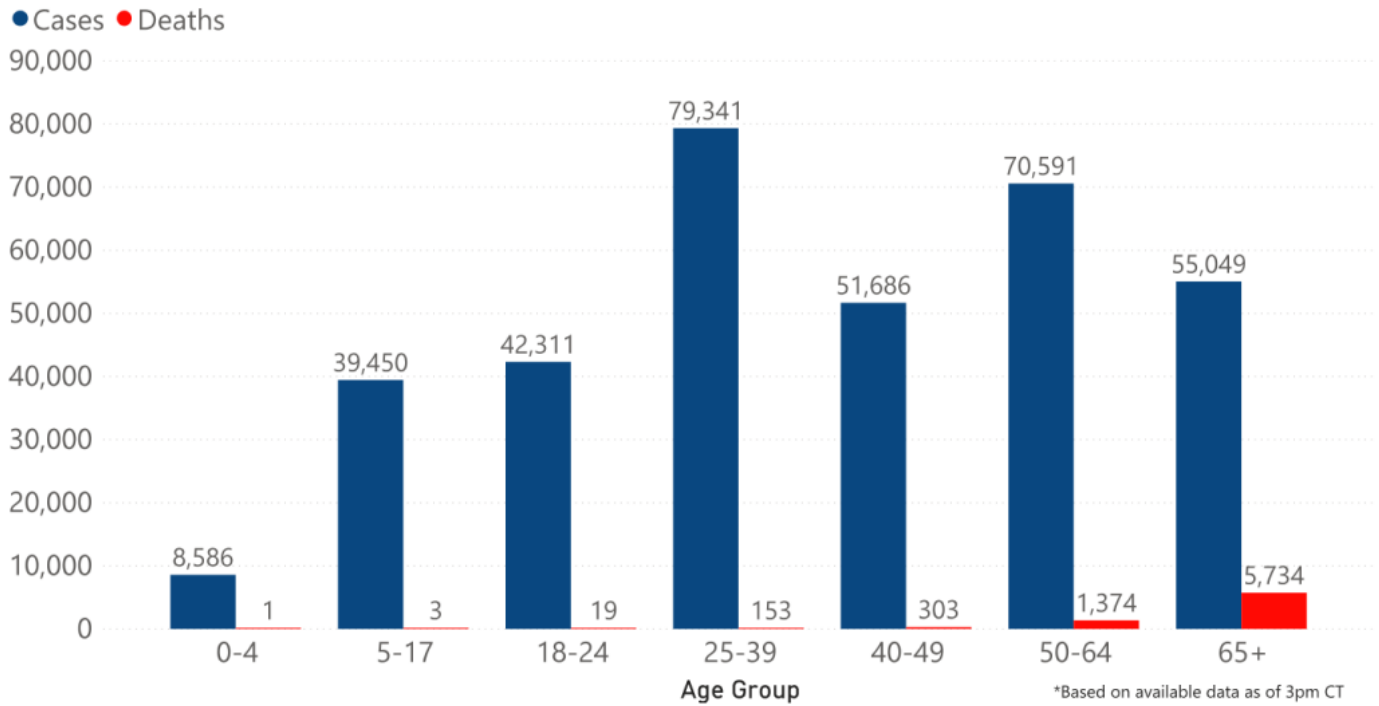

Includes:

- Cases, deaths and hospitalizations, analyzed by age, race/ethnicity, gender and other factors

- MIS-C cases and deaths
- Counties with high COVID-19 cases and incidence
- Syndromic surveillance

▼ All weekly charts

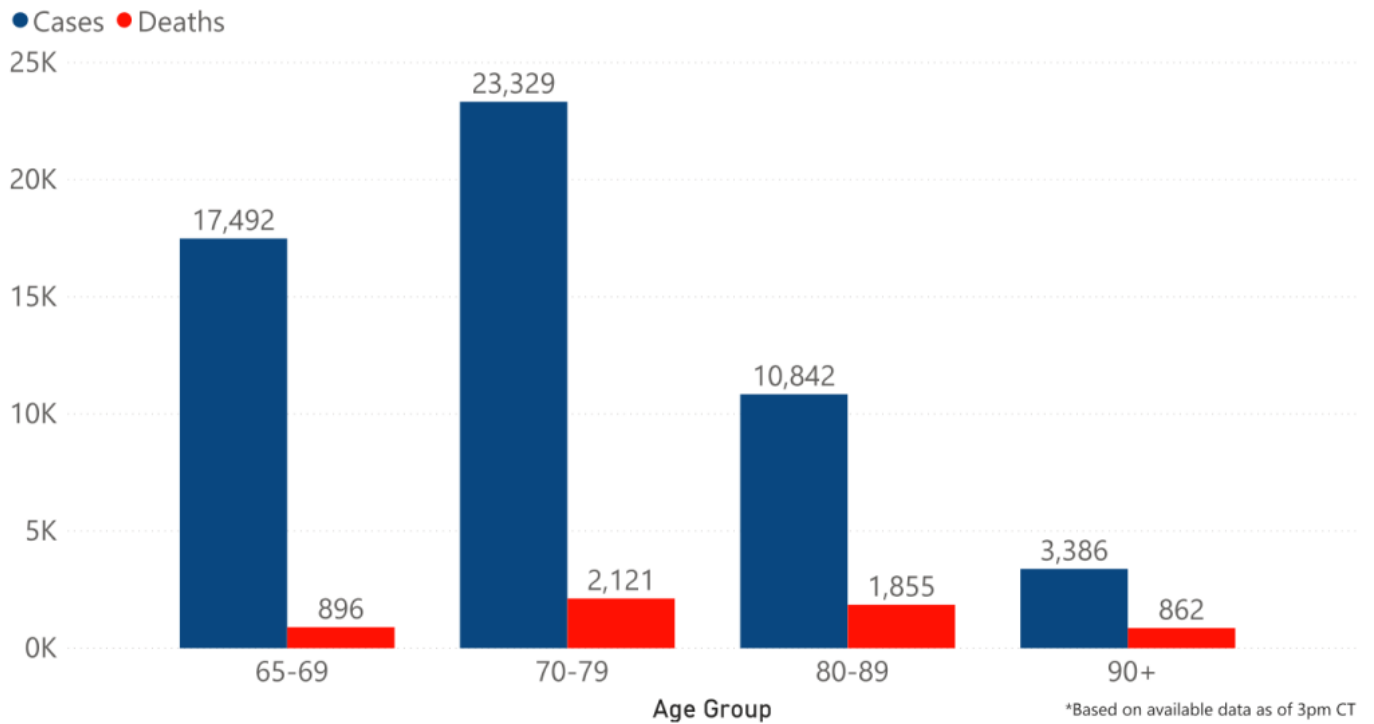

COVID-19 Cases and Deaths by Age Group through August 2, 2021*, Mississippi

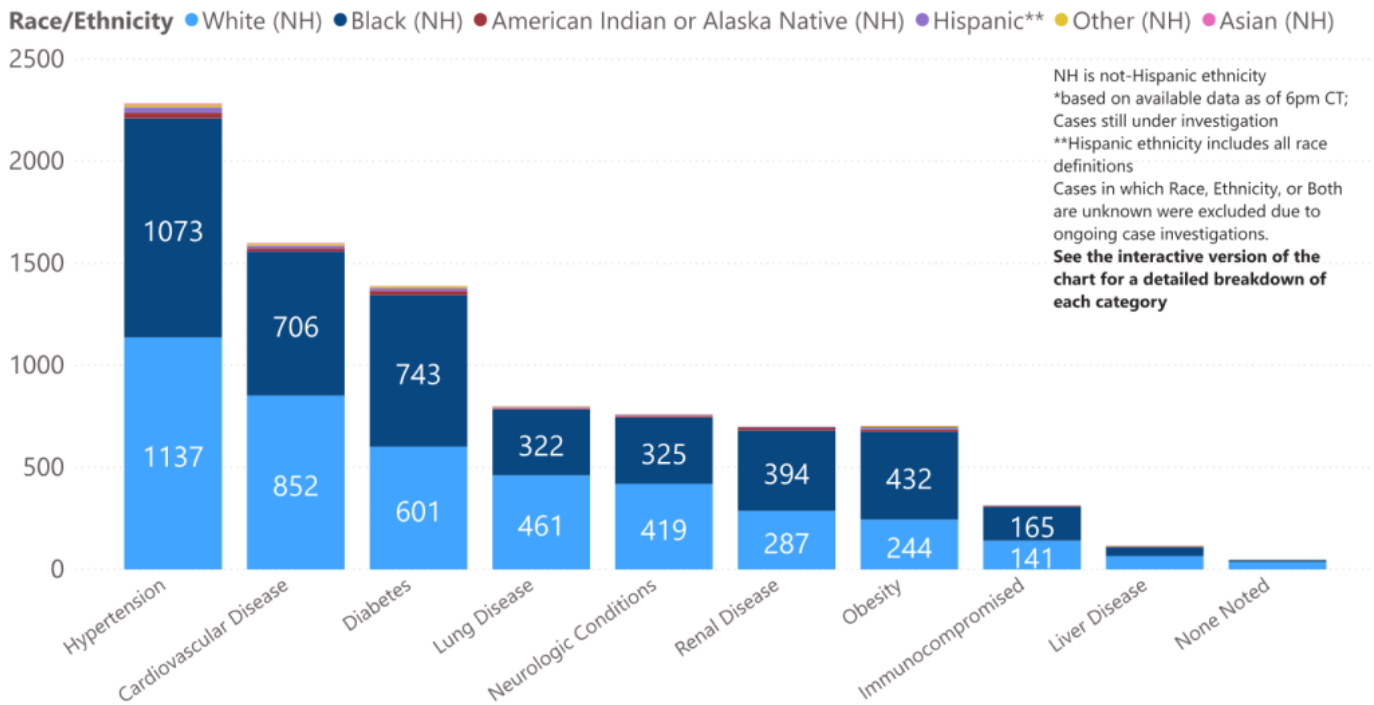

COVID-19 Pediatric Cases and Deaths by Age Group through August 2, 2021*, Mississippi

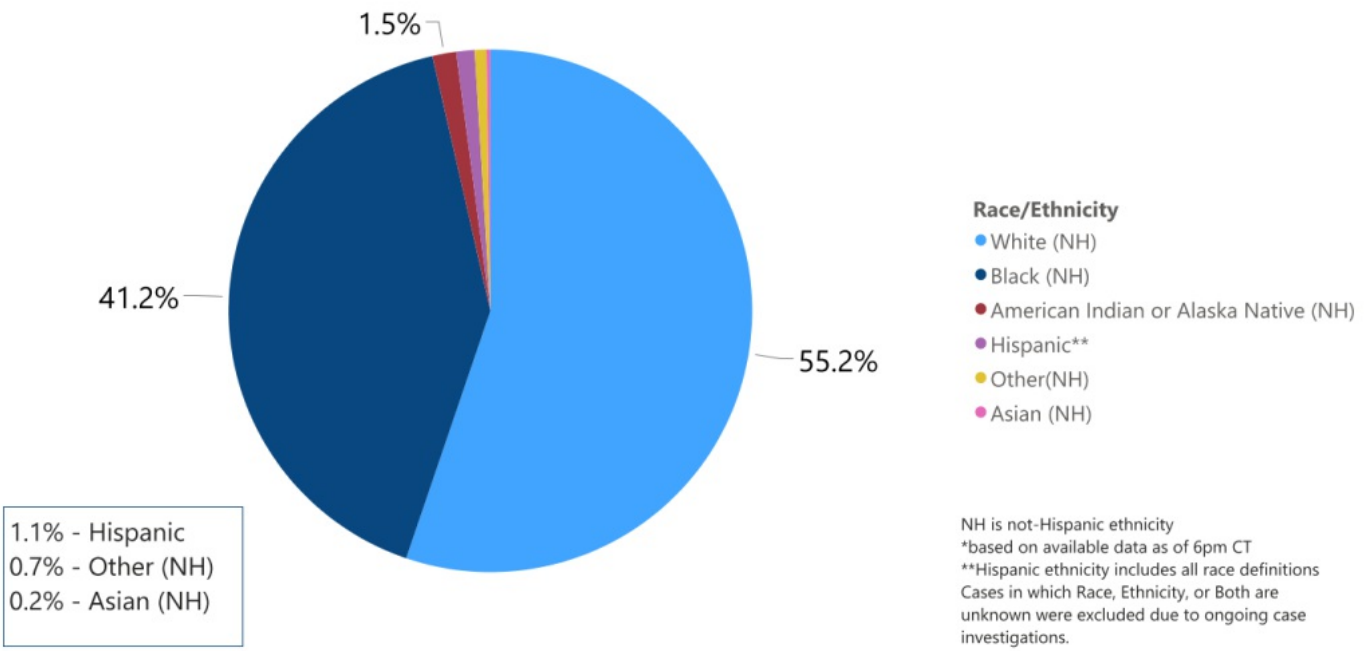

COVID-19 Geriatric Cases and Deaths by Age Group through August 2, 2021*, Mississippi

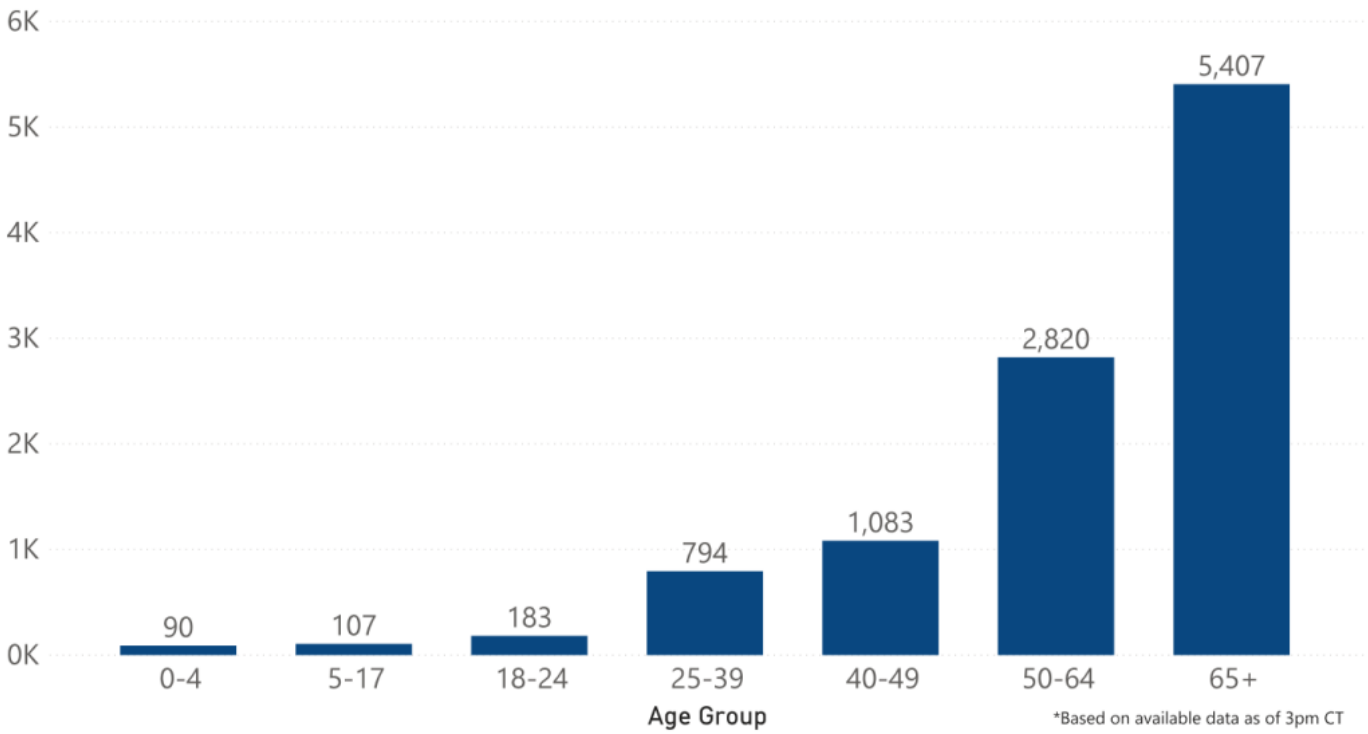

COVID-19 Underlying Conditions in Deaths by Race/Ethnicity through August 2, 2021*, Mississippi

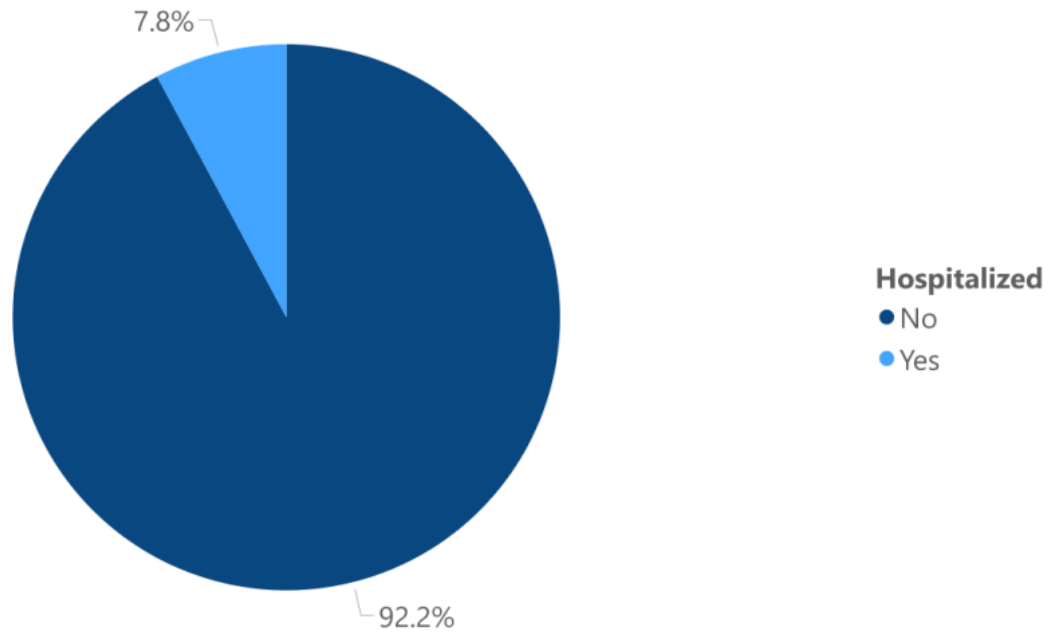

COVID-19 Deaths by Race/Ethnicity through August 2, 2021*, Mississippi

COVID-19 Hospitalized Cases by Age through August 2, 2021*, Mississippi

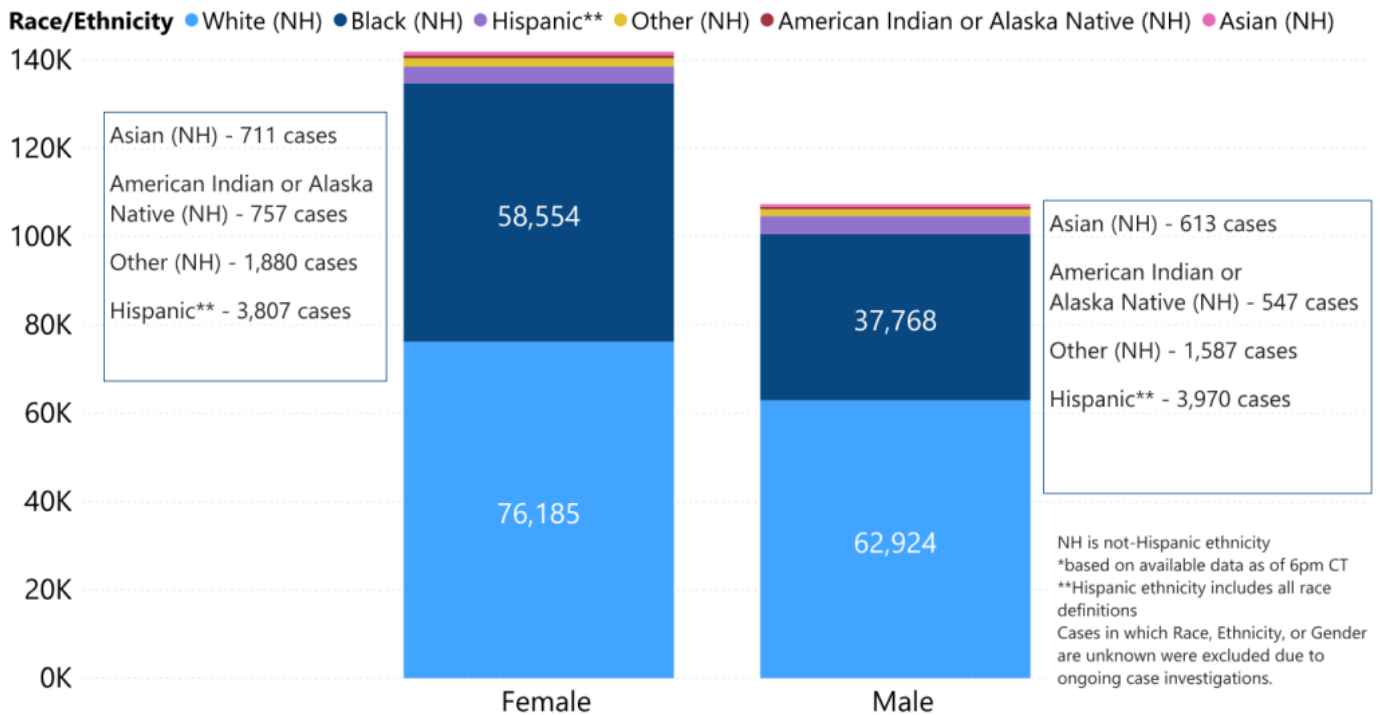

COVID-19 Cumulative Hospitalizations-Invstigated Cases August 2, 2021 *

* Cases in which hospitalization is unknown were excluded due to ongoing case investigations; based on available data as of 3pm CT

COVID-19 Cases by Race/Ethnicity and Gender through August 2, 2021*, Mississippi

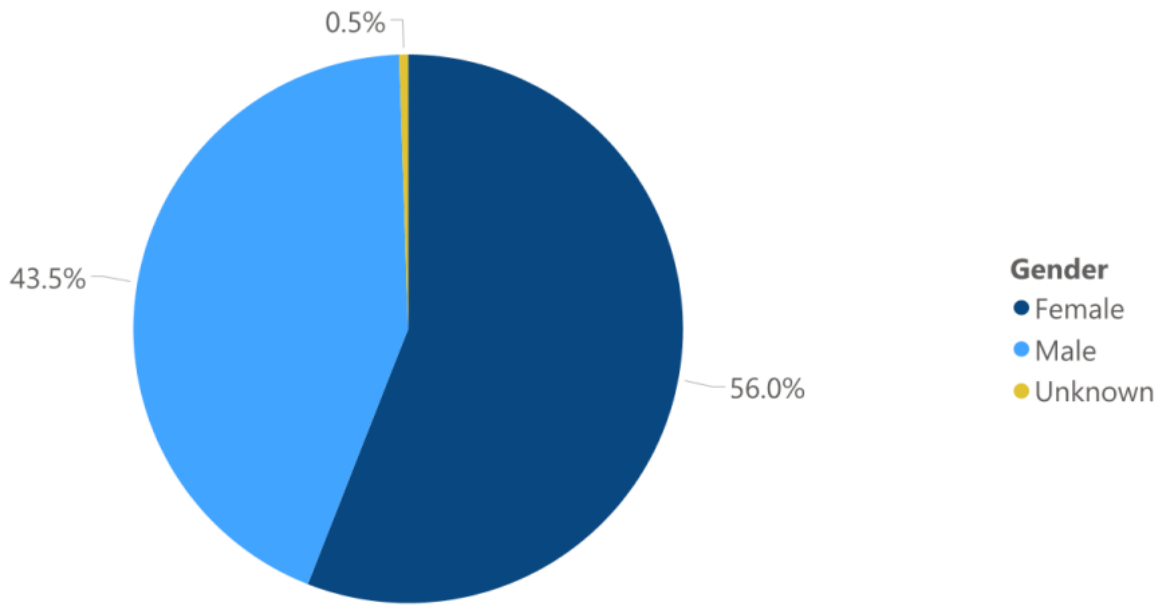

COVID-19 Deaths by Race and Gender through August 2, 2021*, Mississippi

COVID-19 Cases by Race/Ethnicity through August 2, 2021*, Mississippi

COVID-19 Cases by Gender through August 2, 2021*, Mississippi

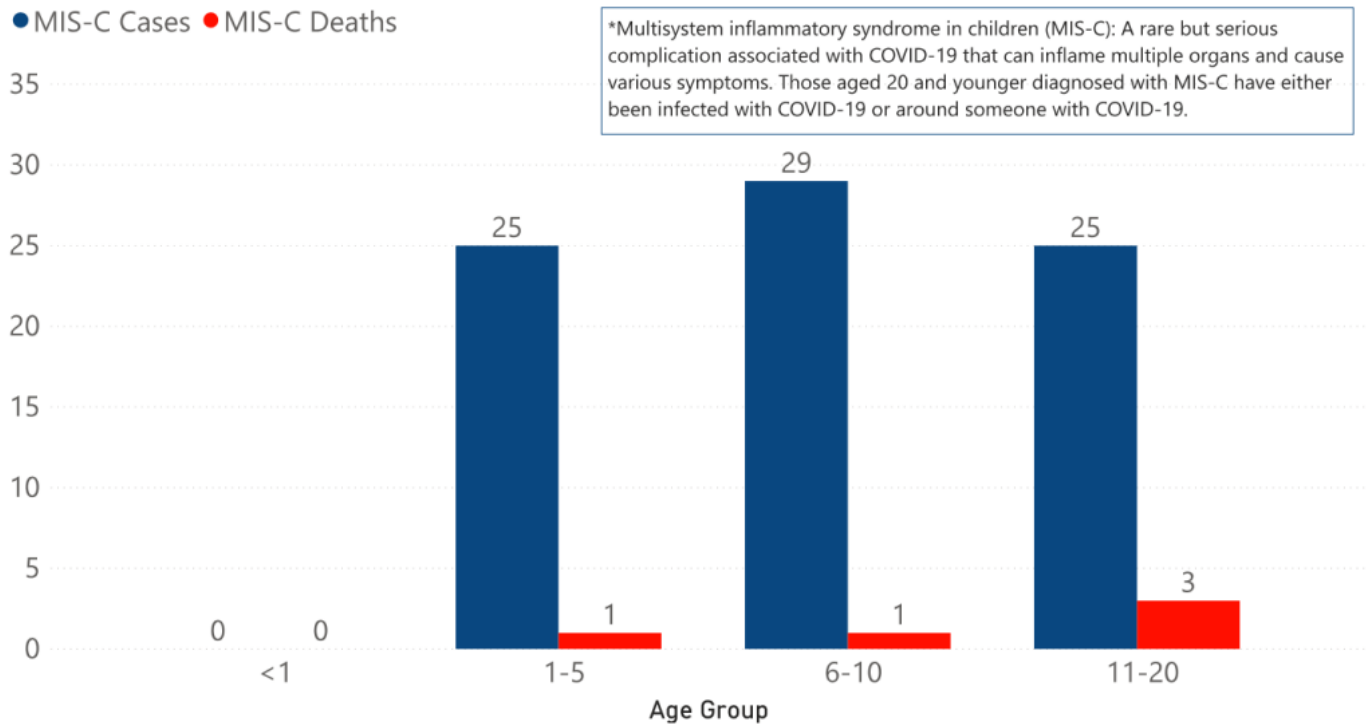

*Based on available data as of 3pm CT

Weekly Pediatric MIS-C Cases and Deaths

[Multisystem inflammatory syndrome in children \(MIS-C\)](#) is a rare but serious condition associated with COVID-19 that causes inflammation in many body parts, including the heart and other vital organs.

MIS-C* Cases and Deaths by Age Group through August 2, 2021, Mississippi

*Multisystem inflammatory syndrome in children (MIS-C): A rare but serious complication associated with COVID-19 that can inflame multiple organs and cause various symptoms. Those aged 20 and younger diagnosed with MIS-C have either been infected with COVID-19 or around someone with COVID-19.

Weekly High Case and High Incidence Counties

Tracking counties with recent high numbers of COVID-19 cases, adjusted for population, provides insight on where local outbreaks are most serious, and where protective measures should be increased. For more accurate reporting, these weekly charts include sample collection dates only up to seven days in the past to allow for case investigation and delays in lab test reports.

Cases counts in these charts is based on the date of illness onset. If the date of illness is not known, the date the test sample was taken, or the date of test result reporting is used instead. Counts are adjusted as cases are investigated.

Counties are ranked by two-week case counts, and by two-week incidence (cases proportional to population). A separate table ranking all counties is also available. **All tables updated weekly.**

LOWNDES	354	604.1	6983	11917.4	5%

*based on available data as of 3pm CT
 Cases based on test date. Cases without test date excluded due to ongoing investigations.
 Table will be updated weekly. A one week lag is used for reporting.

Syndromic Surveillance

Emergency department visits by those with symptoms characteristic of COVID-19, influenza and pneumonia, updated weekly.

Percentage of Emergency Department and Clinic visits for CLI, ILI, and Pneumonia Cases Weekly Statewide Summary, January 4, 2020 - July 31, 2021

*The graph represents syndromic surveillance data from emergency department visits, reported electronically by hospitals throughout the state, that are consistent with COVID-19-Like Illness (CLI), Influenza-Like Illness (ILI), and Pneumonia. Based on available data as of 6pm CT. Graph will be updated weekly.

Estimated Recoveries

Presumed COVID-19 cases recovered, estimated weekly (does not include cases still under investigation).

320,771

Presumed Recovered*

*Reflects Provisional Estimates. Presumed Recovered if:

- 1) It has been 14 days or more since the case tested positive, if they were not hospitalized
- 2) It has been 21 days or more since the case tested positive, if they were hospitalized or hospitalization was unknown.

All deaths excluded. Presumed recovered counts will be updated weekly.
