

COVID-19 North Carolina Dashboard

IMPORTANT NOTICE

Two updates will be made to the NC COVID-19 dashboards on Friday, Nov. 13, 2020, that will impact numbers.

Hospitalization Data: The Centers for Disease Control and Prevention (CDC) has [revised the criteria](#) for reporting COVID-19 hospitalizations. Previously, the CDC required that hospitals report patients only when they were under isolation precautions, which is typically a maximum of 21 days. Because patients may suffer the effects of COVID-19 for a longer period of time, the CDC now requires that hospitalizations be reported for the entire length of stay. As a result, it is likely that North Carolina will see a one-time increase in hospitalizations and a continued higher number under the new definition.

Time of Reporting: NCDHHS is modifying the time that the data is pulled for the dashboards. As a result, there will be a one-time artificial decrease in the number of tests, cases and deaths on Friday, Nov. 13, 2020 as the data will cover 10 hours as opposed to the standard 24 hours. Future data will cover the standard 24-hour period.

Knowing when to dial up or down measures that slow the spread of the virus depends on North Carolina's testing, tracing and trends. This dashboard provides an overview on the metrics and capacities that the state is following.

Updated daily by approximately 12:00 p.m. Last updated November 13, 2020 at 12:45 p.m.

Daily Cases i

TOTAL CASES

305,233

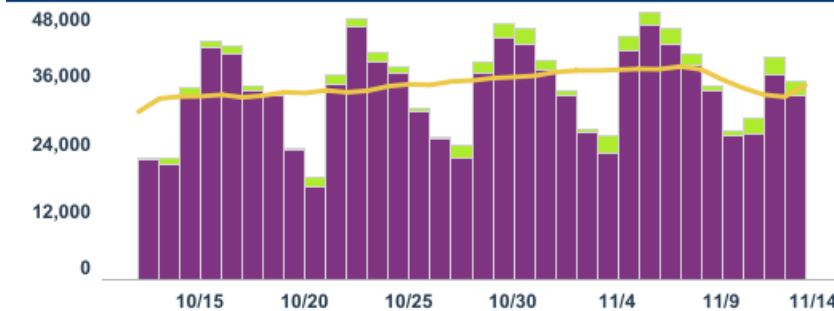

Molecular (PCR) Positive Cases

290,802

Antigen Positive Cases

14,431

Daily Tests i

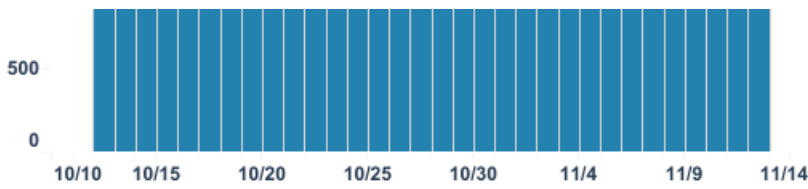

COMPLETED TESTS

4,522,336

Daily Number of People Currently Hospitalized i

CURRENTLY

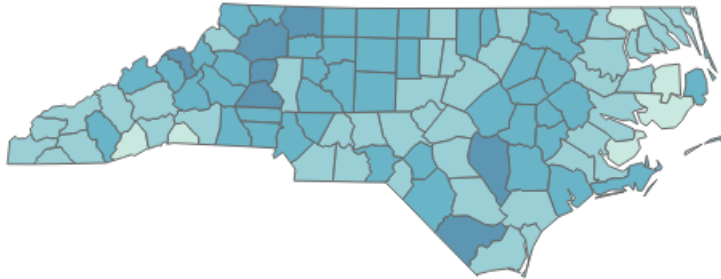

HOSPITALIZED

1,423
