

COVID-19 North Carolina Dashboard

On Friday, Nov. 20, 2020, NCDHHS further expanded the demographic data for North Carolina COVID-19 cases on the NC COVID-19 Dashboard. Demographic data for COVID-19 cases per 100,000 residents and total deaths by week are available by age group, gender, race and ethnicity for the state. In addition, demographic data on deaths is available by county.

The new information will be displayed on the Case Demographics page on the dashboard and will be updated weekly on Mondays. Demographic data previously shown on the Cases page will be displayed on the [Cases Demographics](#) page going forward.

Knowing when to dial up or down measures that slow the spread of the virus depends on North Carolina's testing, tracing and trends. This dashboard provides an overview on the metrics and capacities that the state is following.

Updated daily by approximately 12:00 p.m. Last updated November 23, 2020 at 12:00 p.m.
