## EPIDEMIC CURVE: ONSET OF ILLNESS AMONG PERSONS WITH CONFIRMED COVID-19

(n= 10063) ?

The epidemic curve is a visual presentation of the progression of COVID-19 in NH that shows the number of people with confirmed illness on the specific date each person first started to experience symptoms. Because there is a delay between when symptoms develop and a confirmed case is reported to DHHS, the data on a given date will change over time.

Onset Date Unclear / Unknown: 6,214

**Note:** Not all confirmed cases are included in this figure due to the person having an unclear onset date or no onset date because they did not experience any symptoms.
