## NEW HAMPSHIRE LABORATORY-CONFIRMED COVID-19 CASES - RISK FACTORS AND EPIDEMIC CURVE

## EPIDEMIC CURVE: ONSET OF ILLNESS AMONG PERSONS WITH CONFIRMED COVID-19

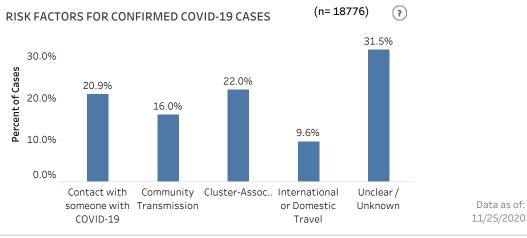

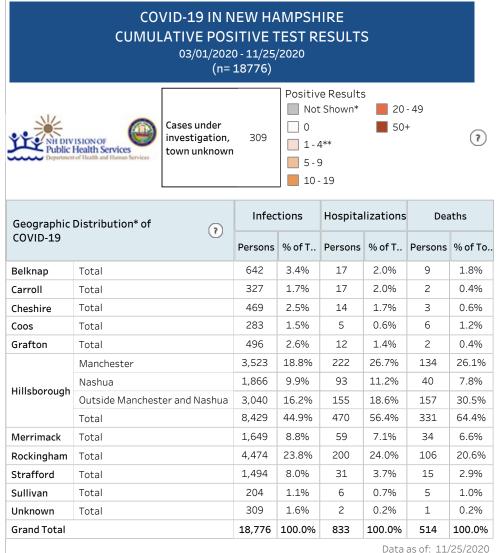

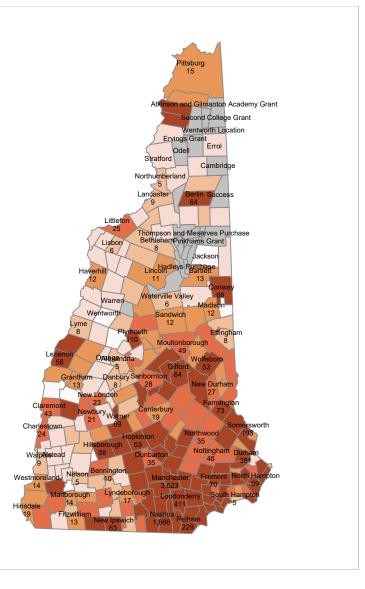

The epidemic curve is a visual presentation of the progression of COVID-19 in NH that shows the number of people with confirmed illness on the specific date each person first started to experience symptoms. Because there is a delay between when symptoms develop and a confirmed case is reported to DHHS, the data on a given date will change over time.
